The CIMB-Principal Total Return Bond Fund 6 is a close-ended fund that aims to provide investors with total return through investments in a portfolio of primarily debt instruments.

The Fund seeks to achieve its investment objective by investing up to 100% of its NAV in a diversified portfolio of debt instruments, money market instruments and Deposits.

The Fund will invest at least 70% of its NAV in debt instruments issued by governments, government agencies, supranational organizations and corporate issuers, which include but not limited to bonds and other fixed or floating rate debt instruments, certificates of deposit, commercial papers and notes. The Fund will also invest at least 1% of its NAV in Liquid Assets for liquidity purposes.

In order to maximize the total return, the Fund may invest up to 99% of its NAV in Locally Rated Securities. Up to 40% of its NAV may be invested in High Yield Securities and Unrated Securities for yield enhancement. When deemed necessary, the Manager may also utilize derivative instruments such as forward contracts, options, futures contracts and/or swap agreements for the purpose of hedging. The use of derivatives is subject to the prevailing SC Guidelines.

As this is a close-ended fund, the Manager will buy the debt instruments with the intention of holding through the tenure of the Fund or until the debt instruments mature. However, the Manager reserves the right to deal with the debt instruments in the best interest of the Unit holders. For more information, please see "Fund's Detailed Information" chapter of this Prospectus.

Risk Factors

General risks of investing in a unit trust fund

Any investment carries with it an element of risk. Therefore, prior to making an investment, you should consider the following risk factors in addition to the other information set out in this Prospectus.

Returns not guaranteed

The investment of the fund is subject to market fluctuations and its inherent risk. There is **NO GUARANTEE** on the investment returns, nor any assurance that the fund's investment objective will be achieved.

General market environment risk

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's net asset value.

Inflation risk

This is the risk that investors' investment in the unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.

Manager's risk

This risk refers to the day-to-day management of the fund by us, the manager of the fund which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.

Loan financing risk

This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments. In the event units are used as collateral, an investor may be required to top-up the investors' existing installment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan.

Unit Trust Loan Financing Risk Disclosure Statement Form annexed as Appendix 1 hereto sets out the risks in detail.

Specific risks associated with the investment portfolio of the Fund

There are specific risks associated with the investment portfolio of the Fund. The key ones include but are not limited to the following:

Interest rate risk

Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the fund's investment in debt instruments. In managing the debt, we take into account the coupon rate and time to maturity of the debt instruments with an aim to mitigate the interest rate risk.

Mismatch risk

This risk refers to the non-matching of the maturity date of the Fund and that of the debt instruments it holds. The Fund may invest in some debt instruments with maturity exceeding or shorter than the maturity date of the Fund. The difference in debt instruments maturity relative to the maturity date of the Fund may result in a loss to the Fund. If a debt instruments with maturity longer than the maturity date of the Fund cannot be liquidated close to the theoretical value (a value projected by us at which it should be liquidated to ensure the portfolio's projected rate of return), the Fund may suffer a loss. If proceeds from a debt instruments maturing earlier than the Fund's maturity date cannot be reinvested at equal or higher rates offered by the matured debt instruments, the Fund may experience a reduction in projected returns. However, we seek to mitigate this risk by investing in debt instruments which closely match the maturity of the Fund.

Liquidity risk

Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.

Credit (default) and counterparty risk

Credit risk relates to the creditworthiness of the issuers of the debt instruments and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the debt instrument. In the case of rated debt instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a debt instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the debt instruments. This could adversely affect the value of the Fund. We aim to mitigate this risk by performing bottom-up and top-down credit research and analysis to determine the creditworthiness of its counterparties, and impose investment limits on exposures for counterparties with different credit profiles as a precautionary step to limit any loss that may arise directly or indirectly as a result of a defaulted transaction.

Redemption risk

In the event of large redemptions, the Fund may need to dispose some of the debt instruments to fulfil redemption obligations. If the debt instruments are sold when interest rates rise or are expected to rise, the price of the debt instruments will fall. This in turn

would depress the NAV of the Fund. The Fund discourages redemptions by imposing a Withdrawal Penalty which is ploughed back to the Fund. We will also manage the relationship with large investors to reduce the risk of unplanned redemptions. You are advised to be prepared to commit your investments up till the Maturity Date.

