Chief Executive Officer

MANAGER'S REPORT

FUND OBJECTIVE AND POLICY

What is the investment objective of the Fund?

The Fund aims to provide long term total returns through investments in one collective investment scheme, which is managed with low to medium risk strategy by investing primarily in bonds and shares, either directly or through investing into other funds.

Has the Fund achieved its objective?

For the financial year under review, the Fund has achieved its objectives as stated under the Fund investment policy.

What are the Fund investment policy and principal investment strategy?

The Fund is a feeder fund and it invests in a single collective investment scheme, i.e. HSBC Portfolios - World Selection 2 ("HSBC-WS2"). The Fund may also invest in liquid assets for liquidity purpose.

In order to achieve its investment objective, the Fund will invest at least 95% of its Net Asset Value ("NAV") in HSBC-WS2; a portfolio established on 20 October 2009 under the HSBC Portfolios ("Company"). The Fund will also maintain up to 5% of its NAV in liquid assets for liquidity purposes.

The asset allocation strategy for this Fund is as follows:

- At least 95% of the Fund's NAV will be invested in HSBC-WS2; and
- Up to 5% of the Fund's NAV will be invested in liquid assets for liquidity purposes.

MARKET REVIEW (1 SEPTEMBER 2020 TO 31 AUGUST 2021)

In September 2020, following the initial rebound in activity that occurred as economies began to reopen from strict lockdowns seen earlier in the year, conditions for the global economy have continued to improve, albeit at a slower pace, as we see the economy entering the flatter part of a “swoosh” type of recovery. Mobility data already showed this slowing recovery in the third quarter, and the previous strength in consumer spending driven by the goods sector, is also starting to slow. MSCI US and Europe retraced 4.42% and 1.47% respectively during the month.

In October 2020, the COVID-19 crisis and the associated lockdown measures, led to an abrupt slump in demand. Demand and consumer confidence have since staged a recovery, and we see this continuing at a rate that is dependent on concerns about the potential for renewed restrictions and associated financial stress. Developed markets continued to retrace as MSCI US and Europe fell by 1.95% and 5.10% respectively during the month.

In November 2020, global equities rebounded strongly due to positive developments in vaccine efficacy. Investor optimism returned in US amid the outcome of the presidential election. Eurozone shares also surged during the month on vaccines supported shares, with the eurozone a particular beneficiary given the region’s high exposure to global trade. Developed markets rallied on the recovery of economic activity and earnings as MSCI US and Europe increased by 17.03% and 13.82%, respectively.

In December 2020, markets looked through rising COVID-19 infection rates, as risk sentiment was supported by continued positive vaccine news, the announcement of a fresh fiscal relief package in the US and the agreement of a post-Brexit trade deal between the United Kingdom (“UK”) and the European Union (“EU”).

MARKET REVIEW (1 SEPTEMBER 2020 TO 31 AUGUST 2021) (CONTINUED)

The first month of 2021 saw financial markets grapple with the interplay between increased vaccine roll-outs and the emergence of new strains of COVID-19. January 2021 also saw a brief period of heightened volatility, as several companies targeted by retail traders experienced outsized moves in their share prices.

February 2021 saw markets positioning for earlier than expected rises in central bank interest rates, reflected in a sell-off in government bonds. Equities saw modest gains overall with a considerable portion of the strong progress they had made through the month being tempered by the sharp rise in yields seen at the end of the period.

Global equities rose in March 2021 as investors continued to price in a brightening global economic outlook, despite fresh concerns of lockdowns in Europe. The market remains in the restoration phase of the economic cycle, with activity still below pre-COVID levels in major economies, other than China. Hidden unemployment, fragile confidence and COVID-19 risks mean the global economy needs ongoing policy support. Global central banks continue to expand balance sheets and deploy lower-for-even-longer interest rates. Compared to the West, monetary policy in China is set to become relatively hawkish. Across Asia, incremental stimulus will be more limited.

