INVESTORS' LETTER

Dear Valued Investor,

As we begin 2020, allow me to wish you a Happy New Year! Selamat Tahun Baru!

2019 was a year of heightened risk velocity in markets, due to external factors - both globally and domestically, such as the US-China trade tensions, uncertainties in US monetary policy, China economic growth slowdown and weak earnings in Malaysia markets.

Going into 2020, we continue to see pockets of opportunities in the equity market. This is on the back of supportive central banks policies, stabilising earnings estimate and some progressive outcome coming from US and China trade tension.

We believe you should remain fully invested, focus on long-terms returns and look to diversify your investments across a full spectrum of asset classes depending on your risk appetite. We believe that fixed income returns will be more moderate and thus, we encourage diversifying allocations to assets like Asia Pacific equities, Global equities or Global REITs. Equity markets like ASEAN and Malaysia which have underperformed in 2019 may now set to improve in 2020.

Lastly, we wish to thank you for the trust you've put in us. We achieved much this year because of the trust you placed in us:

MANAGER'S REPORT

FUND OBJECTIVE AND POLICY

What is the investment objective of the Fund?

The Fund aims to provide income and moderate capital growth through investments in one collective investment scheme, which invests primarily in a diversified portfolio of high yielding debt securities.

Has the Fund achieved its objective?

For the financial period under review, the Fund has performed in line with its objectives as stated under the Fund Performance section

The Fund will be actively rebalanced from time to time to meet sales and redemptions transactions. This is to enable a proper and efficient management of the Fund. As this is a feeder fund that invests predominantly in the Target Fund, we do not intend to take temporary defensive position for the Fund during adverse market, economic and/or any other conditions. This is to allow the Fund to mirror the performance of the Target Fund in either bullish or bearish market conditions. However, the Target Fund Investment Adviser may take temporary defensive position when deemed necessary.

MARKET REVIEW (1 SEPTEMBER 2019 TO 30 NOVEMBER 2019)

Fixed-income markets remained volatile in September 2019. Developed-market interest rates generally increased, following the fall in rates during August 2019. Investors resumed their search for higher yields as US-China trade war rhetoric calmed somewhat, with minor concessions given on both sides. After an attack on Saudi oil fields, crude production resumed sooner than anticipated, causing oil prices to subside after a temporary spike. Although economic reports continued to show weakness, investors responded positively to a modest improvement in data. However, numerous geopolitical risks remained unresolved, including ongoing Hong Kong demonstrations, a slight increase in the possibility of a hard Brexit and a potential US-European Union ("EU") trade war.

In October 2019, fixed-income markets were mixed. Developed-market interest rates generally increased, particularly in Europe. Investors continued their search for higher yields in a risk-on mode, given positive signs of a partial "phase one" US-China trade agreement and an increased likelihood of the United Kingdom leaving the EU at the end of January 2020 with a negotiated deal, avoiding a hard "Brexit". However, several geopolitical issues remain unsettled, including escalating political demonstrations in Hong Kong, which have already begun weighing on the economy, and a potential US-EU trade war. In terms of economic news, manufacturing and export results generally remained weak.

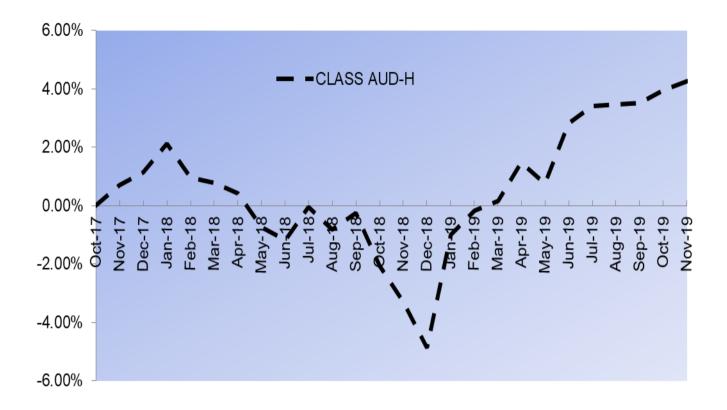

Fixed-income markets were mixed in November 2019. Developed-market interest rates continued to trend upward, particularly in Italy and Spain. Investors searched for higher yields in a risk-on mode, given optimism for a partial US-China trade agreement. Manufacturing results broadly remained weak but appeared to be stabilizing in the US and China, which provided comfort to investors that the global economy could regain its footing. However, several geopolitical issues remained unresolved, including ongoing political demonstrations in Hong Kong and signs of escalating trade tensions between the US and several countries in the EU.

MARKET OUTLOOK*

The global economic landscape remains uncertain. The US-China trade war, and brewing trade conflicts between the US and several European countries, have dampened business confidence and capital investment in developed and emerging markets. US manufacturing and exports remain weak, although they may be reaching an inflection point, while consumer spending continues to prop up the economy. In Europe, we believe the European Central Bank ("ECB") has limited monetary tools to spur growth and inflation, while Germany is reluctant to use fiscal measures to aid in a growth recovery. China is implementing monetary and fiscal stimulus to manage its slowdown, and we remain confident that the Chinese government will continue to support its economy. The protracted slowdown of global growth has been somewhat offset by robust consumer spending in most developed countries.

INVESTMENT STRATEGY

The Fund will continue to remain fully invested in the Target Fund with minimal cash kept for liquidity purposes.
