KEY RISKS

General risks of investing in a unit trust fund	
Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that your investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.

Manager's risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund, e.g. investment decisions undertaken by the manager as a result of an incorrect view of the market may adversely affect the performance of the fund.
Reclassification of Shariah status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the SAC of the SC, the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer.
Specific risks of the Fund	
Stock specific risk	Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
Country risk	Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the laws or regulations of the countries in which the Fund invests in. For example, deteriorating economic condition of such countries may adversely affect the Fund's NAV.
Currency risk	As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. Any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
Risk associated with investment in warrants and/or options	There are inherent risks associated with investments in warrants and/or options. The value of warrants and/or options are influenced by the current market price of the underlying securities, the exercise price of the contract, the time to expiration of the contract and the estimate of the future volatility of the underlying security's price over the life of the contract.
Credit and default risk	Credit risk relates to the creditworthiness of the securities issuers or counterparties and their expected ability to make timely payment of profit and/or principal. Default risk relates to the risk a securities issuer or counterparties either defaulting on payments or failing to make payments in a timely manner. If the risk materialize, the value of the Fund could be adversely affected.

Note: Please take note that if your investments are made through an IUTA via a nominee system of ownership, you would not be deemed to be a Unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).
