KEY RISKS

General risks of investing in a unit trust fund

Returns not guaranteed	The investment of the Fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the Fund's investment objective will be achieved.
Market risk	Refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that your investment in the wholesale fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.

Loan financing risk	This risk occurs when investors finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments.
----------------------------	--

Specific risks of the Fund

Currency risk	Currency risk is applicable to Class(es) (e.g. Class MYR) which is in a different currency than the base currency of the Fund (i.e. USD). The impact of the exchange rate movement between USD and the currency denomination of the respective Class may result in a depreciation of the value of your holdings as expressed currency denomination of the Class(es). As for hedged Class, the Class itself provides mitigation to the currency risk arising from the difference between the currency denomination of the Class and the USD. While we aim to fully hedge the currency risk for a hedged Class, you should note that it may not entirely eliminate currency risk. Also, as a result of hedging, a hedged Class will not be able to enjoy the full benefits of the currency movement in the event of a favourable movement of the currency denomination of the hedged Class against the USD. You should also note that hedging incurs costs, in which will impact the NAV of a hedged Class.
Fund manager's risk	As the Fund invests into a collective investment scheme managed by another manager, the Target Fund's manager has absolute discretion over the Target Fund's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Target Fund and/or the management company, the NAV of the Fund, which invests into the Target Fund would be affected negatively.
Country risk	As the Fund invests in the Target Fund which is domiciled in Luxembourg, the Fund's investments in the Target Fund may be affected by risks specific to Luxembourg. Such risks include adverse changes in Luxembourg's economic fundamentals, social and political stability, laws and regulations and foreign investments policies.

Specific risks related to the Target Fund

The specific risk related to the Target Fund includes but not limited to:

- Biotechnology, Communication and Technology Sectors risk
- Counterparty risk
- Equity risk
- Foreign Currency risk
- Growth Stocks risk
- Liquidity risk
- Market risk
- Smaller and Midsize Companies risk

For more details, please refer to "Risk Factors" section of the Information Memorandum. The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Fund and are not set out in any particular order of priority. You should be aware that an investment in a Wholesale Fund may be exposed to other risks from time to time. If in doubt, please consult your professional advisers for a better understanding of the risks.

Note: If your investments are made through the Distributor (i.e. the IUTA via a nominee system of ownership), you would not be deemed to be a Unit holder under the Deed and as a result, may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).