In April 2021, global equities made further gains amid upbeat global recovery prospectus and the US Federal Reserve (the “Fed”) reassurance. The market is still in the restoration phase of the economic cycle, with activity below pre-Covid levels in major economies, apart from China. The ongoing COVID-19 risks mean the global economy is dependent on policy support. Across Asia, incremental stimulus will be limited due to inflation pressures.

Global markets rose marginally in May 2021 as the US is leading the recovery, boosted by supportive fiscal policy. Meanwhile, Europe’s vaccine rollout gathers pace and many Emerging Markets (“EM”) continued to struggle to control the virus so far. Finally, China and North Asian economies have largely recovered after suppressing the COVID-19. In the short-term, inflation numbers are likely to remain elevated given: energy price rises, supply chain disruption, and base effects, however the longer-term inflation outlook still remains muted. Most importantly, the Fed’s policy framework implies a willingness to look through these short-term Consumer Price Index (“CPI”) increases, and delay interest rate rises.

In June 2021, the recovery in the US has been boosted by supportive fiscal policy while Europe is likely to perform well in the coming quarters as its vaccine rollout is now back on track. On the other hand, EM have started to take control of the spread of the virus, suggesting stronger growth going forward. Lastly, China has tightened credit conditions in order to tilt their economy away from growth and towards financial stability.

In July 2021, the market continues to enter the expansion phase of the economic cycle with China and the US leading the way, and have already recovered to pre-pandemic levels. The Fed has signalled rate increases in 2023, as the economy is making progress towards its economic objectives. On the other hand, Emerging Market policy makers face more significant constraints due to inflation pressures.

Global equities delivered positive returns in August 2021 whilst the post pandemic recovery has reached its apex. The MSCI All Country World Index (“ACWI”) global equity index were mostly positive, gaining 3.55%. Global central banks remain committed to supporting the recovery. Meanwhile, the UK has now entered a phase of strong catch-up growth given its broken link between cases and hospitalisation, despite it is prone to greater upside risk to inflation relative to the Eurozone.

MARKET OUTLOOK*

The post-COVID recovery is reaching its apex with stimulus fading, shortage of labour and good weighing on activity, and inflation exceeding expectation. China and the US have already recovered to pre-pandemic levels, whilst the other Developed Markets (“DM”)s and EMs are likely to outperform in coming quarters as they catch up. The recovery in the US has been boosted by supportive fiscal policy while Europe is likely to perform well in the coming quarters as its vaccine rollout is back on track. The policy in China has become more neutral following a period of credit tightening. This impact the EM negatively amid low global goods consumption and the spread of the Delta variant. In the short-term, inflation numbers in developed markets are likely to remain high as the economy re-opens.

However, the long-term inflation outlook is likely to be controlled as inflation could still converge back to the Fed’s 2% target. The Fed has signaled rate increases in 2023, as the economy is making progress towards its economic objectives. On the other hand, emerging market policy makers face more significant constraints due to inflation pressures. The European Central Bank (“ECB”) is likely to lag the Fed but the Bank of England (“BoE”) could lead it. The key downside risks to the global recovery are vaccine-resistant strains impacting market sentiment, vaccine complacency, or stimulus fatigue leading to the early withdrawal of stimulus support. Short term increases in inflation may trigger a bond market sell-off.

**TRUSTEE'S REPORT TO THE UNITHOLDERS OF
PRINCIPAL WORLD SELECTION MODERATE CONSERVATIVE FUND**

We have acted as Trustee of Principal World Selection Moderate Conservative Fund (the "Fund") for the financial year ended 31 August 2021. To the best of our knowledge, Principal Asset Management Berhad (the "Manager"), has operated and managed the Fund in accordance with the following:-

- a) limitations imposed on the investment powers of the Manager and the Trustee under the Deed, the Securities Commission's Guidelines on Unlisted Capital Market Products under the Lodge and Launch Framework, the Capital Markets and Services Act 2007 and other applicable laws;
- b) valuation/pricing is carried out in accordance with the Deed and any regulatory requirements; and
- c) creation and cancellation of units are carried out in accordance with the Deed and any regulatory requirements.

