**MANAGER'S REPORT****FUND OBJECTIVE AND POLICY****What is the investment objective of the Fund?**

The investment objective of the Fund is to achieve maximum capital appreciation over the long-term through all types of investments.

**Has the Fund achieved its objective?**

For the financial period under review, the Fund's total return decreased by 6.46%, while the benchmark dropped by 5.33%. The Fund has not achieved its objective of capital growth during the financial period under review due to the unfavourable macro environment. Nevertheless, the Fund's objective of providing capital appreciation over the long-term is still in place as shown under the Fund Performance below.

**What are the Fund investment policy and principal investment strategy?**

The Fund may invest at least 70% of its Net Asset Value ("NAV") in equities and up to 28% of the Fund's NAV in other permissible investments and at least 2% of the Fund's NAV in liquid assets. In line with its objective, the investment policy and strategy of the Fund will focus on investment in shares of companies with growth potential. Generally, the Fund will invest primarily in large capitalisation companies listed on the main market of Bursa Malaysia. The Fund may also invest in 'Access, Certainty, Efficiency' ("ACE") market of Bursa Malaysia to provide better return. With effect from 14 April 2023, the Fund may invest up to 25% of its NAV in companies that are listed in any Eligible Market globally with some operations or businesses in Malaysia to capture growth opportunities.

The asset allocation strategy for this Fund is as follows:

- at least 70% of the Fund's NAV will be invested in equities;
- up to 28% of the Fund's NAV may be invested in other permissible investments; and
- at least 2% of the Fund's NAV will be invested in liquid assets.

**Fund category/type**

Equity/Aggressive Growth

**When was the Fund launched?**

Name of Class	Launch Date
Class MYR	28 September 1995

**What was the size of the Fund as at 30 April 2025?**

RM163.54 million (173.67 million units)

**What is the Fund's benchmark?**

FTSE Bursa Malaysia ("FBM") Top 100 ("FBM100") Index.

Note: Investors should note that the risk profile of the Fund is not the same as the risk profile of the benchmark.

**What is the Fund distribution policy?**

The Manager has the discretion to distribute part or all of the Class' distributable income. The distribution (if any) may vary from period to period depending on the investment objective and the performance of the Fund.

**What was the net income distribution for the six months financial period ended 30 April 2025?**

There was no income distribution for the six months financial period ended 30 April 2025.

**MARKET REVIEW (1 NOVEMBER 2024 TO 30 APRIL 2025)**

For the financial period under review, the FBM100 Index decreased by 629.66 points or 5.3% from 11,814.10 points to 11,184.44 points as at 30-April-2025.

FBM100 index rose by marginally 0.1% month-on-month ("m-o-m") in November 2024 as investors continued to risk off due to uncertainties surrounding potential new polices under the new US administration, as well as the trajectory of Fed rates given the recent economic data.

The Index ended December 2024 on a strong note, up 3.7% m-o-m aided by year-end window dressing and cash redeployment by domestic funds amidst another month of heavy foreign selling due to policy uncertainties under the new US administration and the trajectory of Fed rates coupled with rising bond yields.

FBM100 index was down significantly by 5.6% m-o-m in January 2025. The sell-off was largely caused by the US AI diffusion rules, further exacerbated by the launch of DeepSeek by China which questioned global AI Capex and monetization prospects. The shift in Fed rate expectations due to Trump's tariff posture did not help.

In February 2025, the Index continued to slip by 0.7% m-o-m though market sentiment improved slightly as investors re-assessed the impact of US AI diffusion rules, the launch of cost-effective AI models, US tariffs and the trajectory of Fed rates.

Coming to March 2025, FBM100 index had fallen further by 3.4% m-o-m. Aside from the risk aversion surrounding impending Trump tariff measures and recession fears re-emerging in the US, the index was also weighed down by many heavyweights going ex-dividend during the month and ROI harvesting activities by domestic institutions.

After the volatile market in first quarter of 2025 ("1Q25"), FBM100 index rose by 0.7% m-o-m in April 2025. The index appeared to have well recovered from the "Liberation Day" sell-off. Investors sentiment was mainly buoyed by hopes of the US dialing back on tariffs against major trading nations, therefore easing concerns on the derailment of global trade and prospects of a recession.

