## Key Risks

General risks of investing in a CIS	
<b>Returns not guaranteed</b>	The investment of the Fund is subject to market fluctuations and its inherent risk. There is <b>NO GUARANTEE</b> on the investment returns, nor any assurance that the Fund's investment objective will be achieved.
<b>Market risk</b>	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
<b>Inflation risk</b>	This is the risk that your investment in the wholesale fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
<b>Loan financing risk</b>	This risk occurs when investors finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments.
Specific risks related to the Fund	
<b>Currency risk</b>	<p>You should be aware that currency risk is applicable to Class(es) (e.g. Class MYR) which is in a different currency than the base currency of the Fund (i.e. USD). The impact of the exchange rate movement between the base currency of the Fund and the currency denomination of the respective Class may result in a depreciation of the value of your holdings as expressed in the currency denomination of the Class(es).</p> <p>As for hedged Class, the Class itself provides mitigation to the currency risk arising from the difference between the currency denomination of the Class and the base currency of the Fund. While we aim to fully hedge the currency risk for a hedged Class, you should note that it may not entirely eliminate currency risk. In addition, you should note that, as a result of hedging, a hedged Class will not be able to enjoy the full benefits of the currency movement in the event of a favourable movement of the currency denomination of the hedged Class against the base currency of the Fund. You should also note that hedging incurs costs, in which will impact the NAV of a hedged Class.</p>
<b>Manager risk</b>	As the Fund invests into CIS managed by another manager, the Target Fund's manager has absolute discretion over the Target Fund's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Target Fund, the NAV of the Fund, which invests into the Target Fund would be affected negatively.
<b>Country risk</b>	As the Fund invests in the Target Fund which is domiciled in Luxembourg, the Fund's investments in the Target Fund may be affected by risks specific to Luxembourg. Changes to laws and regulations of Luxembourg may have an adverse impact on the Target Fund, and consequently the Fund.
