Fund Manager's Report

The Fund rose 2.36% in October, underperforming the benchmark by 2.77ppt.

Global equity markets remained volatile in October, where ongoing supply chain disruptions, spiking energy costs and cost inflation complicated the macro backdrop and impacted investor sentiment. The fund performance over the month was driven by strong earnings beat in semiconductor portfolio holdings, accelerating 5G & data center capex, and structural tailwinds in applications & devices as digital transformation proliferates. We maintain our focus on a "stronger for longer" semiconductor industry, 5G network roll-out acceleration in the US, dollar content growth in 5G devices, 5G killer apps, and cloud digital transformation enablers.

While market volatility is likely to persist, we remain focused on areas with strong earnings tailwinds and visibility while avoiding sectors with uncertainties and headwinds. 5G is a national priority and digitalization of the economy is irreversible. We keep our focus on beneficiaries of the acceleration in 5G rollout especially in the US, a stronger for longer semiconductor industry, dollar content growth in 5G devices and industrial IoT, next generation 5G killer apps such as Metaverse, and the beneficiaries and enablers of digital transformation. We plan to take advantage of market dislocations to trade up for higher quality exposures where we see incremental positive outlook, better earnings power, and validation of our 5G investment thesis.

We recommend that you read and understand the contents of the Information Memorandum for the Principal Next -G Connectivity Fund dated 16 January 2021 which has been deposited with Securities Commission Malaysia before investing and that you keep the said Information Memorandums for your record. Any issue of units to which the Information Memorandums relates will only be made upon receipt of the completed application form referred to in and accompanying the Information Memorandums, subject to the terms and conditions therein.
