MANAGER'S REPORT

FUND OBJECTIVE AND POLICY

What is the investment objective of the Fund?

The Fund aims to achieve capital appreciation and income through investments in a portfolio of primarily debt instruments in the Asian region.

Has the Fund achieved its objective?

The Fund is in line with its stated objectives to achieve capital appreciation and income through investments in a portfolio of primarily debt instruments in the Asian region.

What are the Fund investment policy and principal investment strategy?

The Fund will be managed with the aim of achieving capital appreciation and income through investments in a portfolio of primarily debt instruments in the Asian region. The Fund will invest between 70% to 98% of its Net Asset Value ("NAV") in debt instruments. The Fund's investment in debt instruments will generally be restricted to securities rated at least a minimum credit rating of "BBB-" by Standard & Poor's ("S&P") or its equivalent rating by other international rating agencies and/or at least "A3" by RAM Rating Services Bhd ("RAM") or equivalent rating by Malaysian Rating Corporation Bhd ("MARC") or by local rating agency(ies) of the country ("Investment Grade debt instruments"). Nonetheless, up to 40% of the Fund's NAV may be invested in non-investment grade and/or unrated debt instruments. In addition, the Fund may invest up to 28% of its NAV in money market instruments and/or deposits to provide stability to the Fund.

The Fund may also invest up to 20% of its NAV in convertible bonds and/or structured products such as negotiable instruments of deposit and credit-linked notes ("CLN") for added return. Similar to debt instruments investments, CLNs are income focused investments that carry credit risk, which is based on both the issuer and its reference entity(ies). As such, the Manager will invest in a CLN based on the ability of the referenced entity's ability to meet its financial obligation throughout the life of the CLN. The Manager are also mindful that CLNs are less liquid compared to debt instruments investments. In the event of a credit downgrade on the issuer of structured product, the Manager reserve the right to deal with the structured product in the best interest of the Unit holders, subject to prevailing Securities Commission Malaysia ("SC") Guidelines. Investors should also note that convertible bonds have expiry date and hence, its' erosion of value may accelerate as it advances to its expiry date. The Fund may also opt to seek investment exposure via collective investment scheme that is in line with the Fund's objective, subject to the requirements of the Guidelines on Unit Trust Funds ("GUTF") issued by the Securities Commission Malaysia ("SC"). The Fund will also invest in liquid assets for liquidity purposes.

The asset allocation strategy for the Fund is as follows:

- Between 70% to 98% (both inclusive) of the Fund's NAV will be invested in debt instruments, out of which:
 - up to 98% of the Fund's NAV may be invested in Investment Grade debt instruments;
 - up to 40% of the Fund's NAV may be invested in unrated and/or non-investment grade debt instruments;
 - up to 20% of the Fund's NAV may be invested in convertible bonds and/or structured products;
- Up to 28% of the Fund's NAV may be invested in money market instruments and/or Deposits; and
- At least 2% of the Fund's NAV will be invested in liquid assets for liquidity purpose.

The Fund will focus its investment in the Asian region, i.e. issuers that are domiciled in, listed in, and/or have operations or businesses that focus in the Asian region. The Fund may invest up to 10% of its NAV outside of the Asian region. The Fund's investments will also be limited to Eligible Markets. Where necessary, we will obtain the license or permits for investments in countries that require license or permits. In the event that we are unable to obtain the necessary licenses or permits, or the licenses or permits are revoked or not renewed (as the case may be), we will seek to invest in other accessible markets.

MARKET REVIEW (1 APRIL 2023 TO 30 SEPTEMBER 2023)

The second quarter of the year was mired by US debt ceiling debacle and consistently higher and sticky inflation data which saw European Central Bank ("ECB") and Bank of England ("BOE") remain hawkish. The US Federal Reserve (the "Fed") paused the hiking cycle in June 2023 but the rhetoric remain hawkish hence weakening sentiment for the global fixed income market. This was further exacerbated with the deteriorating Chinese property outlook and waning China reopening story. In June 2023, the Fed unanimously kept its policy rate unchanged in the range of 5.00% to 5.25% after 10 straight meetings of hiking. The Fed Chair Jerome Powell said that effects of Fed tightening have yet to be felt and that nearly all Fed participants see further rate hikes as appropriate because the process of getting inflation to 2% has a long way to go. Meanwhile, the debt ceiling debacle as well as the hawkish comments from BOE and ECB amidst still high inflation data saw yields stay elevated.

