Investment policy and principal investment strategy	<p>The Fund seeks to provide sustainable positive total return and to grow the total investment over the long term with retirement as the ultimate goal.</p> <p>The Sub-Manager will construct a glide path that will guide the asset allocation of the Fund over the Fund's tenure until its Target Date. In constructing the glide path, the Sub-Manager will take into consideration various factors such as the human elements (e.g., Malaysian retirement landscape, life expectancy, average retirement age etc.) and market data (e.g., long term capital market assumption, market liquidity, inflation rate, interest rate etc.). The Fund's asset allocation will be guided by the glide path and it will shift dynamically and progressively from a more aggressive mix to a more conservative mix as the Fund approaches its Target Date. This gradual shift over time aims to produces an ideal asset allocation that rebalances throughout the tenure of the TDF that corresponds with investors' risk tolerance as they grow nearer to the Retirement Age, where investor will always be investing in an age-appropriate asset mix as they grow nearer to Retirement Age. Along the glide path, the Fund will generally comply with the general principles on the formulation of asset allocation for core funds as prescribed by the SC. The Sub-Manager will review the Fund's asset allocation periodically depending on the global economic and market outlook, while focusing on controlling and managing systematic risk for the Fund. The Fund is unconstrained in terms of regions and asset classes, where the Fund may invest globally in various asset classes as permitted by the GPRS. The allocation in each asset classes are not fixed, whereby the allocation may change along the Fund tenure and in response to the market condition from time to time as the Sub-Manager deem appropriate or necessary.</p> <p>The Sub-Manager and/or the Manager will adopt an active investment strategy with frequency that will depend on the market conditions and the market outlook. The Sub-Manager manages the Fund with strategic or long-term asset class targets and target ranges. There is a rebalancing strategy that aligns with the target weights to identify asset classes that are either overweight or underweight. The Fund may shift asset class targets in response to normal evaluative processes or changes in market forces or Fund circumstances. Currently, the Sub-Manager will seek exposure to the various asset classes by investing in CIS (including ETF and REITs) to achieve greater market exposure, diversification and for cost efficiency purposes.</p> <p>At any point in time in the future, the Manager may invest directly into the various asset classes as the Manager deem appropriate and at the Manager's discretion. Where the Fund invest in equities, the Fund may focus on dividend yielding equities of companies, which the Manager believes will offer attractive yields, sustainable dividend payments and/or will exhibit above average growth potential when compared to its industry or the overall market at the point of purchase. Where the Fund invest in debt securities, the</p>

How Does the Scheme Work?

PRS is a voluntary scheme designed to help you build your nest egg for retirement. You can personalize and select a combination of the Funds that best suits your risk and return preference. You decide how much, how often and what Fund to invest in based on your retirement goals.

Contribution

All contributions made by or on behalf of you will be split upon each contribution being made and maintained in two (2) separate sub-accounts as follows:

- Sub-account A holds 70% of all contributions made to any of the Funds.
- Sub-account B holds 30% of all contributions made to any of the Funds.

Investment Option

You may choose to:

- **Do-It-Myself:** You can contribute to the Scheme by selecting any one or a combination of the Funds based on your preferred risk and return profile until retirement.
- **Do-It-For-Me (Default Option):** This is the best choice if you are unsure which Fund suits you the most. We will allocate your contributions into one of the Core Funds based on your year of birth as listed in the table below. By this, you will be investing in a fund that offers an age-appropriate risk and return profile based on your current age.

Core Funds	Year of birth	Expected year of retirement*
RE60	1996 – 2005	2051 – 2060
RE50	1986 – 1995	2041 – 2050
RE40	1976 – 1985	2031 – 2040
RE30	1968 – 1975	2023 – 2030
REI	On or before 1967	N/A - Retired

* Based on the Retirement Age.

