## Key Product Features

<b>Fund category/Type</b>	Feeder Fund / Growth.																											
<b>Base currency</b>	USD.																											
<b>Benchmark</b>	As this is a feeder fund, the Fund adheres to the benchmark of the Target Fund for performance comparison. The performance comparator of the Target Fund is the Bloomberg Commodity TR, which may be found on factsheet of the Target Fund and available on <a href="http://www.Schroders.com">www.Schroders.com</a> . <i>Note: Any changes to the Target Fund's benchmark will be updated in our website and/or this PHS.</i>																											
<b>Investment strategy</b>	<p>The Fund is a feeder fund that invests into a single CIS, i.e. Schroder Alternative Solutions Commodity Fund ("Target Fund"). The Fund may also invest in liquid assets for liquidity purposes.</p> <p>In order to achieve its objective, the Fund will invest at least 85% of its NAV in the Target Fund; a fund established on 31 October 2005 under Schroder Alternative Solutions, a Société à Capital Variable ("SICAV") domiciled in Luxembourg. The Fund may also invest up to 15% of its NAV in liquid assets for liquidity purposes and derivative for the sole purpose of hedging arrangement.</p> <p>The Fund will be actively rebalanced from time to time to meet sales and withdrawal transactions. This is to enable a proper and efficient management of the Fund. As this is a feeder fund, we do not intend to take temporary defensive position for the Fund during adverse market, economic and/or any other conditions. This is to allow the Fund to mirror the performance of the Target Fund in either bullish or bearish market conditions. However, the Target Fund Investment Manager may take temporary defensive position when deemed necessary.</p> <p>Currently, the Fund invests in A Shares of the Target Fund, which is denominated in USD. The Fund may change its entire investment into another class of the Target Fund (which must be denominated in the same currency) if we are of the opinion that the change is in the interest of the Unit holders. If we wish to effect such change, we will seek concurrence from the Trustee and you will be notified before implementation.</p> <p><b>Information on the Target Fund</b></p> <table border="1"> <tr> <td>Target Fund</td> <td>:</td> <td colspan="2">Schroder Alternative Solutions Commodity Fund</td> </tr> <tr> <td>Share class</td> <td>:</td> <td colspan="2">Class A Shares</td> </tr> <tr> <td>Currency Denomination</td> <td>:</td> <td colspan="2">USD</td> </tr> <tr> <td>Target Fund Management Company</td> <td>:</td> <td colspan="2">Schroder Investment Management (Europe) S.A.</td> </tr> <tr> <td>Target Fund Investment Manager</td> <td>:</td> <td colspan="2">Schroder Investment Management Limited.</td> </tr> <tr> <td>Regulatory authority</td> <td>:</td> <td colspan="2">Commission de Surveillance du Secteur Financier</td> </tr> </table>				Target Fund	:	Schroder Alternative Solutions Commodity Fund		Share class	:	Class A Shares		Currency Denomination	:	USD		Target Fund Management Company	:	Schroder Investment Management (Europe) S.A. ## Key Risks

<b>General risks of investing in a fund</b>	
<b>Returns and capital not guaranteed</b>	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment which includes your investment capital and returns, nor any assurance that the fund's objective will be achieved. You should also note that the fund is neither a capital guaranteed fund nor a capital protected fund. However, we reduce this risk by ensuring diligent management of the assets of the fund based on a structured investment process.
<b>Market risk</b>	This risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
<b>Inflation risk</b>	This is the risk that your investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
<b>Financing risk</b>	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments. In the event units are used as collateral and if the prices of units fall below a certain level due to market conditions, you may be required to pay additional amount on top of your existing instalment. If you fail to do so within the time prescribed, your units may be sold at an unfavourable price and the proceeds thereof will be used towards the settlement of your financing.
<b>Manager risk</b>	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
<b>Liquidity risk</b>	Liquidity risk refers to the ability to sell and convert the units held in the CIS into cash. This may be affected by the liquidity policy applied by the CIS (e.g. suspension during exceptional situations), which may negatively impact the Fund and unit holders may experience delay in the withdrawal process.
<b>Specific risks related to the Fund</b>	
<b>Currency risk</b>	<p>You should be aware that the currency risk is applicable to Class(es) which is denominated in a different currency other than the base currency of the Fund. The impact of the exchange rate movement between the base currency of the Fund and the currency denomination of the respective Class(es) may result in a depreciation of the value of your holdings as expressed in the currency denomination of the respective Class(es).</p> <p>As for a hedged Class, the Class itself provides mitigation to the currency risk arising from the difference between the currency denomination of the Class and the base currency of the Fund. While we aim to fully hedge the currency risk for a hedged Class, you should note that it may not entirely eliminate currency risk. In addition, you should note that, as a result of hedging, a hedged Class will not be able to enjoy the full benefits of the currency movement in the event of a favourable movement of the currency denomination of the hedged Class against the base currency of the Fund. You should also note that hedging incurs costs, in which will impact the NAV of a hedged Class.</p>
<b>Target Fund manager's risk</b>	Since the Fund invests into a CIS that is managed by another manager, the Target Fund Investment Manager has absolute discretion over the Target Fund's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Target Fund, the NAV of the Fund, which invests into the Target Fund, would be affected negatively. Although the probability of such occurrence is minute, should the situation arise, we reserve the right to seek for an alternative CIS that is consistent with the objective of the Fund, subject to your approval.
<b>Country risk</b>	As the Fund invests in the Target Fund, which is domiciled in Luxembourg, the Fund's investments in the Target Fund may be affected by risks specific to Luxembourg. Such risks include adverse changes in Luxembourg's economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may have an adverse impact on the price of the Target Fund and consequently the Fund.
<b>Specific risks related to the Target Fund</b>	
The specific risk related to the Target Fund includes but not limited to:	

- General risk
- Investment objective risk
- Regulatory risk
- Business, legal and tax risks
- Risk factors relating to industry sectors / geographic areas
- Risk of suspension of share dealings
- Interest rate risk
- Credit risk
- Liquidity risk
- Inflation / deflation risk

For more details and complete list of applicable risk to the Target Fund, please refer to “Risk Factors” section of the Information Memorandum.

*The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Fund and are not set out in any particular order of priority. You should be aware that an investment in the Fund may be exposed to other risks from time to time. Please consult professional advisers for a better understanding of the risks.*

**Note:** Please take note that if your investments are made through an IUTA via a nominee system of ownership, you would not be deemed to be a Unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders’ meetings and the right to vote at a Unit holders’ meeting).
