Key Risks

General risks of investing in a fund	
Returns and capital not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment which includes your investment capital and returns, nor any assurance that the fund's objective will be achieved. You should also note that the fund is neither a capital guaranteed fund nor a capital protected fund. However, we reduce this risk by ensuring diligent management of the assets of the fund based on a structured investment process.
Market risk	This risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that your investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments. In the event units are used as collateral and if the prices of units fall below a certain level due to market conditions, you may be required to pay an additional amount on top of your existing instalment. If you fail to do so within the time prescribed, your units may be sold at an unfavourable price and the proceeds thereof will be used towards the settlement of your financing.

Manager risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Liquidity risk	Liquidity risk refers to the ease of liquidating an asset without causing market dislocation. This depends on the supply and demand as well as the asset's volume or amount traded in the market. If the fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund and consequently the value of unitholders' investment in the fund may be negatively affected when the fund has to sell such assets at unfavourable prices.

Specific risks associated with the investment portfolio of the Fund

Lack of discretion by Manager to adapt to market changes	As this is an index tracking fund, the Fund intends to replicate the performance of its benchmark index. We have limited discretion to alter the security allocation. Therefore, we may not dispose a poorly performed index constituents even if it may adversely affect the Fund's value and its NAV per unit.
Risk associated with investment in derivatives	As the Fund may invest in derivatives, it may be subject to risks associated with such investments. Investments in derivatives may require the deposit of initial margin and additional deposit of margin on short notice if the market moves against the investment positions. If no provision is made for the required margin within the prescribed time, the Fund's investments may be liquidated at a loss. As such, investments in derivatives may increase likelihood of high volatility of the NAV per unit of the Fund. Therefore, it is essential that such investments in derivatives be monitored closely. We have the necessary controls for investment in derivatives and have in place systems to monitor any derivative positions for the Fund.
Risks associated with investment in warrants and/or options	There are inherent risks associated with investment in warrants and/or options. The value of warrants and/or options are influenced by the current market price of the underlying security, the exercise price of the contract, the time to expiration of the contract and the estimate of the future volatility of the underlying security's price over the life of the contract. Generally, the erosion in value of warrants and/or options accelerates as it approaches its expiry date. Like securities, we will undertake fundamental research and analysis on these instruments with an aim to mitigate its risks.

The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Fund and are not set out in any particular order of priority. You should be aware that an investment in a unit trust fund may be exposed to other risks from time to time. If in doubt, you should consult professional advisers for a better understanding of the risks.

Note: If your investments are made through an IUTA via a nominee system of ownership, you would not be deemed to be a Unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).

Fees & Charges

Application Fee*	Up to 5.50% of the NAV per unit

Valuations

We will carry out the valuation for the Fund for a Business Day at the end of that Business Day (T day). The NAV per unit for a Business Day is available on our website at www.principal.com.my after 10:00 a.m. on the following Business Day (T+1).

Please refer to the “Unit Pricing” section of the Master Prospectus for more information.

Avenues to Exit This Investment

To exit from this investment, you may withdraw, switch out or transfer your unit holdings to other investors. You may withdraw your investment at the NAV per unit of the Business Day.

Withdrawals can be made from the Fund by completing a withdrawal application and submit to the relevant Distributor or Principal Malaysia's offices. There is no restriction on the frequency of withdrawals and no Withdrawal Fee will be charged. Hence, the amount that you will receive is calculated by the withdrawal value less the Withdrawal Fee, if any. You will be paid within seven (7) Business Days upon our receipt of the complete withdrawal request. You will have to bear the applicable bank fees and charges, if any.

For more information on the withdrawals, switching, transfer facility and cooling-off period, please refer to the "Transaction Information" chapter of the Master Prospectus. For more information on the fees and charges incur when you exit from this investment, please refer to "Fees, Charges and Expenses" chapter of the Master Prospectus.
