**Fund Manager's Report**

The Fund declined 9.75% during the month, underperformed the benchmark by 0.87%

After starting 2025 on a strong note, global equities collectively declined during the rest of the first quarter (1Q25) due to investor concerns about US economic growth, President Donald Trump's trade policy and a broadening trade war. On the economic front, global manufacturing activity expanded in March for the third consecutive month, and flash reports for March showed that global services activity continued to grow in several regions during the quarter.

The information technology (IT) sector posted negative returns in January, February and March and finished 1Q25 in last place among the 11 major equity sectors globally, with most of the overall losses occurring in March. Semiconductor stocks suffered the brunt of the selloff, and while all five other IT-related industries were also out of favor with many investors, there was some resilience in IT services as the group declined modestly compared to the rest.

We expect equity market volatility to persist in the near-term but remain positive on secular growth in the IT sector in the longer term. The market is contending with heightened macroeconomic and policy uncertainty, exacerbated by the introduction of the Trump administration's global trade policy framework on 2 April.

We recommend that you read and understand the contents of the Principal Global Technology Fund Information Memorandum No.2 dated 31 December 2019, which have been deposited with Securities Commission Malaysia before investing and that you keep the said Information Memorandum for your record.
