Fund Manager's Report

The Fund was up 4.51% in USD terms in February, outperforming the benchmark by 390 bps. YTD, the Fund is up 2.67%, outperforming the benchmark by 140 bps.

The MSCI AC Asia Pacific ex Japan Index advanced by 4.3% in USD terms in February. There seemed to be some signs of recovery in China where the total social financing grew at 9.5%YoY in January and initial spending data for the festive period looked encouraging. In response to the weak economy, the government continued to roll out new policies such as cutting the five-year loan prime rate by 25bps and promote equipment renewals and trade-ins of consumer goods. We retain our view that China growth outlook hinges critically on government policies, which may need to be more aggressive. The Two Sessions meeting in March may give a glimpse regarding the outlook of China in 2024. Recent inflation numbers in the US pointed to a hotter economy than expected and the US economy added 353,000 non-farm jobs in January. All these mean that rate cuts happening in 2Q24 seem a stretch. The market has priced in about 75bps cut in interest rates in 2024. In Asia, there are growth drivers such as recovery in the semiconductor industry, India's strong economic growth and capex cycle, lower interest rates, all of which is likely to lead to better earnings growth in Asia in the next 12 months. In South Korea, the government's efforts to promote shareholder returns known as 'Corporate Value-up Program' akin to what happened in Japan could result in a re-rating in the stock market in the longer run. We will continue to position the portfolio in areas where they are likely to print strong earnings growth such as the semiconductor industry, beneficiaries of AI spend, lower interest rate, or rising capex as well as India. We will also be selective in our investments in China, focusing on those companies who have shown signs of turnaround. Risks would be (1) Inflation may prove more sticky than expected, (2) continued weak business and consumer sentiment in China, (3) rising geopolitical risks.

[^]Based on the fund's portfolio returns as at 15 February 2024, the Volatility Factor (VF) for this fund is 9.52 and is classified as "Moderate" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The Manager of the Principal Asia Pacific Dynamic Income Fund (formerly known as CIMB-Principal Asia Pacific Dynamic Income Fund) is Principal Asset Management Berhad. The Manager has appointed Principal Asset Management (S) Pte. Ltd. (formerly known as CIMB-Principal Asset Management (S) Pte. Ltd.)
