Key Risks

General risks of investing in a fund	
Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment which includes your investment capital and returns, nor any assurance that the fund's objective will be achieved.
Market risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.

Inflation risk	This is the risk that your investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, an incorrect view by the manager of the market, non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing repayments. In the event units are used as collateral and if the prices of units fall below a certain level due to market conditions, you may be required to top-up additional amounts on top of your normal instalment. Failing which, the units may be sold at a lower NAV per unit as compared to the NAV per unit at the point of purchase towards the settlement of your financing.
Shariah non-Compliance risk	This refers to the risk of the fund not conforming to Shariah Investment Guidelines due to investment in Shariah non-compliant instrument. In the event that the Manager is required to rectify any Shariah non-compliance by disposing the related instrument, any losses from disposal due to investment in Shariah non-compliant instrument will be borne by the Manager. In any circumstances, gain received from disposal shall be channeled to baitulmal and/or charitable bodies as approved by the Shariah Adviser.

Specific risks associated with the investment portfolio of the Fund

Credit and default risk	Investment of the Fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. We aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.
--------------------------------	--

The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Fund and are not set out in any particular order of priority. You should be aware that an investment in a unit trust fund may be exposed to other risks from time to time. If in doubt, you should consult professional advisers for a better understanding of the risks.

Note: Please note if your investments are made through an IUTA via a nominee system of ownership, you would not be deemed as a Unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).

Investment in the Fund is not the same as placing funds in an Islamic deposit with an Islamic financial institution. There are risks involved and you should rely on your own evaluation to assess the merits and risks when investing in the Fund.
