Key Risks

General risks of investing in a unit trust fund	
Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.
Manager's risk	This risk refers to the day-to-day management of the fund by us which will impact the performance of the fund, e.g. Investment decisions undertaken by us as a result of an incorrect view of the market may adversely affect the performance of the fund.
Loan financing risk	This risk occurs when investors finance their investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments.
Specific risks of the Fund	
Interest rate risk	Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the fund's investment in debt instruments.
Mismatch risk	This risk refers to the non-matching of the maturity date of the Fund and that of the debt instruments it holds. The Fund may invest in some debt instruments with maturity exceeding or shorter than the maturity date of the Fund. The difference in debt instruments maturity relative to the maturity date of the Fund may result in the Fund being unable to meet its projected rate of return.
Liquidity risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
Credit and default risk	Credit risk relates to the creditworthiness of the issuers of the debt instruments and their expected ability to make timely payment of interest and/or principal. Default risk relates to the risk that an issuer of a debt instrument either defaulting on payments or failing to make payments in a timely manner. If the risk materialize, the value of the fund could be adversely affected.
Redemption risk	In the event of large redemptions, including withdrawal of your units by us to ensure that we comply with any relevant laws, regulations and guidelines, the Fund may need to dispose some of the debt instruments to fulfil redemption obligations. If the debt instruments are sold when interest rates rise or are expected to rise, the price of the debt instruments will fall. This in turn would depress the NAV of the Fund. The Fund discourages redemptions by imposing a Withdrawal Penalty which is ploughed back to the Fund.
Country risk	Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the Fund's NAV.
Currency risk	As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Early termination risk	During the Offer Period, we reserve the right, with the consent of Trustee, to terminate the Fund earlier than the Maturity Date and return to Unit holders the Initial Offer Price per unit and the Application Fee paid in the event that the sales proceeds/amount collected of the Fund at the expiry of the Offer Period is below RM50 million or when the expected return of the Fund does not or may not match or exceed the Fund's benchmark. In accordance with the provisions of the Deed, early termination may also take place after the Offer Period if we are of the opinion that by doing so is in the best interest of the Unit holders.
-------------------------------	--

Note: Please take note that if your investments are made through an IUTA via a nominee system of ownership, you would not be deemed to be a Unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).

Valuations

We will value the Fund on weekly basis; i.e. every Monday. The Fund's valuation point for Monday will be by 4:00 p.m. on the next Business Day as the Fund has exposure to investments outside Malaysia. This is to cater for the currency translation of the foreign securities or instruments to the Funds' base currency. Currently, the currency translation is based on the bid exchange rate quoted by Bloomberg or Reuters at UK time 4:00 p.m. (Malaysian time 11:00 p.m. or 12:00 a.m.) on the same day, or such other time as stipulated in the IMS. The NAV per unit for Monday is available on our website at <http://www.principal.com.my> after 5:30 p.m. on the following Business Day (T+1). If Monday is a non-Business Day, the Fund will be valued on the next Business Day. Please refer to the "Unit Pricing" section of the Prospectus for more information.

Avenue to Exit This Investment

To exit from this investment, you may withdraw from the Fund or transfer your unit holdings to other investors. With the exception of withdrawal during the offer period, you may withdraw your investment on weekly basis, i.e. every Monday at the NAV per unit of the Business Day. Please note that if you withdraw during the offer period, the Application Fee will not be refunded to you, except in the case of cooling-off period.

Withdrawals can be made by completing a withdrawal form and sending it to the relevant Distributors or our head office. With the exception of withdrawal during the Offer Period, you are only allowed to redeem your units in the Fund every Monday with a Withdrawal Penalty charged prior to the maturity date. Hence, the amount that you will receive is calculated by the withdrawal value less the Withdrawal Penalty, if any. You will have to bear the applicable bank fees and charges, if any.

For more information on the withdrawals, switching, transfer facility and cooling-off period, please refer to the "Transaction Information" chapter of the Prospectus. For more information on the fees and charges incur when you exit from this investment, please refer to "Fees, Charges and Expenses" chapter of the Prospectus.