<b>Class MYR</b>			
NAV (RM Million)	163.54	176.83	(7.52)
NAV/Unit (RM)	0.9416	1.0066	(6.46)

**Changes in NAV**

NAV for the Class MYR decreased by 7.52%, while the respective NAV per unit decreased by 6.46% because of the negative investment performance during the financial period under view.

Performance data represents the combined income and capital return as a result of holding units in the Fund for the specified length of time, based on NAV to NAV price. The performance data assumes that all earnings from the Fund are reinvested and are net of management and trustee fees. Past performance is not reflective of future performance and income distributions are not guaranteed. Unit prices and income distributions, if any, may fall and rise. All performance figures for the financial period have been extracted from Lipper.

Equity allocation reduced from 95.45% as at 31 October 2024 to 92.22% as at 30 April 2025, while the cash level increased 8.12% in view of the heightened market volatility.

**MARKET OUTLOOK\***

Malaysia’s manufacturing sector moderated further in April 2025, with a softer Purchasing Managers’ Index (“PMI”) reading of 48.6 points (“pts”) vs 48.8 pts in the previous month. Standard & Poor’s (“S&P”) Global stated that demand conditions remain subdued while firms opted to work through backlogs in the absence of new orders while also scaling back employment, purchases and stock holdings. Inflation pressure trended downwards once again in April 2025 but only mildly. Business confidence slipped to the lowest level since July 2023, with firms expressing concerns about the potential adverse impacts of muted global economy and US tariffs. The latest PMI data still suggests modest growth in Gross Domestic Product (“GDP”) for 1Q25 – advanced estimates show MY GDP grew 4.4% in 1Q25. To recap, Malaysia’s GDP grew by 5% in fourth quarter of 2024 (“4Q24”) and 5.1% for 2024. Bank Negara Malaysia (“BNM”) maintained its GDP growth forecast of 4.5% to 5.5% in 2025 during the recent briefing but highlighted potential risk to growth due to the trade restrictions.

BNM maintained Overnight Policy Rate (“OPR”) at 3.00% during the last Monetary Policy Committee (“MPC”) meeting and we expect the central bank to hold rates steady given muted inflation and modest economic growth. Inflation slowed to 1.4% in March, lower than the 1.5% in the previous month. There appears to be sufficient headroom to central bank’s latest 2.0-3.5% CPI forecast for 2025 with the impending subsidy rationalization plans.

The KLCI is now trading at a forward price-to-earning (“PE”) of 13.5 times, which is approx. -1.5 Standard Deviation (“SD”) below the 10-year historical mean. Consensus projects earnings growth for FBM30 of

## **MARKET OUTLOOK\* (CONTINUED)**

around 7% for 2025 and 2026. Sustained strength in domestic investments (both Domestic Direct Investment (“DDI”) and Foreign Direct Investment (“FDI”)), fiscal consolidation gathering pace (in particular, subsidy rationalisation initiatives) and the strengthening of the Ringgit are factors we see supportive of the further narrowing of risk premiums and consequently higher valuation multiples.

\* This market outlook does not constitute an offer, invitation, commitment, advice or recommendation to make a purchase of any investment. The information given in this article represents the views of Principal Asset Management Berhad (“Principal Malaysia”) or based on data obtained from sources believed to be reliable by Principal Malaysia. ## **INVESTMENT STRATEGY**

The Malaysian market jumped to a one-month high driven by broad-based sector gains and improved investor sentiment. However, what will drive the market further would need to be a clear signal on how Malaysia would be able to navigate macro headwinds amid Trump’s tariff trade war. Therefore, we expect volatility to persist in the near term. Until clearer catalyst emerges, we believe this could be an opportune time to rebalance portfolios. We advocate a barbell strategy by pairing high-dividend, big-cap, defensive stocks with selective exposure to undervalued laggards especially stocks with domestic focused demand. We remain invested in sectors such as Utilities, Construction and Property. Key risks include a further escalation of global trade tensions affecting business and investment conditions.

