Key Risks

General risks of investing in a unit trust fund	
Returns and capital not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment which includes your investment capital and returns, nor any assurance that the fund's objective will be achieved. You should also note that the fund is neither a capital guaranteed fund nor a capital protected fund. However, we reduce this risk by ensuring diligent management of the assets of the fund based on a structured investment process.
Market risk	This risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.

Inflation risk	This is the risk that your investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments. In the event units are used as collateral and if the prices of units fall below a certain level due to market conditions, you may be required to pay an additional amount on top of your existing instalment. If you fail to do so within the time prescribed, your units may be sold at an unfavourable price and the proceeds thereof will be used towards the settlement of your financing.
Liquidity risk	Liquidity risk refers to the ability to sell and convert the units held in the CIS into cash. This may be affected by the liquidity policy applied by the CIS (e.g. suspension during exceptional circumstances), which may negatively impact the Fund and Unit holders may experience delay in the withdrawal process.

Specific risks related to the Fund

Target Fund manager risk	Since the Fund invests into a CIS that is managed by another manager, the Target Fund Investment Manager has absolute discretion over the Target Fund's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Target Fund, the NAV of the Fund, which invests into the Target Fund, would be affected negatively. Although the probability of such occurrence is minute, should the situation arise, we reserve the right to seek for an alternative CIS that is consistent with the objective of the Fund, subject to your approval.
Country risk	As the Fund invests in the Target Fund, which is domiciled in Luxembourg, the Fund's investments in the Target Fund may be affected by risks specific to Luxembourg. Such risks include adverse changes in Luxembourg's economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may have an adverse impact on the price of the Target Fund and consequently the Fund.
Currency risk	You should be aware that currency risk is applicable to Class(es) which is denominated in a different currency than the base currency of the Fund. The impact of the exchange rate movement between the base currency of the Fund and the currency denomination of the respective Class(es) may result in a depreciation of the value of your holdings as expressed in the currency denomination of the respective Class(es). As for a hedged Class, the hedged Class itself provides mitigation to the currency risk arising from the difference between the currency denomination of the Class and the base currency of the Fund. While we aim to fully hedge the currency risk for a hedged Class, you should note that it may not entirely eliminate currency risk. In addition, you should note that, as a result of hedging, a hedged Class will not be able to enjoy the full benefits of the currency movement in the event of a favourable movement of the currency denomination of the hedged Class against the base currency of the Fund. You should also note that hedging incurs costs, in which will impact the NAV of a hedged Class.
Sector risk	The Fund invests predominantly in the Target Fund which invests solely in the biotechnology sector. Given the nature of biotechnology sector, it requires an extensive research coverage as well as in-depth research to identify the growth opportunities of a company. In addition, the sector may be subject to greater government regulation than other sectors and, as a result, any significant changes to such government regulation may have an adverse impact on companies operating in the sector. On top of that, the investment in the sector may also be affected by the competition of new market entrants, patent considerations and product obsolescence. Investors should note that the Target Fund's performance may be impacted by all these sector-specific factors, and consequently impacting the performance of the Fund.

Specific risks related to the Target Fund

The specific risk related to the Target Fund includes but not limited to:

- Concentration risk
- Foreign Currency risk
- Securities Lending risk
- Market risk
- Counterparty risk
- Debt Securities risk
- Equity risk
- Liquidity risk
- Private Investments in Public Equity (PIPEs) risk
- Private Companies risk
- Smaller and Midsize Companies risk
- Special Purpose Acquisition Companies (SPACs) risk
- Sustainability risk

The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Fund and are not set out in any particular order of priority. You should be aware that an investment in a unit trust fund may be exposed to other risks from time to time. If in doubt, you should consult professional advisers for a better understanding of the risks.

Note: If your investments are made through an IUTA via a nominee system of ownership, you would not be deemed as a Unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).