Country risk

Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the Net Asset Value of the Fund or prices of units to fall.

Where necessary, we will obtain the necessary licenses/permits for investments in countries that require such licenses/permits. In the event that such licenses/permits to invest are revoked or not renewed, we would seek to invest in other accessible markets.

Currency risk

As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Early termination risk

During the Offer Period, we reserve the right, with the consent of Trustee, to terminate the Fund earlier than the Maturity Date and return to Unit holders the Initial Offer Price per unit and the Application Fee paid in the event that the sales proceeds/amount collected of the Fund at the expiry of the Offer Period is below RM50 million or when the expected return of the Fund does not or may not match or exceed the Fund's benchmark. In accordance with the provisions of the Deed, early termination may also take place after the Offer Period if we are of the opinion that by doing so is in the best interest of the Unit holders. In the event that these circumstances arise, you may have to reinvest the monies returned to you into other investment vehicles which may not be able to match the returns that would have been provided by the Fund if it has not been terminated early.

The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Fund and are not set out in any particular order of priority. You should be aware that an investment in a unit trust fund may be exposed to other risks from time to time. If in doubt, you should consult professional advisers for a better understanding of the risks.

Fund's Detailed Information

If you are an investor who is looking for an investment in a bond fund that aims at providing total return through investments in a portfolio of primarily debt instruments, invest with the **CIMB-Principal Total Return Bond Fund 6**.

Investment objective

The Fund aims to provide investors with total return through investments in a portfolio of primarily debt instruments.

Any material changes to the investment objective of the Fund would require your approval.

Benchmark

The benchmark for the Fund is the 3-year CIMB Bank fixed deposit rate at the Commencement Date.

The Fund shall benchmark itself against the fixed deposit rate for performance comparison purpose only. Since the Fund may invests across various debt securities of different ratings, investors are cautioned that the risk profile of the Fund is higher than investing in fixed deposits; hence, you should expect the Fund to outperform the benchmark.

Information on the benchmark is available in our monthly fund fact sheets and can be obtained from <http://www.cimb-principal.com.my>.

Investment policy and principal investment strategy

The Fund seeks to achieve its investment objective by investing up to 100% of its NAV in a diversified portfolio consisting of debt instruments, money market instruments and/or Deposits.

The Fund will invest at least 70% of its NAV in debt instruments issued by governments, government agencies, supranational organizations and corporate issuers, which include but not limited to bonds and other fixed or floating rate debt instruments, certificates of deposit, commercial papers and notes. The Fund will also invest in Liquid Assets for liquidity purposes.

In order to maximize the total return, the Fund may invest up to 99% of its NAV in Locally Rated Securities. Up to 40% of the Fund's NAV may be invested in High Yield Securities and Unrated Securities for yield enhancement, of which up to 20% of the Fund's NAV in Unrated Securities. When deemed necessary, we may also utilize derivative instruments such as forward contracts, options, futures contracts and/or swap agreements for the purpose of hedging. The use of derivatives is subject to the prevailing SC Guidelines.

Investment universe of the Fund will be in countries globally, where the regulatory authority is an ordinary or associate member of the IOSCO. Where necessary, we will apply for licenses/permits to invest in these countries, and if the licenses/permits are revoked or not renewed (as the case may be) we will seek to invest in other accessible markets. Also, we formulate an interest rate outlook through examining factors such as local and foreign interest rate, inflation rate, monetary policies and economic growth of the respective countries. Foreign exchange rate movements will also play an important part of our decision in allocating the Fund's asset.

As this is a close-ended fund, we will buy the debt instruments with the intention of holding through the tenure of the Fund or until the debt instruments mature. However, we reserve the right to deal with the debt instruments in the best interest of the Unit holders, such as (i) in the event of a credit rating downgrade or during market upheavals where we are of the opinion that trading of the debt instruments is required to protect the investment return of the Fund (nevertheless we can continue to hold the downgraded debt instruments if the immediate disposal of the debt instruments would not be in the best interest of the Unit holders), and (ii) where we deem that the trading of debt instruments is necessary to provide the investment return in order to achieve the objective of the Fund.