## **SOFT COMMISSIONS AND REBATES**

Principal Malaysia (the “Manager”) and the Trustee will not retain any form of rebate from, or otherwise share in any commission with, any broker or dealer in consideration for directing dealings in the investments of the Principal Malaysia Funds (“Funds”). Accordingly, any rebate or shared commission will be directed to the account of the Fund. We may retain goods and services (soft commission) provided by any broker or dealer if the following conditions are met:

- (a) the soft commission brings direct benefit or advantage to the management of the Fund and may include research and advisory related services;
- (b) any dealings with the broker or dealer is executed on terms which are the most favourable for the Fund; and
- (c) the availability of soft commission is not the sole or primary purpose to perform or arrange transactions with such broker or dealer, and we and the fund the manager will not enter into unnecessary trades in order to achieve a sufficient volume of transactions to qualify for soft commission.

During the financial period review, the Manager and Trustee did not receive any rebates from the brokers or dealers but the Manager has retained soft commission in the form of goods and services for the benefit of the fund such as financial wire services and stock quotations system incidental to investment management of the Funds and there was no churning of trades.

## **SECURITIES FINANCING TRANSACTIONS**

The Fund has not undertaken any securities lending or repurchase transactions during the financial period under review.

## **STATE OF AFFAIR OF THE FUND**

In relation to this Fund, the Class SGD has been terminated on 29 July 2024. The Fund had issued First Supplemental Prospectus dated 27 February 2025.

There were no significant changes in the state of affairs of the Fund during the financial period and up to the date of Manager’s report, not otherwise disclosed in the financial statements.

**CIRCUMSTANCES THAT MATERIALLY AFFECT ANY INTEREST OF UNIT HOLDERS**

There were no circumstances that had materially affected the interest of the unit holders during the financial period under review.

**CROSS TRADE**

No cross-trade transactions have been carried out during the financial period under review.

**UNIT SPLIT**

No unit split exercise has been carried out during the financial period under review.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE SIX MONTHS FINANCIAL PERIOD ENDED 30 APRIL 2025**

**1. THE FUND, THE MANAGER, AND ITS PRINCIPAL ACTIVITIES**

Principal Malaysia Titans Plus Fund (the "Fund") was constituted pursuant to a Deed dated 11 July 2005 and is now governed by a Principal Master Deed dated 15 May 2008, a First Supplemental Master Deed dated 25 June 2008, a Third Supplemental Master Deed dated 14 July 2008, and an Eighteenth Supplemental Master Deed dated 25 March 2015 all executed between the Manager and the Universal Trustee (Malaysia) Berhad (hereinafter known as the "Previous Trustee"), a Seventeenth Supplemental Master Deed dated 19 March 2015 entered into between the Manager, the previous Trustee and the Trustee, in respect of a change in trustee to the Fund (hereinafter collectively the "Initial Deed"), a Principal Master Deed dated 10 April 2015, a First Supplemental Deed dated 28 August 2019, and a Second Supplemental Deed dated 22 December 2022 (collectively referred to as the "Deeds"), between Principal Asset Management Berhad (the "Manager") and HSBC (Malaysia) Trustee Berhad (the "Trustee").

The Fund may invest at least 70% of its NAV in equities and up to 28% of the Fund's NAV in other permissible investments and at least 2% of the Fund's NAV in liquid assets. In line with its objective, the investment policy and strategy of the Fund will focus on investment in shares of companies with growth potential. Generally, the Fund will invest primarily in large capitalisation companies listed on the main market of Bursa Malaysia. The Fund may also invest in ACE market of Bursa Malaysia to provide better return. With effect from 14 April 2023, the Fund may invest up to 25% of its NAV in companies that are listed in any Eligible Market globally with some operations or businesses in Malaysia to capture growth opportunities.

The asset allocation strategy for this Fund is as follows:

- at least 70% of the Fund's NAV will be invested in equities;
- up to 28% of the Fund's NAV may be invested in other permissible investments; and
- at least 2% of the Fund's NAV in liquid assets.

In relation to this Fund, the Class SGD has been terminated on 29 July 2024.

The Fund had issued First Supplemental Prospectus dated 27 February 2025.

All investments are subject to the Securities Commission Malaysia ("SC") Guidelines on Unit Trust Funds, SC requirements, the Deeds, except where exemptions or variations have been approved by the SC, internal policies and procedures and the Fund's objective.

The Manager, is a joint venture between Principal Financial Group®, a member of the FORTUNE 500® and a Nasdaq-listed global financial services and CIMB Group Holdings Berhad, one of Southeast Asia's leading universal banking groups. The principal activities of the Manager are the establishment and management of unit trust funds and fund management activities.

