Fund Manager's Report

The Fund delivered 0.28% in September 2024 which was outperforming the benchmark by 15bps, and delivered 3.62% in the 12-months period ending 30 September 2024, outperforming the benchmark by 200bps.

BNM kept the OPR unchanged at 3.00% at its September meeting. The MPC noted that the current rate is supportive of economic growth and aligns with their inflation and growth outlook. They emphasized a neutral monetary stance but remain watchful of domestic and inflationary trends heading into 2025. The MPC's assessment on growth outlook continues to see upside from global tech upcycle, robust tourist spending and faster investment project implementation, while the downside risk to growth comes mainly from external demand.

In August 2024, the headline inflation rate moderated to 1.9% YoY, slightly down from 2.0% in July. For the first eight months of 2024, inflation averaged 1.8%, compared to 2.5% for the whole of 2023. The broadening of the services tax base and its rate increase from 6% to a range of 6%-8% had a mild impact on services inflation, which remained at 2.2% YoY. Additionally, adjustments in diesel prices in Peninsular Malaysia had a muted effect on inflation so far.

The unemployment rate remained steady at 3.3% in July 2024, the same as the previous month. The number of unemployed persons decreased slightly by 0.3%, reflecting a stable labor market. This stability is supported by continuous economic growth, with sectors such as services, manufacturing, and construction showing positive employment trends.

We limit our investment exposure to short-term deposit placements due to the very low risk nature of the Fund.

[^]Based on the fund's portfolio returns as at 15 September 2024, the Volatility Factor (VF) for this fund is 0.23 and is classified as "Very Low" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