During this financial year, a total distribution of 1.73 cent per unit (gross) for AUD-Hedged Class, 1.80 cent per unit (gross) for GBP-Hedged Class, 1.81 cent per unit (gross) for MYR-Hedged Class, 1.63 cent per unit (gross) for SGD-Hedged Class and 1.84 cent per unit (gross) for USD Class have been distributed to the unitholders of the Fund respectively. We are of the view that the distributions are not inconsistent with the objective of the Fund.

**INDEPENDENT AUDITORS' REPORT TO THE UNIT HOLDERS OF
PRINCIPAL WORLD SELECTION MODERATE CONSERVATIVE FUND**

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Principal World Selection Moderate Conservative Fund (the "Fund"), which comprise the statement of financial position as at 31 August 2021 of the Fund, and statement of comprehensive income, statement of changes in net assets attributable to unit holders and statement of cash flows of the Fund for the financial year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages 21 to 49.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund as at 31 August 2021, and of its financial performance and cash flows for the year then ended in accordance with Malaysian Financial Reporting Standards and International Financial Reporting Standards.

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence and other ethical responsibilities

We are independent of the Fund in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By-Laws") and the International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

**INDEPENDENT AUDITORS' REPORT TO THE UNIT HOLDERS OF
PRINCIPAL WORLD SELECTION MODERATE CONSERVATIVE FUND (CONTINUED)**

Report on the audit of the financial statements (cont'd.)

Information other than the financial statements and auditors' report thereon

The Manager of the Fund (the "Manager") is responsible for the other information. The other information comprises the information included in the annual report of the Fund, but does not include the financial statements of the Fund and our auditors' report thereon.

Our opinion on the financial statements of the Fund does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Fund, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Fund or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Manager for the financial statements

The Manager is responsible for the preparation of financial statements of the Fund that give a true and fair view in accordance with Malaysian Financial Reporting Standards and International Financial Reporting Standards. The Manager is also responsible for such internal control as the Manager determines is necessary to enable the preparation of financial statements of the Fund that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Fund, the Manager is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to liquidate the Fund or to cease operations, or have no realistic alternative but to do so.

The Trustee is responsible for overseeing the Fund's financial reporting process. The Trustee is also responsible for ensuring that the Manager maintains proper accounting and other records as are necessary to enable true and fair presentation of these financial statements.

**INDEPENDENT AUDITORS' REPORT TO THE UNIT HOLDERS OF
PRINCIPAL WORLD SELECTION MODERATE CONSERVATIVE FUND (CONTINUED)**

Report on the audit of the financial statements (cont'd.)

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Fund as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements of the Fund, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.
- Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Fund or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements of the Fund, including the disclosures, and whether the financial statements of the Fund represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other matters

This report is made solely to the Unit Holders of the Fund, as a body, in accordance with the Guidelines on Unlisted Capital Market Products under the Lodge and Launch Framework, the Capital Markets and Services Act 2007 issued by the Securities Commission Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 AUGUST 2021**

1. THE FUND, THE MANAGER AND ITS PRINCIPAL ACTIVITIES

Principal World Selection Moderate Conservative Fund (the “Fund”) was constituted pursuant to the execution of a Principal Master Deed dated 9 May 2019 (referred to as the “Deed”) between Principal Asset Management Berhad and HSBC (Malaysia) Trustees Berhad (the “Trustee”).

The Fund aims to provide long term total returns through investments in one collective investment scheme, which is managed with low to medium risk strategy by investing primarily in bonds and shares, either directly or through investing into other funds.

The Fund is a feeder fund and it invests in a single collective investment scheme, i.e. HSBC-WS2. The Fund may also invest in liquid assets for liquidity purpose.

In order to achieve its investment objective, the Fund will invest at least 95% of its NAV in HSBC-WS2; a portfolio established on 20 October 2009 under the HSBC Portfolios (“Company”). The Fund will also maintain up to 5% of its NAV in liquid assets for liquidity purposes.

The asset allocation strategy for this Fund is as follows:

- At least 95% of the Fund’s NAV will be invested in HSBC-WS2; and
- Up to 5% of the Fund’s NAV will be invested in liquid assets for liquidity purposes.