Further, for debt instruments that mature during the three (3) months period to the Maturity Date, we will seek to reinvest into other debt instruments for the remaining period to the Maturity Date. However, in the event that we are not able to find suitable replacement debt instruments, we will invest in Deposits and/or money market instruments. As such, Unit holders should note that during this period of time, the Fund's investment may deviate from the stipulated investment strategy.

Debt Instruments Selection Process

As pre-determined in our investment guidelines, there are three (3) main screening processes for debt instruments selection, i.e. management review, business and financial risk assessment and debt instruments valuation; the primary consideration for debt instruments is the credit strength of the company and the relative value in comparison with the similar rated debt instruments.

The fund manager utilizes the database maintained by the in-house credit research team and the recommendation of our in-house credit committee as a guide in their debt instruments selection for the Fund. The in-house credit research provides an independent view of each debt instruments. Each debt instruments is thoroughly analyzed by the respective credit analyst for their quantitative and qualitative elements.

All debt instruments will have to go through an internal credit evaluation process, which covers three (3) aspects of the analysis, i.e. quantitative, qualitative and security of the issue. The debt instruments will then be assigned credit ratings, and that the credit ratings assigned may or may not be identical to that of the external and/or independent rating agencies. Below please find the details of the analysis mentioned.

Analysis	Areas of assessment
Quantitative Analysis	<ul style="list-style-type: none"> • Quality of cash flows and forecasts; • Balance sheet structure; • Debt repayment schedule; • Profitability, and sustainability of profit margins; • Interest rate sensitivity; • Ratio analysis; and • Future capital expenditure and funding requirements.
Qualitative Analysis	<ul style="list-style-type: none"> • Business risk and market positioning; • Management strategy and risk appetite; • Corporate governance and market reputation; and • Industry risk assessment.
Security of the Issue	<ul style="list-style-type: none"> • Guarantee and quality of guarantors (government, banks or corporations); • Security and quality of secured assets; • Sinking fund; • Terms & conditions of the issue; • Definition of event of default, cross-default clauses, negative pledged clauses; • Seniority of the issue; and • Availability and quality of underwriters.

The credit research team supplements the in-house financial and business analysis with meetings with corporate management, rating agency opinions, brokers' research and up-to-date market information with the objective of obtaining a comprehensive and well-rounded view of an issuer's fundamental credit strength and debt-repayment ability.

Asset Allocation

- Up to 100% in debt instruments, money market instruments and/or Deposits, of which:
 - At least 70% of the Fund's NAV in debt instruments issued by governments, government agencies, supranational organizations and corporate issuers, which include but not limited to bonds and other fixed rate or floating rate debt instruments, certificates of deposit, commercial papers and notes;
 - Up to 99% of the Fund's NAV in Locally Rated Securities;
 - Up to 40% of the Fund's NAV in High Yield Securities and Unrated Securities, of which up to 20% of the Fund's NAV in Unrated Securities; and
 - At least 1% of the Fund's NAV in Liquid Assets.

Risk management strategy

Risk management, with an emphasis on portfolio diversification, will form an integral part of the investment process. The Fund is constructed and managed within pre-determined guidelines. The risk management strategies and techniques employed include diversifying the Fund's asset within its portfolio in terms of its exposure to various countries, sectors, industries and companies.

Essentially, we monitor the debt instruments portfolio according to three (3) parameters: tenure, credit ratings and sector. The duration of the debt instruments portfolio (i.e. the sensitivity of the portfolio to interest rate changes) is also monitored according to our interest rate outlook.

We may, within the context of its investment strategies and within the limits set forth in the investment restrictions and limits, engage in certain transactions involving the use of derivatives instruments, including but not limited to options, futures, OTC derivatives instruments (including forward contracts and swaps) for currency risk management purposes and/or as a hedge against any adverse movement in the value of debt instruments invested.

Temporary defensive positions

We may take a temporary defensive position when it believes the markets or the economies are experiencing excessive volatility, a prolonged general decline or when other adverse conditions may exist. Under these circumstances, the Fund may be unable to pursue its investment goal.

In case of severe adversities such as global credit crunch, the Fund may need to dispose debt instruments in favour of Deposits and/or money market instruments to safeguard the investment portfolio of the Fund. In the unlikely event of a credit rating downgrade, the Manager reserves the right to deal with the debt instruments in the best interest of the investors.