In July 2023, Federal Open Market Committee ("FOMC") voted unanimously to raise the federal funds target range by 25 basis points ("bps") to 5.25% to 5.50%. In the press conference, the Fed Chair Jerome Powell emphasized that the FOMC would take a data dependent approach to the possibility of additional rate hikes. Meanwhile, Fitch Ratings has downgraded the United States of America's Long-Term Foreign-Currency Issuer Default Rating to 'AA+' from 'AAA'. The Rating Watch Negative was removed, and a Stable Outlook assigned. The rating downgrade of the US reflects the expected fiscal deterioration over the next three years, a high and growing general government debt burden, and the erosion of governance relative to 'AA' and 'AAA' rated peers over the last two decades that has manifested in repeated debt limit standoffs and last-minute resolutions.

MARKET REVIEW (1 APRIL 2023 TO 30 SEPTEMBER 2023) (CONTINUED)

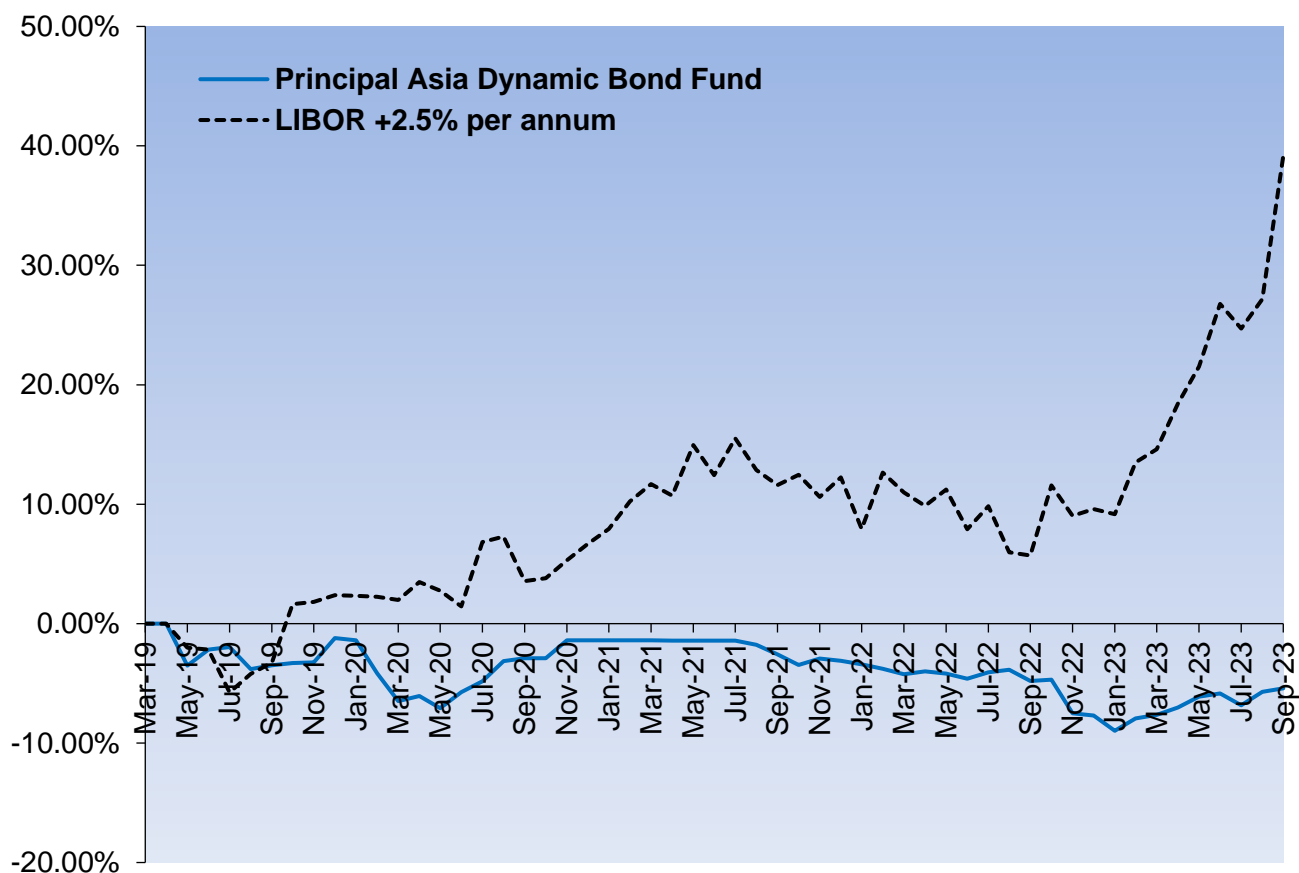

On 28 July 2023, Bank of Japan (“BOJ”) surprised by tweaking its Yield Curve Control (“YCC”) framework. It will allow greater flexibility around its 10-year Japanese Government Bond (“JGB”) target of 0% +/-50bps. The Bank decided to raise the rate of everyday fixed-rate purchase operation from 0.5% to 1.0% while leaving key variables unchanged. It remains dovish on the inflation outlook and continues with its guidance that it will not hesitate to ease further if needed. At the end of the third quarter 2023, Fed, BOE and BOJ all held their policy rates unchanged while ECB raised its policy rate by 25 bps in September 2023 and signalled that rates are now at sufficiently restrictive levels.

NAV (USD Million)	1.73	1.67	3.59
NAV/Unit (USD)	0.2015	0.2092	(3.68)

The Fund's NAV increased for the six-month period ending September 2023 due to injections into the fund. However, the NAV per unit dropped by 3.68% partially due to impact from the higher yields.

Performance data represents the combined income and capital return as a result of holding units in the Fund for the specified length of time, based on NAV to NAV price. The performance data assumes that all earnings from the Fund are reinvested and are net of management and trustee fees. Past performance is not reflective of future performance and income distributions are not guaranteed. Unit prices and income distributions, if any, may fall and rise. MARKET OUTLOOK*