Cooling-Off Period

You have six (6) Business Days after your initial contribution (i.e. the date the complete application is received and accepted by us or our Distributors) to reconsider the appropriateness and suitability for your investment needs. Within this period, you may withdraw your investment at the same NAV per unit when the units were purchased or prevailing NAV per unit at the point of cooling-off (whichever is lower) (“Refund Amount”). We must obtain prior authorization of the PPA before proceeding with the refund. We will pay the Refund Amount including the Sales Charge (if any) to you in RM within seven (7) Business Days of receiving the authorization

of the PPA. Please note that this cooling-off right is only given to a first time Member registered with PPA who is investing with any PRS provider. However, Principal Malaysia's staff, person(s) registered by a body approved by the SC to deal in PRS and contributions made to PRS by an employer on behalf of the employee are not entitled to the cooling-off right.

Permitted Withdrawals and Pre-Retirement Withdrawals

Subject to permitted reasons for withdrawals, you may not make a withdrawal from any of the Funds until you reach the Retirement Age. Upon reaching the Retirement Age, you shall be entitled to withdraw the full amount accumulated in the Funds held by you as Accrued Benefits without payment of any tax penalty. Request for payment for withdrawals from any of the Funds may be made for the following circumstances and as follows:

No	Circumstances for withdrawal	Sub-account	Extend of withdrawals	Subject to tax penalty
(a)	Upon reaching Retirement Age	A & B	Partial or full	No
(b)	Pre-retirement withdrawals	B	Partial or full	Yes
(c)	Death of Member	A & B	Partial or full	No
(d)	Permanent departure of a Member from Malaysia	A & B	Full	No
(e)	Due to permanent total disablement, serious disease or mental disability of a Member	A & B	Full	No
(f)	For healthcare purpose	B	Partial or full	No
(g)	For housing purpose	B	Partial or full	No

Upon receiving your request to withdraw some or all of the Accrued Benefits in any of the Fund, we and/or PPA may require you to provide evidence of the facts necessary to establish your right to withdraw moneys from any of the Fund. In relation to

- item (c), (e), (f) and (g) – we must obtain prior authorization from the PPA before issuing instructions to the Trustee to cancel Units.
- item (b), (f) and (g) – withdrawals may be requested by the Member once every calendar year from each PRS provider (from one or multiple funds under any scheme managed by that PRS provider) provided that the individual has been a Member of that scheme for at least one (1) year.
- item (b) – we will deduct an 8% tax penalty (or such other applicable tax penalty) from the withdrawn amount before making payment to you.
- item (f) – the withdrawal is only permitted for Member's ownself or immediate family on certain illnesses.

We will pay the withdrawal proceeds within seven (7) Business Days after we receive a complete withdrawal request from you and, where required, the authorization of the PPA.

Switching

Subject to our absolute discretion, you have the option to switch into any of the Funds under the Scheme or funds under Principal Islamic PRS Plus. Switching is limited to once a month only regardless of whether it is switching of funds under the Scheme or switching between funds of different PRS managed by Principal Malaysia and switching is not allowed between different classes. Ask about switching before you withdraw.

Transfer between PRS Providers

Prior to reaching the Retirement Age, you are allowed to transfer your accrued benefits of any amount from one (1) or multiple funds under the scheme(s) managed by that PRS provider once every calendar year to another PRS provider provided that:

- you have been a Member of the scheme for at least one (1) year; and
- all the accrued benefit to be transferred from a fund must be transferred to one (1) other fund.

The above also applies if you transfer from any funds under schemes of other PRS providers into any Funds under the Scheme. All information required by the PPA is to be provided in the application for the transfer. Unless the context stated otherwise, all withdrawal and/or transfer transactions are only allowed for Vested Units.

What other taxes apply?

- Tax relief up to RM3,000 per annum will be given for an individual's contribution to the PRS*.
- Employers will also be given tax deduction on contributions to PRS made on behalf of their employees of up to 19% of the employees' remuneration.

*For PRS contributions and deferred annuities effective from years of assessment 2012 to 2030, subject to terms and conditions and/or any amendment/modifications as may be imposed/required by the government or relevant authorities from time to time.

