How Does the Scheme Work?

PRS is a voluntary scheme designed to help you build your nest egg for retirement. You can personalize and select a combination of the Funds that best suits your risk and return preference. You decide how much, how often and what Fund to invest in based on your retirement goals.

Contribution

All contributions made by or on behalf of you will be split upon each contribution being made and maintained in two (2) separate sub-accounts as follows:

- Sub-account A holds 70% of all contributions made to any of the Funds.
- Sub-account B holds 30% of all contributions made to any of the Funds.

Investment Option

You may choose to:

- Do-It-Myself:** You can contribute to the Scheme by selecting any one or a combination of the Funds based on your preferred risk and return profile until retirement.
- Do-It-For-Me (Default Option):** This is the best choice if you are unsure which Fund suits you the most. We will allocate your contributions into one of the Core Funds based on your year of birth as listed in the table below. By this, you will be investing in a fund that offers an age-appropriate risk and return profile based on your current age.

Core Funds	Year of birth	Expected year of retirement*
iRE60	1996 – 2005	2051 – 2060
iRE50	1986 – 1995	2041 – 2050
iRE40	1976 – 1985	2031 – 2040
iRE30	1968 – 1975	2023 – 2030
iREI	On or before 1967	N/A – Retired

* Based on the Retirement Age.

Cooling-Off Period

You have six (6) Business Days after your initial contribution (i.e. the date the complete application is received and accepted by us or our Distributors) to reconsider the appropriateness and suitability for your investment needs. Within this period, you may withdraw your investment at the same NAV per unit when the units were purchased or prevailing NAV per unit at the point of cooling-off (whichever is lower) ("Refund Amount"). We must obtain prior authorization of the PPA before proceeding with the refund. We will pay the Refund Amount including the Sales Charge (if any) to you in RM within seven (7) Business Days of receiving the authorization of the PPA. Please note that this cooling-off right is only given to a first time Member registered with PPA who is investing with any PRS provider. However, Principal Malaysia's staff, person(s) registered by a body approved by the SC to deal in PRS and contributions made to PRS by an employer on behalf of the employee are not entitled to the cooling-off right.

Permitted Withdrawals and Pre-Retirement Withdrawals

Subject to permitted reasons for withdrawals, you may not make a withdrawal from any of the Funds until you reach the Retirement Age. Upon reaching the Retirement Age, you shall be entitled to withdraw the full amount accumulated in the Funds held by you as Accrued Benefits without payment of any tax penalty. Request for payment for withdrawals from any of the Funds may be made for the following circumstances and as follows:

No	Circumstances for withdrawal	Sub-account	Extend of withdrawals	Subject to tax penalty
(a)	Upon reaching Retirement Age	A & B	Partial or full	No
(b)	Pre-retirement withdrawals	B	Partial or full	Yes
(c)	Death of Member	A & B	Partial or full	No
(d)	Permanent departure of a member from Malaysia	A & B	Full	No
(e)	Due to permanent total disablement, serious disease or mental disability of a member	A & B	Full	No
(f)	For healthcare purpose	B	Partial or full	No
(g)	For housing purpose	B	Partial or full	No

Upon receiving your request to withdraw some or all of the Accrued Benefits in any of the Fund, we and/or PPA may require you to provide evidence of the facts necessary to establish your right to withdraw moneys from any of the Fund. In relation to

- item (c), (e), (f) and (g) – we must obtain prior authorization from the PPA before issuing instructions to the Trustee to cancel Units.
- item (b), (f) and (g) – withdrawals may be requested by the member once every calendar year from each PRS provider (from one or multiple funds under any scheme managed by that PRS provider) provided that the individual has been a member of that scheme for at least one (1) year.
- item (b) – we will deduct an 8% tax penalty (or such other applicable tax penalty) from the withdrawn amount before making payment to you.
- item (f) – the withdrawal is only permitted for Member's ownself or immediate family on certain illnesses.

We will pay the withdrawal proceeds within seven (7) Business Days after we receive a complete withdrawal request from you and, where required, the authorization of the PPA. For the feeder fund, the withdrawal payment period may be extended to within 5 Business Days from the receipt of withdrawal proceeds from the target fund.

