Brief Information on Principal Singapore Equity Fund

The Fund is a feeder fund issued by Principal Malaysia.

The Fund aims to provide capital growth and income through investments in one collective investment scheme ("CIS"). The Fund is established as a multi-class fund and is allowed to establish new Class(es) from time to time without your prior consent.

This is neither a capital protected fund nor a capital guaranteed fund.

Product Suitability

The Fund best suits you if you:

- have a long term investment horizon;
- want a diversified portfolio through investment in the Singapore market;
- seek for capital growth and income; and
- can accept that returns may fluctuate over the investment period.

Key Product Features

Fund Category/Type	Feeder fund / Growth & income.
Base currency	SGD
Benchmark	<p>The Fund adheres to the benchmark of the Target Fund for performance comparison only. The performance comparator of the Target Fund is the Straits Times Index.</p> <p>* Any changes to the Target Fund's benchmark will be updated in our website and/or the Fund's Product Highlights Sheet.</p>
Investment Strategy	<p>The Fund is a feeder fund that invests into a single CIS, i.e. Schroder Singapore Trust ("Target Fund"). The Fund may also invest in liquid assets for liquidity purposes.</p> <p>In order to achieve its objective, the Fund will invest at least 85% of its NAV in the Target Fund, a fund established on 1 February 1993 managed by Schroder Investment Management (Singapore) Ltd. The Fund may also invest up to 15% of its NAV in liquid assets for liquidity purposes and derivatives for the sole purpose of hedging arrangement.</p> <p>We may utilize derivative instruments for hedging purposes and in the event of a rating downgrade of a counterparty of an OTC derivative below the rating prescribed in the GUTF, we reserve the right to deal with the OTC derivative in the best interest of the Unit holders.</p> <p>The Fund will be actively rebalanced from time to time to meet sales and withdrawal transactions. This is to enable a proper and efficient management of the Fund. As this is a feeder fund, we do not intend to take temporary defensive position for the Fund during adverse market, economic and/or any other conditions. This is to allow the Fund to mirror the performance of the Target Fund in either bullish or bearish market conditions. The Target Fund Manager may take temporary defensive position when deemed necessary.</p> <p>We do not employ risk management strategy on the portfolio of the Target Fund. However, the Target Fund Manager will employ a risk management process in respect of the Target Fund that enables the Target Fund Manager to monitor and measure at any time the risk of the positions and their contribution to the overall risk profile of the Target Fund. Please refer to section 2 of the Prospectus for more information on the Target Fund.</p> <p>We will employ risk management strategy at the Fund level, where we will continuously monitor the objective, performance and suitability of the Target Fund to ensure that it is in line with the objective of the Fund. If we are of the opinion that the Target Fund no longer meets the Fund's objective, we may, with your approval, replace the Target Fund with another CIS that is in line with the Fund's objective. In such circumstances, we will redeem our investment in the Target Fund and invest in another CIS on a staggered basis for a smooth transition, if the Target Fund imposes any conditions in relation to redemption of units or if the manager of the newly identified target fund exercises its discretion to apply anti-dilution levy* in relation to the applications for units. Thus, the time frame required to perform the transition will depend on such conditions, if any, imposed by the Target Fund as well as any conditions associated with a dilution adjustment that may be made by the newly identified target fund. Hence during the transition period, the Fund's investments may differ from the stipulated objective, investment strategies and/or investment restrictions and limits.</p> <p>Currently, the Fund invests in Class SGD A Distribution Units of the Target Fund, which is a share class denominated in SGD launched on 1 February 1993. The Fund may change its entire investment into another class of the Target Fund (which must be denominated in the same currency) if we are of the</p>

	opinion that the change is in the interest of the Unit holders. If we wish to effect such change, we will seek concurrence from the Trustee and you will be notified before implementation.

Key Risks

General risks of investing in a fund	
Returns and capital not guaranteed	The investment of the Fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment which includes your investment capital and returns, nor any assurance that the Fund's objective will be achieved. You should also note that the Fund is neither a capital guaranteed fund nor a capital protected fund. However, we reduce this risk by ensuring diligent management of the assets of the Fund based on a structured investment process.
Market risk	This risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
Inflation risk	This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments. In the event units are used as collateral and if the prices of units fall below a certain level due to market conditions, you may be required to pay additional amount on top of your existing instalment. If you fail to do so within the time prescribed, your units may be sold at an unfavourable price and the proceeds thereof will be used towards the settlement of your financing.
Manager risk	This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager, as a result of any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
Liquidity risk	Liquidity risk refers to the ability to sell and convert the units held in the CIS into cash. This may be affected by the liquidity policy applied by the CIS (e.g. suspension of the CIS), which may negatively impact the Fund and Unit holders may experience delay in the withdrawal process.
Specific risks related to the Fund	
Currency risk	<p>You should be aware that currency risk is applicable to Class(es) which is denominated in a different currency than the base currency of the Fund. The impact of the exchange rate movement between the base currency of the Fund and the currency denomination of the respective Class(es) may result in a depreciation of the value of your holdings as expressed in the currency denomination of the respective Class(es).</p> <p>As for a hedged Class, the hedged Class itself provides mitigation to the currency risk arising from the difference between the currency denomination of the Class and the base currency of the Fund. While we aim to fully hedge the currency risk for a hedged Class, you should note that it may not entirely eliminate currency risk. In addition, you should note that, as a result of hedging, a hedged Class will not be able to enjoy the full benefits of the currency movement in the event of a favourable movement of the currency</p>

	denomination of the hedged Class against the base currency of the Fund. You should also note that hedging incurs costs, in which will impact the NAV of a hedged Class.
Target Fund Manager's risk	Since the Fund invests into a CIS that is managed by another manager, the Target Fund Manager has absolute discretion over the Target Fund's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Target Fund, the NAV of the Fund, which invests into the Target Fund, may be affected negatively. Although the probability of such occurrence is minute, should the situation arise, we reserve the right to seek for an alternative CIS that is consistent with the objective of the Fund, subject to your approval.
Country risk	As the Fund invests in the Target Fund, which is domiciled in Singapore, the Fund's investments in the Target Fund may be affected by risks specific to Singapore. Such risks include adverse changes in Singapore's economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may have an adverse impact on the price of the Target Fund and consequently the Fund.

Specific risks related to the Target Fund

As the Fund invests predominantly in the Target Fund, the Fund also assumes the risks associated with the Target Fund, which include but not limited to the following:

- Market risk
- Equity risk
- Currency risk
- Financial derivatives risk

For more details, please refer to "Risk Factors" section of the Prospectus. The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Fund and are not set out in any particular order of priority. You should be aware that an investment in a unit trust fund may be exposed to other risks from time to time. If in doubt, please consult your professional advisers for a better understanding of the risks.

Note: If your investments are made through an IUTA via a nominee system of ownership, you would not be deemed to be a Unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).
