

## Principal Global Securitised Credit Bond Fund

Stable returns, smart diversification  
& elevated growth.

### Why Principal Global Securitised Credit Bond Fund?

#### 1 Higher potential yield

This Fund is designed to give you potentially higher yields compared to corporate bonds – making your investment work harder for you.

#### 2 High quality assets

When you invest in high quality securitised credits – the 6As (AAA, AA and A-rated assets) – it reduces your portfolio volatility in an uncertain economic backdrop.

#### 3 Lower volatility

Securitised credit is predominantly floating rate, making your portfolio less sensitive to interest rate changes. This high-quality securitised credit combines compelling cash flows with shorter rate and spread duration, helping to reduce volatility in an uncertain market environment.

#### 4 Smart diversification

Diversify your portfolio by investing in an asset class that is more compelling than fixed income in a “higher for longer” interest rate environment. Should rates fall, you get capital appreciation instead.