We remain positive on the local bond market as we believe the tightening trend on domestic monetary policy has reached its peak and the MYR bond has been resilient in the face of higher global rates. However, the current still sticky global inflation and still hawkish comments from G3 global central banks will continue to weigh down the global market sentiment as hope of rate cut dissipates. The higher for longer views have gained momentum and market seems to have reduce expectations of recession further into the horizon. Meanwhile, global credit markets have seen credit spread tightening and somewhat resilient in the face of higher government yields and may provide a relatively more attractive space for market participants.

* This market outlook does not constitute an offer, invitation, commitment, advice or recommendation to make a purchase of any investment. The information given in this article represents the views of Principal Asset Management Berhad ("Principal Malaysia") or based on data obtained from sources believed to be reliable by Principal Malaysia. Whilst every care has been taken in preparing this, Principal Malaysia makes no guarantee, representation or warranty and is under no circumstances liable for any loss or damage caused by reliance on, any opinion, advice or statement made in this market outlook.

INVESTMENT STRATEGY

With the current more volatile global fixed income market oscillating between hawkish central bankers' comments, geopolitical tensions, tepid China re-opening sentiment and higher than expected supply on the back of higher fiscal needs especially in US will provide opportunities to invest in higher yields and we look to focus on highly rated corporate bonds especially on primary issues.

SOFT COMMISSIONS AND REBATES

Principal Malaysia (the “Manager”) and the Trustee will not retain any form of rebate from, or otherwise share in any commission with, any broker or dealer in consideration for directing dealings in the investments of the Principal Malaysia Funds (“Funds”). Accordingly, any rebate or shared commission will be directed to the account of the Fund. The Manager may retain goods and services (soft commission) provided by any broker or dealer if the following conditions are met:

- (a) the soft commission brings direct benefit or advantage to the management of the Fund and may include research and advisory related services;
- (b) any dealings with the broker or dealer is executed on terms which are the most favourable for the Fund; and
- (c) the availability of soft commission is not the sole or primary purpose to perform or arrange transactions with such broker or dealer, and we and the fund the manager will not enter into unnecessary trades in order to achieve a sufficient volume of transactions to qualify for soft commission.