Authorised investments

Subject to the Deed, the investment policy for the Fund and the requirements of the SC, the Manager has the absolute discretion as to how the assets of the Fund are to be invested. Under the Deed and provided always that there are no inconsistencies with the objective of the Fund, the Fund can invest in the following:

- Debentures traded in or under the rules of an Eligible Market;
- Liquid Assets;
- Derivative instruments, including but not limited to options, futures contracts, forward contracts and swaps;
- Structured products;
- Securities listed or traded on foreign markets where the regulatory authority is a member of the IOSCO; and
- Any other form of investments as may be permitted by the SC from time to time that is in line with the Fund's objectives.

The formulation of the investment policies and strategies of the Fund is based on the objective of the Fund after taking into consideration the regulatory requirements outlined in the SC Guidelines, with such exemptions/variations (if any) as approved by the SC.

Investment restrictions and limits

The Fund is subject to the following investment restrictions/limits:

- the value of the Fund's investments in debentures issued by any single issuer must not exceed 20% of the Fund's NAV. This single issuer limit may be increased to 30% if the debentures are rated by any domestic or global rating agency to be of the best quality and offer highest safety for timely payment of interest and principal;
- the value of the Fund's placement in deposits with any single institution must not exceed 20% of the Fund's NAV;
- for investments in derivatives:

- the aggregate value of the Fund's investments in transferable securities (debentures), money market instruments, deposits, OTC derivatives and structured products issued by or placed with (as the case may be) any single issuer/institution must not exceed 25% of the Fund's NAV. Where the value of a Fund's investment in debentures issued by a single issuer is increased to 30%, the aggregate value of a Fund's investment must not exceed 30%;
- the value of the Fund's investment in units/shares of any collective investment scheme must not exceed 20% of the Fund's NAV;
- the value of the Fund's investments in debentures issued by any one group of companies must not exceed 30% of the Fund's NAV;
- the Fund's investments in debentures must not exceed 20% of the debentures issued by any single issuer;
- the Fund's investments in money market instruments must not exceed 10% of the instruments issued by any single issuer. This limit does not apply to money market instruments that do not have a pre-determined issue size;
- the Fund's investments in collective investment schemes must not exceed 25% of the units/shares in any one collective investment scheme; and
- the value of the Fund's investment in unlisted securities must not exceed 10% of the Fund's NAV. This exposure limit does not apply to:
 - debentures traded on an organized OTC market; and
 - structured products.

In respect of any restrictions and limits stipulated by the SC Guidelines, there is an allowance of 5% where such restrictions and limits are breached through appreciation or depreciation of the NAV of the Fund (whether as a result of an appreciation or depreciation in value of the Fund's investments or as a result of repurchase of units or payment made out of the Fund).

If the Fund ceases to comply with the above limitations on investments, the Manager must remedy the non-compliance as soon as practicable (maximum three (3) months from the date of the breach).

Valuation of authorised investments

Valuation of Fund will be carried out by the Manager in a fair manner in accordance with the applicable laws and guidelines. The valuation bases for the authorised investments of the Fund are as below:

- **Debt instruments**

The value of any unlisted RM-denominated bonds shall be calculated on a weekly basis using prices quoted by a Bond Pricing Agency (BPA) registered with the SC. Where such prices are not available or where the Manager is of the view that the price quoted by the BPA for a specific bond differs from the market price by more than 20 basis points, the Manager may use the market price by reference to the last available quote provided such quote was obtained within the previous thirty (30) days and the Manager records its basis for using a non-BPA price, obtained necessary internal approvals to use the non-BPA price and keeps an audit trail of all decisions and basis for adopting the market yield.

The value of any unlisted non RM-denominated bonds shall be calculated daily using prices quoted by IDC using its proprietary methodology. The bond prices by IDC are calculated using prices contributed by financial institutions and other market inputs listed in approximate order of priority, include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads and reference data (e.g. corporate action announcements and ratings). Where the prices from IDC are not available on any business day, these bonds will be valued by reference to the average indicative yield quoted by three (3) independent and reputable financial institutions.