All investments are subjected to the Securities Commission Malaysia (“SC”) Guidelines on Unlisted Capital Market Products under the Lodge and Launch Framework, SC requirements, the Deeds, except where exemptions or variations have been approved by the SC, internal policies and procedures and the Fund’s objective.

The Manager is a joint venture between Principal Financial Group®, a member of the FORTUNE 500® and a Nasdaq-listed global financial services and CIMB Group Holdings Berhad, one of Southeast Asia’s leading universal banking groups. The principal activities of the Manager are the establishment and management of unit trust funds and fund management activities.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements:

(a) Basis of preparation

The financial statements have been prepared in accordance with the provisions of the MFRS as issued by the Malaysian Accounting Standards Board (“MASB”) and IFRS as issued by the International Accounting Standards Board (“IASB”).

The financial statements have been prepared under the historical cost convention, as modified by financial assets at fair value through profit or loss.

The preparation of financial statements in conformity with MFRS and IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported year/period.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 2(n).

There are no other standards, amendments to standards or interpretations that are effective for financial year beginning on 1 September 2020 that have a material effect on the financial statements of the Fund.

None of the standards, amendments to standards or interpretations that are effective for the financial year beginning on/after 1 September 2021 are applicable to the Fund.

(b) Financial assets and financial liabilities

Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those to be measured at amortised cost.

The Fund classifies its investments based on both the Fund’s business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets’ performance and to make decisions.

The contractual cash flows of the Fund’s investments are solely principal and interest. However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund’s business model’s objective. Consequently, all investments are measured at fair value through profit or loss.

Investment in collective investment scheme has debt instrument with contractual cash flow that do not represent solely payment of principal and interest (“SPPI”) and therefore are classified as fair value through profit or loss.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(b) Financial assets and financial liabilities

Classification (continued)

The contractual cash flows of the Fund's investments are solely principal and interest. Derivatives are financial assets/liabilities at fair value through profit or loss unless they are designated hedges (Note 2(m)).

The Fund classifies cash and cash equivalents, amount due from dealers, amount due from Manager, amount due from Manager of collective investment scheme, dividends receivable and other receivable as financial assets at amortised cost as these financial assets are held to collect contractual cash flows consisting of the amount outstanding.

All of the Fund's financial liabilities (excluding the Net Assets Attributable to Unit Holders) are measured at amortised cost.

Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date, the date on which the Fund commits to purchase or sell the asset. Investments are initially recognised at fair value.

Financial instruments are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Unrealised gains or losses arising from changes in the fair value of the financial assets at fair value through profit or loss are presented in the statement of comprehensive income within net gain or loss on financial assets at fair value through profit or loss in the financial year/period which they arise.

Dividend income from financial assets at fair value through profit or loss is recognised in the statement of comprehensive income as part of gross dividend income when the Fund's right to receive payments is established.

Collective investment scheme is valued based on the most recent published NAV per unit or share of such collective investment scheme or, if unavailable, on the last published price of such unit or share (excluding any sales charge included in such selling price).

Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective interest method.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(b) Financial assets and financial liabilities (continued)

Impairment for assets carried at amortised costs

The Fund measures credit risk and expected credit losses (“ECL”) using probability of default, exposure at default and loss given default. The Manager consider both historical analysis and forward looking information in determining any ECL. The Manager consider the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12 month ECL as any such impairment would be wholly insignificant to the Fund.

Significant increase in credit risk

A significant increase in credit risk is defined by the Manager as any contractual payment which is more than 30 days past due.

Definition of default and credit-impaired financial assets

Any contractual payment which is more than 90 days past due is considered credit impaired.

Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor’s sources of income or assets to generate sufficient future cash flows to repay the amount. The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in impairment gains. There are no write-offs/recoveries during the financial year.

(c) Income recognition

Dividend income is recognised on the ex-dividend date when the right to receive payment is established.

Realised gain or loss on disposal of collective investment schemes are accounted for as the difference between the net disposal proceeds and the carrying amount of quoted securities and collective investment schemes, determined on a weighted average cost basis.

