Fund Manager's Report

The Fund fell 1.88% in November 2019, outperforming the benchmark by 0.13%. Overweight in basic materials and underweight in utilities and healthcare contributed positively. Year-to-date (YTD), the fund has outperformed the Benchmark by 1.01%.

Going into 2020, we expect Malaysian economic growth to remain moderate due to external headwinds from the ongoing US-China trade tension. That said, this will be mitigated by more growth-oriented Budget 2020 (higher fiscal deficit, resumption of mega infrastructure projects) and accommodative monetary policy (further interest rate cut). While political and regulatory risks remain elevated, we do not believe that this will deteriorate further. Recent by-election loss of the ruling government will potentially be the catalyst for more market friendly policies going forward. We expect GLC reforms to take centre stage again following a slew of leadership changes in GLICs and GLCs since the general election in May 2018. Malaysia is also benefitting from trade diversion with the increase in FDIs flow, but the government would need to do more to restore business and consumer confidence in order to boost both domestic investment and consumption. On corporate earnings, we take comfort from the stabilization in consensus earnings expectation following earlier sharp cuts.

Despite moderate growth outlook, we upgrade Malaysia to OVERWEIGHT as we turn constructively more positive going into 2020. We believe earnings downside risk has narrowed significantly following recent cuts which is further supported by undemanding valuation now. As such, we take a barbell approach on high yield sectors like REITs, Telecommunication and utilities and increasing our exposure on cyclical growth sectors like plantation, oil and gas and the technology sectors.

*Based on the fund's portfolio returns as at 15 November 2019, the Volatility Factor (VF) for this fund is 8.180 and is classified as "Moderate" (source: Lipper). "Moderate" includes funds with VF that are above 6.455 but not more than 8.845. The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