During the financial period under review, the Manager and Trustee did not receive any rebates from the brokers or dealers but the Manager has retained soft commission in the form of goods and services for the benefit of the fund such as financial wire services and stock quotations system incidental to investment management of the Funds and there was no churning of trades.

SECURITIES FINANCING TRANSACTIONS

The Fund has not undertaken any securities lending or repurchase transactions during the financial period under review.

STATE OF AFFAIR OF THE FUND

In relation to this Fund, we have issued the Replacement Prospectus dated 10 July 2023. We are of view that the changes above do not affect the existing unit holder to stay invested in the Fund and it is not a significant change. Unit holders may refer to Appendix 1 for the detailed list of changes.

There were no significant changes in the state of affairs of the Fund during the period up to the date of Manager’s report, not otherwise disclosed in the financial statements.

CIRCUMSTANCES THAT MATERIALLY AFFECT ANY INTEREST OF UNIT HOLDERS

There were no circumstances that had materially affected the interest of the unit holders during the financial period under review.

CROSS TRADE

No cross-trade transactions have been carried out during the financial period under review.

UNIT SPLIT

No unit split exercise has been carried out during the financial period under review.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE SIX MONTHS FINANCIAL PERIOD ENDED 30 SEPTEMBER 2023**

1. THE FUND, THE MANAGER AND ITS PRINCIPAL ACTIVITIES

Principal Asia Dynamic Bond Fund (the “Fund”) was constituted pursuant to a Deed dated 29 May 2017, a first supplemental Deed dated 7 November 2019 and Second Supplemental Deed dated 10 January 2023 (collectively referred to as the “Deeds”) between Principal Asset Management Berhad (the “Manager”) and HSBC (Malaysia) Trustee Berhad (the “Trustee”).

The Fund will be managed with the aim of achieving capital appreciation and income through investments in a portfolio of primarily debt instruments in the Asian region. The Fund will invest between 70% to 98% of its NAV in debt instruments. The Fund’s investment in debt instruments will generally be restricted to securities rated at least a minimum credit rating of “BBB-” by S&P or its equivalent rating by other international rating agencies and/or at least “A3” by RAM or equivalent rating by MARC or by local rating agency(ies) of the country (“Investment Grade debt instruments”). Nonetheless, up to 40% of the Fund’s NAV may be invested in non-investment grade and/or unrated debt instruments. In addition, the Fund may invest up to 28% of its NAV in money market instruments and/or Deposits to provide stability to the Fund.

The Fund may also invest up to 20% of its NAV in convertible bonds and/or structured products such as negotiable instruments of deposit and CLN for added return. Similar to debt instruments investments, CLNs are income focused investments that carry credit risk, which is based on both the issuer and its reference entity(ies). As such, the Manager will invest in a CLN based on the ability of the referenced entity’s ability to meet its financial obligation throughout the life of the CLN. The Manager are also mindful that CLNs are less liquid compared to debt instruments investments. In the event of a credit downgrade on the issuer of structured product, the Manager reserve the right to deal with the structured product in the best interest of the Unit holders, subject to prevailing SC Guidelines. Investors should also note that convertible bonds have expiry date and hence, its’ erosion of value may accelerate as it advances to its expiry date. The Fund may also opt to seek investment exposure via collective investment scheme that is in line with the Fund’s objective, subject to the requirements of the GUTF Guidelines. The Fund will also invest in liquid assets for liquidity purposes.