**2. MATERIAL ACCOUNTING POLICY INFORMATION**

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements:

**(a) Basis of preparation**

The financial statements have been prepared in accordance with the provisions of the MFRS Accounting Standards as issued by the Malaysian Accounting Standards Board ("MASB") and IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB").

The financial statements have been prepared under the historical cost convention, as modified by financial assets at fair value through profit or loss.

## 2. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)

### (a) Basis of preparation (continued)

The preparation of financial statements in conformity with MFRS Accounting Standards and IFRS Accounting Standards requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported period.

It also requires the Manager to exercise judgement in the process of applying the Fund's accounting policies. Although these estimates and assumptions are based on the Manager's best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 2(k).

There are no other standards, amendments to standards or interpretations that are effective for financial periods beginning on 1 November 2024 that have a material effect on the financial statements of the Fund.

Other than MFRS 18: Presentation and Disclosure in Financial Statements (which will first become applicable for annual periods beginning on or after 1 January 2027), none of the standards, amendments to standards or interpretations that are effective for the financial year beginning on or after 1 April 2025 are applicable to the financial statements of the Fund. The Fund is still currently in the process of assessing the impact, if any, of MFRS 18: Presentation and Disclosure in Financial Statements.

### (b) Financial assets and financial liabilities

#### Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those to be measured at amortised cost.

The Fund classifies its investments based on both the Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed, and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities as fair value through OCI.

The Fund classifies cash and cash equivalents, amount due from Manager, amount due from Manager of collective investment scheme - Management fee rebate and dividends receivable at amortised cost as these financial assets are held to collect contractual cash flows consisting of the amount outstanding.

All of the Fund's financial liabilities are measured at amortised cost.

#### Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date, the date on which the Fund commits to purchase or sell the asset. Investments are initially recognised at fair value. Transaction costs are expensed in the statement of comprehensive income.

**2. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)****(b) Financial assets and financial liabilities (continued)**Recognition and measurement (continued)

Financial instruments are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Unrealised gains or losses arising from changes in the fair value of the financial assets at fair value through profit or loss are presented in the statement of comprehensive income within net gain or loss on financial assets at fair value through profit or loss in the financial period which they arise.

Dividend income from financial assets at fair value through profit or loss is recognised in the statement of comprehensive income as part of gross dividend income when the Fund's right to receive payments is established.

Quoted securities in Malaysia are valued at the last traded market price quoted on Bursa Malaysia Securities Bhd ("Bursa Securities") at the reporting date.

Foreign quoted securities are valued at the last traded market price quoted on the respective foreign stock exchanges at the close of the business day of the respective foreign stock exchanges.

If a valuation based on the market price does not represent the fair value of the quoted securities, for example during abnormal market conditions or when no market price is available, including in the event of a suspension in the quotation of the quoted securities for a period exceeding 14 days, or such shorter period as agreed by the Trustee, then the quoted securities are valued as determined in good faith by the Manager, based on the methods or basis approved by the Trustee after appropriate technical consultation.

Deposits with licensed financial institutions are stated at cost plus accrued interest calculated on the effective interest method over the period from the date of placement to the date of maturity of the respective deposits.

Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective interest rate method.

Impairment for assets carried at amortised cost

The Fund measures credit risk and expected credit losses ("ECL") using probability of default, exposure at default and loss given default. The Manager considers both historical analysis and forward looking information in determining any ECL. The Manager considers the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12 month ECL as any such impairment would be wholly insignificant to the Fund.

Significant increase in credit risk

A significant increase in credit risk is defined by the Manager as any contractual payment which is more than 30 days past due.

**2. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)****(b) Financial assets and financial liabilities (continued)**Definition of default and credit-impaired financial assets

Any contractual payment which is more than 90 days past due is considered credit impaired.

Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor's sources of income or assets to generate sufficient future cash flows to repay the amount. The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in impairment gains. There are no write-offs/recoveries during the financial period.

**(c) Income recognition**

Dividend income is recognised on the ex-dividend date when the right to receive payment is established. Interest income from deposits with licensed financial institutions is recognised on a time proportionate basis using the effective interest rate method on an accrual basis.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit impaired. For credit-impaired financial assets the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance). Realised gain or loss on disposal of quoted securities is accounted for as the difference between the net disposal proceeds and the carrying amount of quoted securities, determined on a weighted average cost basis.

