Fund Manager's Report

In October 2024, the Fund increased 0.75%, outperforming the Benchmark by 224 basis points (bps) mainly due to its overweight in Technology, Real Estate and Healthcare while on a YTD basis, the fund outperformed 1723 bps, with the YTD return of 27.00%.

Malaysia's manufacturing sector conditions remain somewhat muted in October with a PMI reading of 49.5 pts, unchanged from the previous month. S&P Global however noted that firms recorded a renewed rise in new order intakes, albeit production volumes scaled back further alongside purchasing activity. Optimism of a recovery in new orders over the coming 12 months, which rose to a YTD high last month, remains solid. The latest PMI data suggests 3Q24 GDP growth momentum could sustain at a similar pace as the preceding quarter, which was at 5.9%. To recap, BNM now projects GDP to grow 4.8% - 5.3% in 2024, revised up from 4% - 5% previously, and the economy to expand by 4.5% - 5.5% in 2025.

We expect BNM to maintain OPR at 3.00% for the rest of the year given muted inflation and modest economic growth. Inflation eased further to 1.8% in September from 1.9% in August. There appears to be sufficient headroom to central bank's latest 2.0% - 3.5% CPI forecast for 2025 with the impending subsidy rationalization plans.

On current volatility, partly due to US election, we are actively deploying cash that were raised earlier selectively into defensives and quality names. We believe improved political stability, stronger earnings growth prospects and higher domestic investments would keep the market afloat. Key catalysts are domestic fiscal reforms, surge in investments and elevated domestic liquidity. Key risks are the derailment of Malaysia's macroeconomic recovery and corporate earnings growth due to the larger-than-expected impact of rising inflation, slower global economic growth, and heightened geopolitical risk.

[^]Based on the fund's portfolio returns as at 15 October 2024, the Volatility Factor (VF) for this fund is 13.11 and is classified as "High" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. We recommend that you read and understand the contents of the Master Prospectus (Islamic Funds) dated 31 December 2019, which has been duly registered with the Securities Commission Malaysia, before investing and that you keep the said Master Prospectus (Shariah-Compliant Funds) for your records.