(d) Foreign currency

Functional and presentation currency

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the “functional currency”). The financial statements are presented in USD, which is the Fund’s functional and presentation currency.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(d) Foreign currency (continued)

Functional and presentation currency (continued)

Due to mixed factors in determining the functional currency of the Fund, the Manager has used its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions and have determined the functional currency to be in USD primarily due to the following factors:

- i) The Fund's investments are denominated in USD;
- ii) Significant portion of the cash is denominated in USD for the purpose of making settlement of the foreign trades; and
- iii) Significant portion of the Fund's expenses are denominated in USD.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in statement of comprehensive income.

(e) Cash and cash equivalents

For the purpose of statement of cash flow, cash and cash equivalent comprise bank balances with known amounts of cash and which are subject to an insignificant risk of changes in value.

(f) Distribution

A distribution to the Fund's unit holders is accounted for as finance cost in the statement of comprehensive income as the unit holders' contributions are classified as financial liability as per Note 2(I). A proposed distribution is recognised as a liability in the financial year in which it is approved by the Trustee.

(g) Taxation

Current tax expense is determined according to Malaysian tax laws at the current rate based on taxable profit earned during the financial year.

Tax on income from foreign collective investment schemes are based on the tax regime of the respective countries that the Fund invests in.

(h) Realised and unrealised portions of profit or loss after tax

The analysis of realised and unrealised portions of profit or loss after tax as presented on the statement of comprehensive income is prepared in accordance with SC Guidelines on Unit Trust Funds¹.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(i) Amount due from/to Manager of collective investment scheme (sales/purchase of investment)

Amounts due to Manager of collective investment scheme represent payables for collective investment scheme purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively.

(j) Unit holders' contributions

The unit holders' contributions to the Fund meet the definition of puttable instruments classified as financial liability under MFRS 132 "Financial Instruments: Presentation".

The Fund issues cancellable units, in five classes of units, known respectively as the Class AUD-H, Class GBP-H, Class MYR-H, Class SGD-H and Class USD, which are cancelled at the unit holder's option. The units are classified as financial liabilities. Cancellable units can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's NAV of respective classes. The outstanding units are carried at the redemption amount that is payable at the date of the statement of financial position if the member exercises the right to put back the unit to the Fund.

Units are created and cancelled at the unit holders option at prices based on the Fund's NAV per unit of respective classes at the close of business on the relevant dealing day. The Fund's NAV per unit of respective classes is calculated by dividing the net assets attributable to members of respective classes with the total number of outstanding units of respective classes.

(k) Amount due from/to dealers

Amounts due from and amount due to dealers represent receivables for Spot FX sold and payables for Spot FX purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively.

(l) Management fee rebate

Management fee rebate derived from the Manager and Manager of the collective investment schemes on an accrual basis to ensure no double charging of management fee. It is accrued daily based on the fair value of collective investment schemes held

(m) Derivative financial instruments

A derivative financial instrument is any contract that gives rise to both a financial asset of one enterprise and a financial liability or equity instrument of another enterprise.

A financial asset is any asset that is cash, a contractual right to receive cash or another financial asset from another enterprise, a contractual right to exchange financial instruments with another enterprise under conditions that are potentially favourable, or an equity instrument of another enterprise.

A financial liability is any liability that is a contractual obligation to deliver cash or another financial asset to another enterprise, or to exchange financial instruments with another enterprise under conditions that are potentially unfavourable.

1 The presentation of the analysis of realised and unrealised portions of increase/decrease in net assets attributable to unit holders as presented on the statement of comprehensive income is provided as per the SC Guidelines on Unit Trust Funds. However, the Fund is not guided by the SC Guidelines on Unit Trust Funds.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(m) Derivative financial instruments (continued)

The Fund's derivative financial instruments comprise forward foreign exchange contracts. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value.

The fair value of forward foreign exchange contracts is determined using forward exchange rates at the date of statements of financial position, with the resulting value discounted back to present value.

The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and the nature of the item being hedged.