**(d) Foreign currency**Functional and presentation currency

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Malaysian Ringgit ("MYR" or "RM"), which is the Fund's functional and presentation currency. Due to mixed factors in determining the functional currency of the Fund, the Manager has used its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions and have determined the functional currency to be in MYR/RM primarily due to the following factors:

- i) The Fund's units are denominated in MYR/RM;
- ii) Significant portion of the Fund's expenses are denominated in MYR/RM

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in statement of comprehensive income.

## 2. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)

### (e) Cash and cash equivalents

For the purpose of statement of cash flows, cash and cash equivalents comprise bank balances and deposits with licensed financial institutions held in highly liquid investments with original maturities of three months or less that are readily convertible to known amount of cash and which are subject to an insignificant risk of change in value.

### (f) Taxation

Current tax expense is determined according to Malaysian tax laws at the current rate based upon the taxable profit income earned during the financial period.

Tax on income from foreign Shariah-compliant quoted securities are based on the tax regime of the respective countries that the Fund invests in.

Pursuant to Finance Act 2021, foreign-sourced income received in Malaysia will be taxed at prevailing tax rate(s) of the taxpayer and based on applicable tax rules. Bilateral or unilateral tax credits may be allowed if the same income has suffered foreign tax, and where relevant conditions are met.

Withholding taxes on investment income from investment is based on tax regime of the respective countries that the Fund invests in. They are presented within other expenses line in the statement of comprehensive income.

### (g) Distribution

Distributions to unit holders are recognised in the statement of comprehensive income as the unit holders' contribution are classified as financial liability. Distribution is reinvested into the Fund on the ex-date. Reinvestment of units is based on the NAV per unit on the ex-date, which is also the time of creation. Proposed distributions are recognised as a liability in the financial period in which it is approved by the Trustee.

### (h) Transactions costs

Transaction costs are costs incurred to acquire or dispose financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisors, brokers, and dealers. Transaction costs, when incurred, are immediately recognised in the statement of comprehensive income as expenses.

### (i) Amount due from/to stockbrokers

Amounts due from and amount due to stockbrokers represent receivables for investments sold and payables for investments purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively. The amount due from stockbrokers balance is held for collection.

### (j) Unit holders' contributions

The unit holders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "Financial Instruments: Presentation". Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's NAV;
- the units are the most subordinated class and class features are identical;
- there is no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

**2. MATERIAL ACCOUNTING POLICY INFORMATION (CONTINUED)****(j) Unit holders' contributions (continued)**

The outstanding units are carried at the redemption amount that is payable at each financial period if unit holder exercises the right to put the unit back to the Fund.

Units are created and cancelled at prices based on the Fund's NAV per unit at the time of creation or cancellation. The Fund's NAV per unit is calculated by dividing the net assets attributable to unit holders with the total number of outstanding units.

**(k) Realised and unrealised portions of profit or loss after taxation**

The analysis of realised and unrealised portions of profit or loss after taxation as presented on the statement of comprehensive income is prepared in accordance with GUTF.

**(l) Critical accounting estimates and judgements in applying accounting policies**

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters. Estimates and judgement are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the SC Guidelines on Unit Trust Funds. However, the Manager is of the opinion that in applying these accounting policies, no significant judgement was required.

**3. RISK MANAGEMENT OBJECTIVES AND POLICIES**

The investment objective of the Fund is to achieve maximum capital appreciation over the long-term through all types of investments.

The Fund is exposed to a variety of risks which include market risk (inclusive of price risk, currency risk and interest rate risk), credit risk and liquidity risk.

Financial risk management is carried out through internal control process adopted by the Manager and adherence to the investment restrictions as stipulated in the Deeds and GUTF.

**(a) Market risk****(i) Price risk**

This is the risk that the fair value of an investment in quoted securities will fluctuate because of changes in market prices (other than those arising from interest rate risk). The value of quoted securities may fluctuate according to the activities of individual companies, sector, and overall political and economic conditions. Such fluctuation may cause the Fund's NAV and prices of units to fall as well as rise, and income produced by the Fund may also fluctuate.

The price risk is managed through diversification and selection of quoted securities and other financial instruments within specified limits according to the Deeds.