The asset allocation strategy for the Fund is as follows:

- Between 70% to 98% (both inclusive) of the Fund’s NAV will be invested in debt instruments, out of which:
 - up to 98% of the Fund’s NAV may be invested in Investment Grade debt instruments;
 - up to 40% of the Fund’s NAV may be invested in unrated and/or non-investment grade debt instruments;
 - up to 20% of the Fund’s NAV may be invested in convertible bonds and/or structured products;
- Up to 28% of the Fund’s NAV may be invested in money market instruments and/or Deposits; and
- At least 2% of the Fund’s NAV will be invested in liquid assets for liquidity purpose.

The Fund will focus its investment in the Asian region, i.e. issuers that are domiciled in, listed in, and/or have operations or businesses that focus in the Asian region. The Fund may invest up to 10% of its NAV outside of the Asian region. The Fund’s investments will also be limited to Eligible Markets. Where necessary, we will obtain the license or permits for investments in countries that require license or permits. In the event that we are unable to obtain the necessary licenses or permits, or the licenses or permits are revoked or not renewed (as the case may be), we will seek to invest in other accessible markets.

All investments are subject to the GUTF, SC requirements, the Deeds, except where exemptions or variations have been approved by the SC, internal policies and procedures and the Fund’s objective.

1. THE FUND, THE MANAGER AND ITS PRINCIPAL ACTIVITIES (CONTINUED)

The Fund had issued the Replacement Prospectus dated 10 July 2023.

The Manager, is a joint venture between Principal Financial Group®, a member of the FORTUNE 500® and a Nasdaq-listed global financial services and CIMB Group Holdings Berhad, one of Southeast Asia's leading universal banking groups. The principal activities of the Manager are the establishment and management of unit trust funds and fund management activities.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements:

(a) Basis of preparation

The financial statements have been prepared in accordance with the provisions of the MFRS as issued by the Malaysian Accounting Standards Board ("MASB") and International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

The financial statements have been prepared under the historical cost convention, as modified by financial assets at fair value through profit or loss.

The preparation of financial statements in conformity with MFRS and IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported period.

It also requires the Manager to exercise their judgement in the process of applying the Fund's accounting policies. Although these estimates and assumptions are based on the Manager's best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 2(i).

There are no other standards, amendments to standards or interpretations that are effective for financial periods beginning on 1 April 2023 that have a material effect on the financial statements of the Fund.

None of the standards, amendments to standards or interpretations that are effective for the financial period beginning on/after 1 October 2023 are applicable to the Fund.

(b) Financial assets and financial liabilities

Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those to be measured at amortised cost.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(b) Financial assets and financial liabilities (continued)

Classification (continued)

The Fund classifies its investments based on both the Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions.

The contractual cash flows of the Fund's debt securities are solely principal and interest ("SPPI"). However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

Investment in collective investment schemes have debt instrument with contractual cash flow that do not represent SPPI and therefore are classified as fair value through profit or loss.

The Fund classifies cash and cash equivalents, amount due from Manager and dividend receivable as financial assets at amortised cost as these financial assets are held to collect contractual cash flows consisting of the amount outstanding.

All of the Fund's financial liabilities are measured at amortised cost.

Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date, the date on which the Fund commits to purchase or sell the asset. Investments are initially recognised at fair value. Transaction costs are expensed in the statement of comprehensive income.

Financial instruments are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Unrealised gains or losses arising from changes in the fair value of the financial assets at fair value through profit or loss are presented in the statement of comprehensive income within net gain or loss on financial assets at fair value through profit or loss in the financial period which they arise.

Dividend income from financial assets at fair value through profit or loss is recognised in the statement of comprehensive income as part of gross dividend income when the Fund's right to receive payments is established.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**(b) Financial assets and financial liabilities (continued)**Recognition and measurement (continued)

Foreign collective investment scheme is valued based on the most recent published NAV per unit or share of such collective investment scheme or, if unavailable, on the last published price of such unit or share (excluding any sales charge included in such selling price).

Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective interest method.

Impairment for assets carried at amortised costs

The Fund measures credit risk and expected credit loss (“ECL”) using probability of default, exposure at default and loss given default. The Manager consider both historical analysis and forward looking information in determining any ECL. The Manager consider the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12 month ECL as any such impairment would be wholly insignificant to the Fund.

