## Fund Manager's Report

The Fund's performance for the month of July 2021 came in at 0.19%, outperforming the benchmark's return by 6bps. For the 12-months period ending 31 July 2021, the Fund delivered 1.96%, outperforming the benchmark by 35bps.

COVID-19 daily cases remained high, averaging more than 11k infections/day in July with Kuala Lumpur and Selangor consistently contribute to the bulk of the cases, taking the number of active cases to 186,609 as of July 2021. On the positive note, the vaccination programme has ramped up significantly across the country with the Government launching the "Operation Surge Capacity" to accelerate the vaccination drive in the Klang Valley with a goal of administering at least one dose for people aged 18 and above by 1st August. As of end July, a total of 20 million doses have been administered nationwide of which 6.5 million (about 20% of the population) have been fully inoculated.

The government expects most states will transition to the final Phase Four (<500 daily cases, 60% population received 2 doses and public healthcare capacity is at safe level) of the National Recovery Plan as early as October. Currently, eight states have moved into Phase Two, namely Perlis, Perak, Pahang, Kelantan, Terengganu, Pulau Pinang, Sabah and Sarawak.

BNM kept policy rate unchanged in the July 2021 meeting, noting that there had been improvements in economic activities in 1Q2021 which continued into April, and highlighted that the growth outlook remains subject to significant downside risks. The re-imposition of nation-wide lockdown will dampen the growth momentum where the extend of the impact is dependent on the stringency and duration of the containment measures. The policy support packages, more favorable external environment alongside the progress of vaccination programme will provide support for the growth recovery into 2022. We believe that BNM is likely to keep its OPR at 1.75% for the time being as they deem the current monetary policies to be accommodative to support the recovery.

We remain cognizant that credit metrics for corporates may weaken in the near-term and we will continue our bottom-up approach on credit selection to avoid any risk on credit migration.

\*Based on the fund's portfolio returns as at 15 July 2021, the Volatility Factor (VF) for this fund is 0.240 and is classified as "Very Low" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