Key Risks

General risks of investing in the funds	
Returns and capital not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment which includes your investment capital and returns, nor any assurance that the fund's investment objective will be achieved. You should also note that the fund is neither a capital guaranteed fund nor a capital protected fund. However, we reduce this risk by ensuring diligent management of the assets of the fund based on a structured investment process.
Legal risk and regulatory risk	The value of the fund may be affected by uncertainties in the legal and regulatory environment. A change in law or regulation made by government or regulatory body will materially impact the value of securities, business, sector or even market as a whole. These amendments to the laws and regulations may increase the costs of operating a business and hence reduce the attractiveness of its related investments. For example, if the regulatory body imposes a limit on the amount of margin an investment account is able to have, the impact on the stock

	market would be material as this change may force the existing investors who are currently breaching the limit to sell off their margined positions. You should also note that laws and guidelines relating to PRS may change and this may affect your PRS account and/or your ability to access your account balance.
Market risk	Refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Risk associated with Default Option	If you selected the Default Option, we will allocate you into one of the Core Funds based on your year of birth, which aims to match with the expected year of retirement. If you are allocated into a TDF, your investment balance will be automatically switched into the REI when the TDF matures on its Target Date. The NAV per unit of TDF may be lower at the point of switching than the NAV per unit when you initially contributed into the TDF. Hence, you may suffer losses relating to your investment costs upon disposal. We will notify you one (1) month before the TDF matures on its Target Date that your current investments will be automatically switched into the REI.
Liquidity risk	Liquidity risk refers to the ease of liquidating an asset without causing market dislocation. This depends on the supply and demand as well as the asset's volume or amount traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund and consequently the value of Member's investment in the Fund, will be negatively affected when the Fund has to sell such assets at unfavourable prices. In the case where the Fund is invested into unlisted CIS, the Fund may be negatively impacted due to liquidity policy applied by the CIS (e.g. suspension during exceptional situations).
Inflation risk	Your investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased. This risk can be mitigated by investing in securities that can provide a positive real rate of return.
Manager risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund. Although the occurrence of such events is very unlikely, we seek to reduce this risk by implementing a consistent and structured investment process, systematic operational procedures and processes along with stringent internal controls.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments. In the event units are used as collateral and if the prices of units fall below a certain level due to market conditions, you may be required to pay additional amounts on top of your normal instalment. If you fail to comply within the time prescribed, your units may be sold at an unfavourable price and the proceeds thereof will be used towards the settlement of your financing.

Specific risks associated with the investment portfolio of the Funds	RE60, RE50, RE40, RE30	REI
Stock specific risk Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV. The impact is however reduced as the Fund invests in a wide portfolio of investments; thus, spreading the element of risk. Diversification can be achieved by investing in various companies across different industries or sectors that are uncorrelated. In addition, we will undertake an active bottom-up investment approach to ensure that the fundamentals of the stocks invested in are favourable.	√	√
Credit and default risk The Fund will be exposed to a certain degree of credit and default risk of issuers or counterparties when the Fund invests in Deposits, debt securities, such as bonds, and/or conducts over-the-counter transactions. Credit risk relates to the creditworthiness of the securities issuers or counterparties and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer or counterparties may impact the value as well as liquidity of the investments. Default risk relates to the risk that a securities issuer or counterparties either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investments. This could adversely affect the value of the Fund. We aim to mitigate this risk by performing bottom-up and top-down credit research and analysis to determine the creditworthiness of its issuers or counterparties, and impose investment limits on exposures for issuers or counterparties with different credit profiles as a precautionary step to limit any loss that may arise directly or indirectly as a result of a defaulted transaction. In addition, we impose a minimum credit rating requirement as rated by either local and/or foreign rating agencies and manages the duration of the investment in accordance with the objective of the Fund. Please refer to the investment strategy of the respective Funds for more information.	√	√
Interest rate risk Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income securities and money market instruments. When interest rates rise, fixed income instruments' prices will tend to fall and vice versa. Therefore, the NAV of the Fund may also tend to fall when interest rates rise or are	√	√