Significant increase in credit risk

A significant increase in credit risk is defined by the Manager as any contractual payment which is more than 30 days past due.

Definition of default and credit-impaired financial assets

Any contractual payment which is more than 90 days past due is considered credit impaired.

Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor’s sources of income or assets to generate sufficient future cash flows to repay the amount. The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in impairment gains. There are no write-offs/recoveries during the financial period.

(c) Income recognition

Dividend income is recognised on the ex-dividend date when the right to receive payment is established.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

Realised gain or loss on disposal of collective investment schemes is accounted for as the difference between the net disposal proceeds and the carrying amount of collective investment schemes, determined on a weighted average cost basis.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(d) Foreign currency

Functional and presentation currency

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the “functional currency”). The financial statements are presented in USD, which is the Fund’s functional and presentation currency.

Due to mixed factors in determining the functional currency of the Fund, the Manager has used its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions and have determined the functional currency to be in USD primarily due to the following factors:

- i) The Fund’s investments are denominated in USD;
- ii) Significant portion of the cash is denominated in USD for the purpose of making settlement of the foreign trades; and
- iii) Significant portion of the Fund’s expenses are denominated in USD.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

(e) Cash and cash equivalents

For the purpose of statement of cash flows, cash and cash equivalents comprise bank balances which are subject to an insignificant risk of changes in value.

(f) Taxation

Current tax expense is determined according to Malaysian tax laws at the current rate based upon the taxable profit earned during the financial period.

(g) Realised and unrealised portions of profit or loss after tax

The analysis of realised and unrealised portions of profit or loss after tax as presented on the statement of comprehensive income is prepared in accordance with SC GUTF.

(e) Unit holder’s contribution

The Fund is established with a multi-class structure where the Deed allows for establishment of more than one Class with similar interests in the assets of the Fund. However, during the financial period and as the end of the financial period, only one class (Class MYR) is offered for sale.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**(h) Unit holder's contribution (contribute)**

Hence, the unit holders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "*Financial Instruments: Presentation*". Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's NAV;
- the units are the most subordinated class and class features are identical;
- there is no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

The outstanding units are carried at the redemption amount that is payable at each financial period if unit holder exercises the right to put the unit back to the Fund.

Units are created and cancelled at prices based on the Fund's NAV per unit at the time of creation or cancellation. The Fund's NAV per unit is calculated by dividing the net assets attributable to unit holders with the total number of outstanding units.

(i) Critical accounting estimates and judgements in applying accounting policies

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Funds' results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgement are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the SC Guidelines on Unit Trust Funds.

However, the Manager is of the opinion that in applying this accounting policy, no significant judgement was required.

3. RISK MANAGEMENT OBJECTIVES AND POLICIES

The Fund aims to achieve capital appreciation and income through investments in a portfolio of primarily debt instruments in the Asian region.

The Fund is exposed to a variety of risks which include market risk (inclusive of price risk and currency risk), credit risk and liquidity risk.

Financial risk management is carried out through internal control process adopted by the Manager and adherence to the investment restrictions as stipulated in the Deeds and SC GUTF.

3. RISK MANAGEMENT OBJECTIVES AND POLICIES

(a) Market risk

(i) Price risk

This is the risk that the fair value of an investment in collective investment schemes will fluctuate because of changes in market prices (other than those arising from currency risk). The value of collective investment schemes may fluctuate according to the activities of individual companies, sector and overall political and economic conditions. Such fluctuation may cause the Fund's NAV and prices of units to fall as well as rise, and income produced by the Fund may also fluctuate.

The price risk is managed through diversification and selection of collective investment schemes and other financial instruments within specified limits according to the Deeds.

(ii) Currency risk

Currency risk is associated with investments that are quoted and/or priced in foreign currency denomination. Foreign currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Manager will evaluate the likely directions of a foreign currency versus USD based on considerations of economic fundamentals such as interest rate differentials, balance of payments position, debt levels, and technical chart considerations.

(b) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligation resulting in financial loss to the Fund.

(c) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations.