**3. RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)****(a) Market risk (continued)****(ii) Currency risk**

Currency risk is associated with investments that are quoted and/or priced in foreign currency denomination. Foreign currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Manager will evaluate the likely directions of a foreign currency versus RM based on considerations of economic fundamentals such as interest rate differentials, balance of payments position, debt levels, and technical chart considerations.

**(iii) Interest rate risk**

Interest rate is a general economic indicator that will have an impact on the management of the Fund.

Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates.

The Fund's exposure to fair value interest rate risk arises from investment from money market instruments. The interest rate risk is expected to be minimal as the Fund's investments comprise mainly short-term deposits with approved licensed financial institutions.

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund is not exposed to cash flow interest rate risk as the Fund does not hold any financial instruments at variable interest rate.

As at the end of each financial period, the Fund is not exposed to a material level of interest rate risk.

**(b) Credit risk**

Credit risk refers to the risk that counterparty will default on its contractual obligation resulting in financial loss to the Fund.

The credit risk arising from placements of deposits with licensed financial institutions is managed by ensuring that the Fund will only place deposits in reputable licensed financial institutions.

For the amount due from stockbrokers, the settlement terms are governed by the relevant rules and regulations as prescribed by respective stock exchanges. The credit risk is minimal as all transactions in quoted securities are settled/paid upon delivery using approved stockbrokers.

For the amount due from Manager, the settlement terms of the proceeds from the creation of units receivable from the Manager are governed by the GUTF.

### 3. RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

#### (c) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations.

The Manager manages this risk by maintaining sufficient level of liquid assets to meet anticipated payments and cancellations of the units by unit holders. Liquid assets comprise bank balances and deposits with licensed financial institutions and other instruments, which are capable of being converted into cash within 7 business days. Generally, all investments are subject to a certain degree of liquidity risk depending on the nature of the investment instruments, market, sector, and other factors. For the purpose of the Fund, the Manager will attempt to balance the entire portfolio by investing in a mix of assets with satisfactory trading volume and those that occasionally could encounter poor liquidity. This is expected to reduce the risks for the entire portfolio without limiting the Fund's growth potential.

#### (d) Capital risk management

The capital of the fund is represented by net assets attributable to unit holders. The amount of capital can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unit holders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns to unit holders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

#### (e) Fair value estimation

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

The fair value of financial assets traded in active markets (such as trading securities) are based on quoted market prices at the close of trading on the financial period end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded market price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

##### (i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

3. RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(e) Fair value estimation (continued)

(i) Fair value hierarchy (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Investments whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include active listed equities. The Fund does not adjust the quoted prices for these instruments. The Fund's policies on valuation of these financial assets are stated in Note 2(b).

- (ii) The carrying values of cash and cash equivalents, amount due from Manager, amount due from Manager of collective investment scheme - Management fee rebate dividends receivable and all current liabilities are a reasonable approximation of their fair values due to their short-term nature.

4. MANAGEMENT FEE

In accordance with the Deeds, the Manager is entitled to a maximum management fee of 1.50% per annum calculated and accrued daily based on the NAV of the Fund.

For the financial period ended 30 April 2025, the management fee for Class MYR is 1.50% (30.04.2024: 1.50%).

**4. MANAGEMENT FEE (CONTINUED)**

There was no further liability to the Manager in respect of management fee other than amounts recognised above.

**5. TRUSTEE FEE**

In accordance with the Deeds, the Trustee is entitled to a maximum trustee fee of 0.05% per annum, calculated daily based on the NAV of the Fund. The Trustee fee includes the local custodian fees and charges but excludes the foreign sub-custodian fees and charges.

For the six months financial period ended 30 April 2025, the Trustee fee is recognised at the rate of 0.05% per annum (30.04.2024: 0.05% per annum) (including local custodian fee but excluding foreign sub-custodian fee).

There was no further liability to the Trustee in respect of Trustee's fee other than the amount recognised above.

TER	<u>0.78</u>	<u>0.78</u>

TER is derived from the following calculation:

$$\text{TER} = \frac{(A + B + C + D + E) \times 100}{F}$$

- A = Management fee
- B = Trustee fee
- C = Audit fee
- D = Tax agent's fee
- E = Other expenses excluding withholding tax
- F = Average NAV of the Fund calculated on a daily basis

The average NAV of the Fund for the financial period calculated on a daily basis is RM 174,236,547 (30.04.2024: RM166,002,458).
