

Utamakan persaraan anda

Apabila ia melibatkan simpanan persaraan, anda pasti mahukan keyakinan bahawa anda telah memilih yang terbaik. Kami boleh membantu anda membuat keputusan yang dapat menenangkan minda anda.

Mengapa simpanan persaraan amat penting?

Jangka hayat yang lebih panjang

Rakyat Malaysia dijangka hidup melebihi 72 tahun¹. Ia bermakna anda mungkin hidup selama 12-17 tahun tanpa pendapatan aktif! Oleh kerana tempoh hayat individu semakin meningkat, kehabisan wang dalam persaraan adalah satu kemungkinan yang sebenar.

Melebihi inflasi

Seiring dengan masa, impak inflasi boleh menjadi ketara dan ia mungkin mengurangkan kuasa-beli anda. Peningkatan kos sara hidup dan penjagaan kesihatan adalah faktor penting yang perlu dipertimbangkan! RM1,000 pada hari ini akan susut nilainya berbanding dengan 10 tahun akan datang. Justeru it, adakah simpanan semasa anda cukup untuk menampung keperluan anda selepas bersara?

Kekurangan simpanan

2 daripada 3 ahli aktif KWSP adalah dijangka gagal mencapai pencen minimum sebanyak RM1,000 sebulan untuk menampung kehidupan aktif selepas bersara²

Take the lead on your retirement

When it comes to your retirement savings, you want to feel confident you're making the right choices. We can help you make informed decisions that you feel good about.

Why are retirement savings crucial?

Longer life span

Malaysians are expected to live beyond 72 years¹. That means you may live 12-17 years without an active income! As people live longer, running out of money in retirement is a real possibility.

Inflation challenge

Over the course of time, the impact of inflation can be significant and it may reduce your purchasing power. Rising costs of living and healthcare are important factors to consider! RM1,000 now will deflate significantly in 10 years. Will your current savings sustain you well after retirement?

Inadequacy of saving

2 out of 3 EPF active members are projected to fail to achieve the minimum pension of RM1,000 per month to support an active post retirement life².