The Manager manages this risk by maintaining sufficient level of liquid assets to meet anticipated payments and cancellations of the units by unit holders. Liquid assets comprise bank balances and other instruments, which are capable of being converted into cash within 7 business days. The Fund's investments in collective investment scheme are realisable which are capable of being converted into cash within 10 business days. This is expected to reduce the risks for the entire portfolio without limiting the Fund's growth potentials.

(d) Capital risk management

The capital of the Fund is represented by net assets attributable to unit holders. The amount of capital can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unit holders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns to unit holders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

3. RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(e) Fair value estimation

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

The fair value of financial assets traded in active markets (such as trading securities) are based on quoted market prices at the close of trading on the financial period end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

(i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Investments whose values are based on quoted market prices in active markets and are therefore classified within Level 1, include active listed collective investment schemes. The Fund does not adjust the quoted prices for these instruments. The Fund's policies on valuation of these financial assets are stated in Note 2(b).

- (ii) The carrying values of cash and cash equivalents, amount due from Manager, dividend receivable and all liabilities are a reasonable approximation of their fair values due to their short term nature.

4. MANAGEMENT FEE, AUDIT FEE, AND TAX AGENT'S FEE

In accordance with the Deeds, the Manager is entitled to a maximum management fee of 3.00% per annum for Class MYR, calculated daily based on the NAV of the Fund.

For the six months financial period ended 30 September 2023, the management fee was recognised at a rate of 1.00% per annum.

For the six months financial period ended 30 September 2022, the audit fee and tax agent's fee are borne by the Manager.

There was no further liability to the Manager in respect of management fee, audit fee and tax agent's fee other than the amount recognised above.

5. TRUSTEE AND CUSTODIAN FEES

In accordance with the Deeds, the Trustee is entitled to a maximum fee of 0.05% per annum, calculated daily based on the NAV of the Fund. The Trustee fee includes local custodian fee but excludes the foreign sub-custodian fee and charges (if any). The foreign sub-custodian fee and charges is dependent on the country invested and is charged monthly in arrears.

For the financial period from 1 April 2023 until 31 July 2023 the Trustee fee is recognised at the rate of 0.05%. Effective 1 August 2023, Trustee fee is recognised at the rate of 0.03% per annum (30.09.2022: 0.05% per annum).

There was no further liability to the Trustee and custodian in respect of Trustee and custodian fees other than the amount recognised above.

The framework outlines the responsibilities to assess and monitor liquidity risk of the Fund, and to ensure appropriate measures are taken to mitigate the risk. The liquidity risk management framework that we have put in place is as follows:</p> <ul style="list-style-type: none"> ▪ Regular review by the designated fund manager on the Fund’s investment portfolio to maintain its liquidity level. ▪ Periodic assessments are carried out on the Fund’s liquidity profile (under both normal and stress market conditions) and on the concentration of unitholders. These assessments allow the Fund to be proactively managed to mitigate liquidity concerns that may arise in the ordinary course of portfolio management as well as in relation to the Fund’s ability to meet unitholders’ withdrawal requests.

The Fund may opt to invest in foreign equities up to a maximum of 30% of its NAV. Such foreign equities may be securities of companies domiciled in, listed in, and/or have significant operations in Asia ex Japan. ‘Significant operations’ means major businesses of the company. For example, the Fund can invest in a company with significant business/operations in Thailand but listed on the New York Stock Exchange. The threshold for ‘significant operations’ would be if more than 25% of total group revenue derives from countries in Asia ex Japan. The calculation would be based on the most recent financial reports released by the companies (e.g. interim and annual reports). Notwithstanding, up to 20% of the Fund’s investment in foreign equities may be from companies that are listed globally with some operations or businesses within the Asia ex Japan region to capture growth opportunities with effect from 16 August 2021. In line with its objective, the investment policy and strategy of the Fund will be to invest primarily in equities, with a bias towards growth stocks that have the potential to deliver long-term capital appreciation and to a lesser extent focus on dividend yielding stocks that provides income. The Fund may opt to seek investment exposure via CIS that is in line with the Fund’s objective, subject to the requirement of the GUTF. To a lesser extent, the Fund invests in liquid assets primarily for the purpose of cash management.</p> <p>2nd Paragraph We have appointed Principal Singapore as the Investment Adviser of the Fund. The global exposure of the Funds is calculated based on the following:

