Key Risks

General risks of investing in a unit trust fund	
Returns not guaranteed	Investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the fund's investment objective will be achieved.

General market environment risk	Refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that your investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager's risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund, e.g. investment decisions undertaken by the manager as a result of an incorrect view of the market may adversely affect the performance of the fund.
Loan financing risk	This risk occurs when you finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments.

Specific risks of the Fund	
Stock specific risk	Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
Country risk	Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the laws or regulations of the countries in which the Fund invests in. For example, deteriorating economic condition of such countries may adversely affect the Fund's NAV.
Currency risk	<p>There are 2 levels of currency risk associated with the investment of this Fund:</p> <p><u>Currency risk at the Fund's portfolio level</u></p> <p>As the investments of the Fund may be denominated in currencies other than base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.</p> <p><u>Currency risk at the Class level</u></p> <p>As this Fund is a multi-class fund, there are Classes denominated in currencies other than the base currency. The impact of the exchange rate movement between the base currency of the Fund and the denominated currency of the respective Classes may lead to a depreciation of the value of your holding as expressed in the base currency of the Fund.</p> <p>You should realise that currency risk is considered as one of the major risks due to the volatile nature of the foreign exchange market. We do not seek to mitigate the currency risk. Hence, you should be prepared to assume the currency risk.</p>
Fund manager's risk	As the Fund invests into a collective investment scheme managed by another manager, the target fund's manager has absolute discretion over the target fund's investment technique and knowledge, operational controls and management. In the event of mismanagement of the target fund and/or the management company, the NAV of the Fund, which invests into the target fund would be affected negatively.
Credit and default risk	Investments of the Fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. We aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.

Note: Please take note that if your investments are made through an IUTA via a nominee system of ownership, you would not be deemed to be a Unit holder under the Deed and as a result, may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).