Derivatives that do not qualify for hedge accounting are classified as held-for-trading and accounted for in accordance with the accounting policy set out in Note 2(b).

(n) Critical accounting estimates and judgements in applying accounting policies

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgements are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the SC Guidelines on Unlisted Capital Market Products under the Lodge and Launch Framework.

However, the Manager is of the opinion that in applying these accounting policies, no significant judgement was required.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES

Financial instruments of the Fund are as follows:

Dividends receivable	-	26,378	26,378
	<u>15,013,250</u>	<u>460,945</u>	<u>15,474,195</u>

All of the Fund's financial liabilities (excluding the Net Assets Attributable to Unit Holders) are measured at amortised cost.

The Fund aims to provide long term total returns through investments in one collective investment scheme, which is managed with low to medium risk strategy by investing primarily in bonds and shares, either directly or through investing into other funds.

The Fund is exposed to a variety of risks which include market risk (inclusive of price risk, interest rate risk and currency risk), credit risk and liquidity risk.

Financial risk management is carried out through internal control process adopted by the Manager and adherence to the investment restrictions as stipulated in the Deeds and SC Guidelines on Unlisted Capital Market Products under the Lodge and Launch Framework.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(a) Market risk

(i) Price risk

This is the risk that the fair value of an investment in collective investment scheme will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk). The value of investment in collective investment scheme may fluctuate according to the activities of individual companies, sector and overall political and economic conditions. Such fluctuation may cause the Fund's NAV and prices of units to fall as well as rise, and income produced by the Fund may also fluctuate.

The price risk is managed through diversification and selection of collective investment scheme and other financial instruments within specified limits according to the Deed.

The Fund's overall exposure to price risk was as follows:

	2021	2020
	USD	USD
Financial assets at fair value through profit or loss:		
- Collective investment schemes	<u>11,160,927</u>	<u>14,903,126</u>

The table below summarises the sensitivity of the Fund's profit or loss and NAV to movements in prices of collective investment schemes at the end of the reporting year. The analysis is based on the assumptions that the price of the collective investment schemes fluctuates by 5% with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the collective investment schemes, having regard to the historical volatility of the prices.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(a) Market risk (continued)

(ii) Currency risk

Currency risk is associated with investments that are quoted and/or priced in foreign currency denomination. Foreign currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Manager will evaluate the likely directions of a foreign currency versus USD based on considerations of economic fundamentals such as interest rate differentials, balance of payments position, debt levels, and technical chart considerations.

The following table sets out the foreign currency risk concentrations arising from the denomination of the Fund's financial instruments in foreign currencies of the Fund:

(b) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligation resulting in financial loss to the Fund.

For amount due from Manager, the settlement terms of the proceeds from the creation of units receivable from the Manager are governed by the SC Guidelines on Unlisted Capital Market Products under the Lodge and Launch Framework.

For amount due from Manager of collective investment scheme, the Fund will invest with an investment management company of the collective investment scheme which is authorised or approved by the relevant regulatory authority in its home jurisdiction.

In derivative activities, credit risk arises when counterparties to derivative contracts, are unable or unwilling to fulfil their obligation to pay the positive fair value or receivable resulting from the execution of contract terms.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(b) Credit risk (continued)

The following table sets out the credit risk concentration of the Fund:

(c) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations.

The Manager manages this risk by maintaining sufficient level of liquid assets to meet anticipated payments and cancellations of the units by unit holders. Liquid assets comprise bank balances and other instruments, which are capable of being converted into cash within 7 business days.

Generally, all investments are subject to a certain degree of liquidity risk depending on the nature of the investment instruments, market, sector and other factors. For the purpose of the Fund, the Manager will attempt to balance the entire portfolio by investing in a mix of assets with satisfactory trading volume and those that occasionally could encounter poor liquidity. This is expected to reduce the risks for the entire portfolio without limiting the Fund's growth potentials.

The table below summarises the Fund's financial liabilities into relevant maturity groupings based on the remaining year as at the statement of financial position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows.