Commitment approach

The global exposure of the Funds to derivatives is calculated as the sum of the:

- absolute value of the exposure of each individual derivative not involved in netting or hedging arrangements;
- absolute value of the net exposure of each individual derivative after netting or hedging arrangement; and
- the values of cash collateral received pursuant to:
 - (i) the reduction of exposure to counterparties of OTC derivatives; and
 - (ii) efficient portfolio management techniques relating to securities lending and repurchase transactions (if applicable).

Netting arrangements

Netting arrangements may be taken into account to reduce the Fund's exposure to derivatives.

The Fund may net positions between:

- (a) derivatives on the same underlying constituents, even if the maturity dates are different; or
- (b) derivatives and the same corresponding underlying constituents, if those underlying constituents are transferable securities, money market instruments, or units or shares in collective investment schemes.

Hedging arrangements

Hedging arrangements may be taken into account to reduce the Fund's exposure to derivatives.

The marked-to-market value of transferable securities, money market instruments, or units or shares in collective investment schemes involved in hedging arrangements may be taken into account to reduce the exposure of the Fund to derivatives.

List of Amendment
Replacement Master Prospectus (Conventional Funds)

The hedging arrangement must:

- (a) not be aimed at generating a return;
- (b) result in an overall verifiable reduction of the risk of the Funds;
- (c) offset the general and specific risks linked to the underlying constituent being hedged;
- (d) relate to the same asset class being hedged; and
- (e) be able to meet its hedging objective in all market conditions.

Note: The above restrictions and limits do not apply to securities or instruments issued or guaranteed by the Malaysian government or BNM.

Note 1:

KLF is subject to the following investment restriction/limits:

The value of the Fund's investment in ordinary shares issued by any single issuer is allowed to invest according to the weightings of the component stocks in the FTSE Bursa Malaysia KLCI. In addition, up to 5% above the weightings is permitted for investments in securities related to the component stocks of the FTSE Bursa Malaysia KLCI. Please refer to "Approvals and Conditions" section on page Error! Bookmark not defined. for further information.

Note 2:

Not applicable for LI-BO and LI-EIB. Instead, the following apply:

- (17) the value of the Fund's investments in debt securities and money market instruments issued by any single issuer must not exceed 20% of the Fund's NAV ("single issuer limit"). In determining the single issuer limit, the value of the fund's investments in instruments in (1) by the same issuer must be included in the calculation.
- (18) The single issuer limit in (17) may be increased to 30% if the debt security is rated by any Malaysian or global rating agency to have the highest long-term credit rating.
- (19) Where the single issuer limit is increased to 30% pursuant to (18), the single issuer aggregate limit of 25% in (5) may be raised to 30% of the fund's NAV.
- (20) The value of the Fund's investments in debt securities and money market instruments issued by any group of companies must not exceed 30% of the Fund's NAV. In determining the group limit, the value of the fund's investments in instruments in (1) issued by the issuers within the same group of companies must be included in the calculation.
- (21) Where the debt security or money market instruments are issued, or the issue is guaranteed by, either a foreign government, foreign government agency, foreign central bank or supranational, that has a minimum long-term credit rating of investment grade (including gradation and subcategories) by an international rating agency, the fund manager may apply the limits in paragraphs (10) and (11).

In respect of the above investment restrictions and limits, the GUTF provides that any breach of the restrictions and limits due to appreciation or depreciation in value of the Fund's investments, repurchase of units or payment made out of the Fund, or change in capital of a corporation in which the Fund has invested in, or downgrade in or cessation of a credit rating need not be reported to the SC but we must rectify as soon as practicable within three (3) months from the date of breach unless stated otherwise in the GUTF. However, the three-month period may be extended if it is in the best interest of Unit holders and Trustee's consent is obtained. Such extension must be subject to at least a monthly review by the trustee.