Specific risks associated with the investment portfolio of the Funds	RE60, RE50, RE40, RE30	REI
expected to rise. However, you should be aware that should the Fund hold a fixed income instruments until maturity, such price fluctuations would dissipate as it approaches maturity.		
Country risk Investments of the Fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or price of units to fall. To mitigate these risks, we will select securities that spread across various countries. The decision on diversification will be based on constant fundamental research and analysis of the global markets.	√	√
Currency risk This risk is associated with investments that are quoted and/or priced in foreign currency denomination. You should be aware that if the RM appreciates against the currencies in which the portfolio of the investment is denominated, this will have an adverse effect on the NAV of the Fund and vice versa. You should note that any gains or losses arising from the movement of the foreign currencies against the base currency of the Fund (i.e. RM) may therefore increase/decrease the capital gains/losses of the investment. The currency gains/losses are in addition to the capital gains/losses of the investment. Nevertheless, you should realise that currency risk is considered as one of the major risks to investments in foreign assets due to the volatile nature of the foreign exchange market. We may utilise a two-pronged approach in order to mitigate the currency risk; firstly, by spreading the investments across differing currencies (i.e. diversification) and secondly, by hedging the currencies when it is deemed necessary.	√	√
Risks associated with investment in warrants/options There are inherent risks associated with investment in warrants/options. The value of warrants/options are influenced by the current market price of the underlying security, the exercise price of the contract, the time to expiration of the contract and the estimate of the future volatility of the underlying security's price over the life of the contract. Generally, the erosion in value of warrants/options accelerates as it approaches its expiry date. Like securities, we will undertake fundamental research and analysis on these instruments with an aim to mitigate its risks.	√	√
Risk associated with investment in CIS Since the Fund may invest into CIS, there is a risk of concentration into CIS, in which the CIS's management company has absolute discretion over the CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the CIS and/or the management company, the NAV of the Fund, which invests into those CIS would be affected negatively. Should the situation arise, we will seek for another CIS that is consistent with the objective of the Fund.	√	√
Risk associated with unconstrained portfolio The Fund has a flexible asset allocation into the underlying assets and does not adhere to any benchmark index composition. The Manager has the full flexibility and discretion to determine the asset classes or sectors to be invested into and their weightages at any point in time based on the glide path, taking into consideration factors such as the economic outlook and market conditions to pursue return opportunities across asset classes or sectors. There is no guarantee that the asset allocation decision made by the Manager and/or Sub-Manager will always lead to positive returns. If the Manager and/or Sub-Manager makes an incorrect asset allocation decision, the Fund's performance may be adversely affected. Notwithstanding, the Fund will invest in assets that are consistent with the objective of the Fund, and it will be managed in accordance with our internal guidelines, subject to the requirements under GPRS.	√	√
Risk associated with TDF Despite the investment strategy for each of the TDF may look identical, they are with different Target Date and may have very different asset allocations that can affect the risk-return profile at any given point in time. You are advised to invest in a TDF with Target Date that closely corresponds to your expected year of retirement. This will allow you to participate in a portfolio that has an asset allocation which will be periodically adjusted to offer a risk-return profile that corresponds to your current age. Investing in a TDF with Target Date that does not closely match your retirement profile is not recommended as its risk-return profile may not be suitable to you. Even though TDFs are generally designed to become more conservative as the Target Date approaches, investment risk exists throughout the lifespan of the TDF. Also, reaching the Target Date does not necessary mean you have saved enough for retirement. You are advised to understand your retirement needs, choose a suitable TDF and invest consistently, as needed, to achieve your retirement goal. Please refer to "About the Funds" section for more information.	√	X
The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Funds and are not set out in any particular order of priority. If in doubt, you should consult professional advisers for a better understanding of the risks.
