Fund Manager's Report

The Fund declined by 6.62% in May, outperforming the Benchmark by 1.84%. Year to Date, the Fund underperformed the Benchmark by 0.90%.

In May, China's stock market has generally experienced a decline. The performance of CSI300, CSI500 and CSI1000 were 7.24%, 7.24%, 7.45 and 6.12% respectively. Only one sector out of all 28 sectors (SW industries) has risen in May, which is Nonferrous Metals Industry with an increase of 2.26%. Automobile Industry witnessed the largest decrease rate of 10.48%. Since the second quarter, underperformed PMI and industrial enterprise profit data have disturbed market sentiment. Facts such as unexpected trade war progress and underperformed overseas stock market have negatively affect investors' risk preference. However, some of the broad based indices are expected to fluctuate upward throughout the year. Under the policy of destocking, large industrial enterprises is continuously seeking to reduce their unsold inventory. However, according to decomposition analysis of PMI, we find that raw material stock is currently growing at a decreased rate, while finished goods inventory shows a steeper upward trend. This indicates that recent economy is facing a downturn pressure.

We mainly utilize our multi-factor model to value the stocks and construct our portfolio. The goal of this model is to explore stocks with potential alpha so as to exceed the market. We will analyze stocks from fundamental, emotional and technical aspects and score them comprehensively. The biggest sectors in our portfolio are industrials, consumer goods and basic materials. Compared to last month, the level of our industry deviation (the difference between our portfolio and our benchmark) was a little smaller. By limiting the industry we limit our potential risk on the different exposure of industries with our benchmark.

We recommend that you read and understand the contents of Prospectus Issue No. 1 for the CIMB-Principal China Direct Opportunities Fund is dated 8 March 2018, which have been deposited with Securities Commission Malaysia before investing and that you keep the said Information Memorandum for your record. Any issue of units to which the Information Memorandum relates will only be made upon receipt of the completed application form referred to in and accompanying the Information Memorandum, subject to the terms and conditions therein. The principal risks are returns not guaranteed, general market environment risk, manager's risk, inflation risk and loan financing risk. The specific risks of the Target Fund are stock specific risk, country risk, credit and default risk, liquidity risk, currency risk and RQFII regime risk. You can obtain a copy of the Prospectus from the head office of Principal Asset Management Berhad (formerly known as CIMB-Principal Asset Management Berhad) or from any of our approved distributors. We suggest that you consider these fees and charges carefully prior to making an investment. Unit prices and income distributions, if any, may fall or rise. Past performance is not reflective of future performance and income distributions are not guaranteed. Product Highlight Sheet ("PHS") is available and that investors have the right to request for a PHS; and the PHS and any other product disclosure document should be read and understood before making any investment decision. There are fees and charges involved in investing in the funds. We suggest that you consider these fees and charges carefully prior to making an investment. Unit prices and income distributions, if any, may fall or rise. Past performance is not reflective of future performance and income distributions are not guaranteed. You are also advised to read and understand the contents of the Financing for Investment in Unit Trust Risk Disclosure Statement/Unit Trust Loan Financing Risk Disclosure Statement before deciding to borrow to purchase units. All performance figures have been extracted from Lipper. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, the value of your investment will remain unchanged after the distribution of the additional units.

Carefully consider a fund's objective, risks, charges and expenses.