Switching

Subject to our absolute discretion, you have the option to switch into any of the Funds under the Scheme or funds under Principal PRS Plus. Switching is limited to once a month only regardless of whether it is switching of funds under the Scheme or switching between funds of different PRS managed by Principal Malaysia and switching is not allowed between different classes. Ask about switching before you withdraw.

Note: Muslim Members are encouraged to switch into any other Islamic fund rather than into any other conventional fund as investment in the conventional fund is not permitted from the Shariah perspective.

Transfer between PRS Providers

Prior to reaching the Retirement Age, you are allowed to transfer your accrued benefits of any amount from one (1) or multiple funds under the scheme(s) managed by that PRS provider once every calendar year to another PRS provider provided that:

- you have been a member of the scheme for at least one (1) year; and
- all the accrued benefit to be transferred from a fund must be transferred to one (1) other fund.

The above also applies if you transfer from any funds under schemes of other PRS providers into any Funds under the Scheme. All information required by the PPA is to be provided in the application for the transfer. Unless the context stated otherwise, all withdrawal and/or transfer transactions are only allowed for Vested Units.

What other taxes apply?

- (i) Tax relief up to RM3,000 per annum will be given for an individual's contribution to the PRS.*
- (ii) Employers will also be given tax deduction on contributions to PRS made on behalf of their employees of up to 19% of the employees' remuneration.

* For PRS contributions and deferred annuities effective from years of assessment 2012 to 2025, subject to terms and conditions and/or any amendment/modifications as may be imposed/required by the government or relevant authorities from time to time.

Key Risks

General risks of investing in the fund	
Returns and capital not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment which includes your investment capital and returns, nor any assurance that the fund's investment objective will be achieved. You should also note that the fund is neither a capital guaranteed fund nor a capital protected fund. However, we reduce this risk by ensuring diligent management of the assets of the fund based on a structured investment process.
Legal risk and regulatory risk	The value of the fund may be affected by uncertainties in the legal and regulatory environment. A change in law or regulation made by government or regulatory body will materially impact the value of securities, business, sector or even market as a whole. These amendments to the laws and regulations may increase the costs of operating a business and hence reduce the attractiveness of its related investments. For example, if the regulatory body imposes a limit on the amount of margin an investment account is able to have, the impact on the stock market would be material as this change may force the existing investors who are currently breaching the limit to sell off their margined positions. You should also note that laws and guidelines relating to PRS may change and this may affect your PRS account and/or your ability to access your account balance.
Market risk	Refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Risk associated with Default Option	If you selected the Default Option, we will allocate you into one of the Core Funds based on your year of birth, which aims to match with the expected year of retirement. If you are allocated into a TDF, your investment balance will be automatically switched into the iREI when the TDF matures on its Target Date. The NAV per unit of TDF may be lower at the point of switching than the NAV per unit when you initially contributed into the TDF. Hence, you may suffer losses relating to your investment costs upon disposal. We will notify you one (1) month before the TDF matures on its Target Date that your current investments will be automatically switched into the iREI.
Liquidity risk	Liquidity risk refers to the ease of liquidating an asset without causing market dislocation. This depends on the supply and demand as well as the asset's volume or amount traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund and consequently the value of member's investment in the Fund, will be negatively affected when the Fund has to sell such assets at unfavourable prices. In the case where the Fund is invested into unlisted Islamic CIS, the Fund may be negatively impacted due to liquidity policy applied by the Islamic CIS (e.g. suspension during exceptional situations).
Inflation risk	Your investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased. This risk can be mitigated by investing in securities that can provide a positive real rate of return.
Manager risk	This risk refers to the day-to-day management of the fund by the manager which will impact the

	performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund. Although the occurrence of such events is very unlikely, we seek to reduce this risk by implementing a consistent and structured investment process, systematic operational procedures and processes along with stringent internal controls.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments. In the event units are used as collateral and if the prices of units fall below a certain level due to market conditions, you may be required to pay additional amounts on top of your normal instalment. If you fail to comply within the time prescribed, your units may be sold at an unfavourable price and the proceeds thereof will be used towards the settlement of your financing.
(i) Specific risks associated with the investment portfolio of the Fund	
Risks associated with investment in the Target Fund	As the Fund invests predominantly in the Target Fund, the Fund is therefore subject to the management risk of the management company and investment manager of the Target Fund. Should there be a substantial change in the Target Fund's structure which is not in line with the Fund's objective, we reserve the right to seek for alternative Islamic CIS that is consistent with the objective of the Fund, subject to your approval. During this transition period, we may liquidate the Fund's holdings from the Target Fund and hold up to 100% of its NAV in cash, which will deviate from the Fund's stipulated investment strategies.
(ii) Specific risks associated with the Target Fund	
Reclassification of Shariah status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the SAC of the SC, the Shariah Adviser or the Shariah boards of the relevant Islamic indices or Shariah-compliant securities. If this occurs, we will take the necessary steps to dispose such Shariah non-compliant securities. There may be opportunity loss to the fund due to the fund not being allowed to retain the capital excess gains derived from the disposal of the Shariah non-compliant securities. In the event that the Shariah non-compliant securities are disposed at a price lower than the investment cost, it may adversely affect the value of the fund. Thus, it may cause the NAV of the fund or price of units to fall.
Stock specific risk	Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect The Target Fund's NAV.
Interest rate risk	Interest rate risk refers to the impact of interest rate changes on the valuation of Sukuk and Islamic money market instruments. When interest rates rise, Sukuk and Islamic money market instruments prices generally decline and this may lower the market value of the Target Fund's investment in Sukuk and Islamic money market instruments. In managing the Sukuk, we take into account the coupon rate and time to maturity of the Sukuk with an aim to mitigate the interest rate risk. As for Islamic money market instruments, the typical tenor of these instruments are less than 12-month maturity and unlike Sukuk, any change to interest rate will only have a minor impact to the prices of these instruments.
Risk associated with investing in Islamic CIS	Since the Target Fund may invest into Islamic CIS, there is a risk of concentration into Islamic CIS, in which the Islamic CIS's management company has absolute discretion over the Islamic CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Islamic CIS and/or the management company, the NAV of The Target Fund, which invests into those Islamic CIS would be affected negatively. Should the situation arise, we will seek for another Islamic CIS that is consistent with the objective of this Fund.
Country risk	Investments of the Target Fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which The Target Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by The Target Fund in those affected countries. This in turn may cause the NAV of The Target Fund or price of units to fall.
Currency risk	As the investments of The Target Fund may be denominated in currencies other than the base currency of The Target Fund, any fluctuation in the exchange rate between the base currency of The Target Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the base currency of The Target Fund, this will have an adverse effect on the NAV of The Target Fund in the base currency of The Target Fund and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
Risks associated with investment in Shariah-compliant warrants and/or Islamic options	There are inherent risks associated with investment in Shariah-compliant warrants and/or Islamic options. The value of Shariah-compliant warrants and/or options are influenced by the current market price of the underlying security, the exercise price of the contract, the time to expiration of the contract and the estimate of the future volatility of the underlying security's price over the life of the contract. Generally, the erosion in value of Shariah-compliant warrants accelerates as it approaches its expiry date. Like securities, we will undertake fundamental research and analysis on these instruments with an aim to

	mitigate its risk.
Credit and default risk	The Target Fund will be exposed to a certain degree of credit and default risk of issuers or counterparties when the Target Fund invests in Sukuk and/or place Islamic Deposits. Credit risk relates to the creditworthiness of the securities issuers or counterparties and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer or counterparties may impact the value as well as liquidity of the investments. In the case of rated Sukuk, this may lead to a credit downgrade. Default risk relates to the risk that a securities issuer or counterparties either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investments. This could adversely affect the value of the Target Fund. We aim to mitigate this risk by performing bottom-up and top-down credit research and analysis to determine the creditworthiness of its issuers or counterparties, and impose investment limits on exposures for issuers or counterparties with different credit profiles as a precautionary step to limit any loss that may arise directly or indirectly as a result of a defaulted transaction.

The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Funds and are not set out in any particular order of priority. If in doubt, you should consult professional advisers for a better understanding of the risks.