* Outstanding units are redeemed on demand at the holder's option. However, the Manager does not envisage that the contractual maturity disclosed in the table above will be representative of the actual cash outflows, as holders of these instruments typically retain them for the medium to long term.

(d) Capital risk management

The capital of the Fund is represented by net asset attributable to unit holders of USD11,616,498 (2020: USD15,374,493). The amount of capital can change significantly on a daily basis as the Fund is subjected to daily subscriptions and redemptions at the discretion of unit holders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns to unit holder and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(e) Fair value estimation

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

The fair value of financial assets traded in active markets (such as trading securities) are based on quoted market prices at the close of trading on the financial year end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

(i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Investments whose values are based on quoted market prices in active markets and are therefore classified within Level 1, include quoted securities and collective investment schemes which invest in active listed equities. The Fund does not adjust the quoted prices for these instruments. The Fund's policies on valuation of these financial assets are stated in Note 2(b).

4. MANAGEMENT FEE

In accordance with the Deed, the Manager is entitled to a fee of up to 3.00% per annum, calculated and accrued daily based on the NAV of the Fund.

For the financial year/period ended 31 August 2021 and 31 August 2020, the management fee for the respective classes were recognised at the following rates:

Class AUD-H	Class GBP-H	Class MYR-H	Class SGD-H	Class USD
1.50%	1.50%	1.50%	1.50%	1.50%

There was no further liability to the Manager in respect of management fee other than amounts recognised above.

5. TRUSTEE FEE

In accordance with the Deed, the Trustee is entitled to a fee up to 0.04% per annum, calculated and accrued daily based on the NAV of the Fund. The Trustee's fee includes local custodian fee but excludes foreign sub-custodian fees and charges.

For the financial year ended 31 August 2021, the Trustee fee was recognised at a rate of 0.04% per annum for each unit class. (15.05.2019 (date of launch) to 31.08.2020: 0.04% per annum).

There was no further liability to the Manager in respect of Trustee fee other than the amount recognised above.

Management fee rebate was derived from the Fund's investment in collective investment scheme on an accruals basis to ensure no double charging of management fee. It is accrued daily based on the fair value of the collective investment scheme held.

For the financial year ended 31 August 2021, the rebate is recognised at a rate of 1.00% per annum (15.05.2019 (date of launch) to 31.08.2020: 1.00% per annum) calculated and accrued daily based on the NAV of the collective investment scheme.

Net gain on derivative assets/liabilities at fair value through profit or loss:		USD
- Realised gain on forward foreign currency contracts	30,784	74,274
- Unrealised fair value gain on forward foreign currency contracts	<u>55,435</u>	<u>110,124</u>
	<u>86,219</u>	<u>184,398</u>

As at 31 August 2021, there were total of 11 outstanding (2020: 5 outstanding) USD/Australian Dollar ("AUD"), USD/British Pound ("GBP"), USD/Malaysian Ringgit ("MYR"), USD/Singapore Dollar ("SGD"), and MYR/USD forward foreign currency contracts respectively. The notional principal amount of the outstanding forward foreign currency contracts amounted to USD9,427,550 (2020: USD12,763,735).

The USD/AUD, USD/GBP, USD/MYR, USD/SGD, GBP/USD and MYR/USD forward foreign currency contracts were entered into during the financial year to minimise the risk of foreign exchange exposure between the USD and the foreign currencies exposure of the Fund.

As the Fund has not adopted hedge accounting during the financial year/period, any changes in the fair value of the forward foreign currency contract is recognised immediately in the statement of comprehensive income during the financial year/period.

	%	%
MER	<u>0.59</u>	<u>0.79</u>

MER is derived based on the following calculation:

$$\text{MER} = \frac{(A + B + C + D + E) \times 100}{F}$$

- A = Management fee
- B = Trustee fee
- C = Audit fee
- D = Tax agent's fee
- E = Other expenses
- F = Average NAV of the Fund calculated on a daily basis

The average NAV of the Fund for the financial year/period calculated on a daily basis is USD11,852,919 (2020.05.2019 (date of launch) to 31.08.2020: USD13,732,660).
