Fund Manager's Report

In May-21, the Fund fell 0.97%, underperforming the Benchmark by 1 basis points (bps) which mainly due to the drag from equities. The underperformance in Malaysia equity was contributed by stock selection in Information Technology, Industrials and Energy. Year-to-date, the Fund up by 2.18%, outperforming the Benchmark by 84bps. For fixed income, the main contributors were from the power, REITs and banks related sukuk.

We stay Neutral on Malaysia equity. Despite the near-term headwinds, we remain proponents of the reopening theme and thus constructive on Cyclical, Consumer Discretionary and select Transport sectors. We turned cautious on some commodities but remain positive on energy and aluminum. The former will benefit from rising air travel activities and the latter due green infrastructure spending. We are very selective on Tech and maintain our underweight stance on Gloves as earnings seem to have peaked despite ESG issues waning. For fixed income, we continue to overweight on the corporate segment with stable fundamentals.

Asian equities as measured by the MSCI AC Asia ex-Japan Islamic Index declined 0.3% in US\$ terms in May. India and the Philippines were outperformers while Malaysia and Taiwan lagged, as the number of new Covid-19 cases peaked in India but surged in Malaysia and Taiwan. Commodities surged in the first half of May before China attempted to cool commodities prices. Global inflation has risen and while we maintain our view that it is transitory, we need to keep an eye on signs of sustained inflationary pressures.

We have broadened out our portfolio into Industrials and Materials and have recently added back into Indian equities as we saw an improvement in the Covid situation in the country. We prefer quality companies which are long term winners, and companies which have pricing power that allow them to continue to grow profits in the current environment.

*Based on the fund's portfolio returns as at 15 May 2021, the Volatility Factor (VF) for this fund is 8.070 and is classified as "Low" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