- **Money market instruments**
Valuation of money market instruments such as repurchase agreements shall be determined weekly by reference to the principal value of such authorised investments and the accrued income for the relevant period.
- **Deposits**
The value of Deposits shall be determined weekly by reference to the principal value of such authorised investments and the interest/profit accrued thereon for the relevant period.
- **Derivatives**
For unlisted derivative instruments, the value will be determined by the financial institution that issued the instrument. In any event, the Manager shall ensure that the valuation of the investment is valued at fair value as determined in good faith by the Manager, on methods and bases which have been verified by the auditor of the Fund and approved by the Trustee.

For listed derivative instruments, the value of any derivatives, which are quoted on an approved exchange, shall be calculated by reference to the last transacted price on that approved exchange. If the last transacted price does not represent the fair value of the securities, then the securities shall be valued at fair price as determined by reference to the Manager, based on the methods or bases approved by the Trustee after appropriate technical consultation, such as the mean of bid and offer prices at the close of trading. Suspended derivatives will be valued at their last done price unless there is conclusive evidence to show that the value has gone below the suspended price or where the quotation of the derivatives has been suspended for a period exceeding 14 days, whereupon their fair value will be determined in good faith by the Manager based on the methods or bases approved by the Trustee after appropriate technical consultation.
- **Listed securities**
The value of listed securities, which are quoted on an approved exchange, shall be calculated by reference to the market price. However, if a valuation based on market price does not represent the fair value of the securities or no market price is available including in the event of a suspension in the quotation of the securities for a period exceeding fourteen (14) days or such shorter period as agreed by the Trustee, then the securities should be valued at fair value, as determined in good faith by the Manager or its delegate based on the methods or bases approved by the Trustee after appropriate technical consultation.

As the value of the Fund's assets is denominated in a foreign currency, the assets are translated on a weekly basis to RM based on the bid foreign exchange rate quoted by either Reuters or Bloomberg, at United Kingdom time 4:00 p.m. on the same day as per the Investment Management Standard (FIMM/IMS (I&SP)-004 (2nd Edition)) issued by Federation of Investment Managers Malaysia, which may be amended/updated from time to time.

The Application Fee or Withdrawal Penalty (if any) will be computed and charged separately based on your application or withdrawal amount. After the Offer Period (or such shortened period as determined by us), no units will be available for sale. The pricing for the withdrawal of units shall be the NAV per unit at the next valuation point after we receive the completed relevant transaction form.

** As this is close-ended fund, the NAV per unit refers to Initial Offer Price during Offer Period.*

We will value the Fund on weekly basis; i.e. every Monday. The Fund's valuation point for Monday will be at 4:00 p.m. on the next Business Day as the Fund has exposure to investments outside Malaysia. This is to cater for the currency translation of the foreign securities/instruments to the Funds' base currency. Currently, the currency translation is based on the bid exchange rate quoted by Bloomberg/Reuters at UK time 4:00 p.m. (Malaysian time 11:00 p.m. or 12:00 a.m.) on the same day, or such other time as stipulated in the Investment Management Standards issued by the Federation of Investment Managers Malaysia. The unit price for Monday is available on our website at <http://www.cimb-principal.com.my> by 5:30 p.m. on the following Business Day (T+1). We will also publish the unit price on the local dailies two (2) Business Days later (T+2). If Monday is a non-Business Day, the Fund will be valued on the next Business Day.

For any withdrawal by 4:00 p.m. on Monday, the price for these transactions will be the unit pricing for that Monday, which will only be known on the following Business Day (T+1). Transactions after 4:00 p.m. will be processed using the unit pricing for the following Monday. If a Monday is a non-Business Day, you can redeem on the immediate next Business Day. In such cases, the request must be received by us no later than 4:00 p.m. the immediate next Business Day and we will process the request using the unit pricing for that immediate next Business Day.

For transaction made by 4:00 p.m. Monday

For the market close on 8 August 2016, the unit price for that Monday will be calculated on the next Business Day, that is, 9 August 2016. The unit pricing will be made known on our website after 1:30 p.m. on 9 August 2016. However, the publication date on local dailies for the prices as at 8 August 2016 will be on 10 August 2016.

For transaction made after 4:00 p.m. Monday

For the market close on 8 August 2016, the unit price for the next Monday i.e. 15 August 2016 which will be calculated on the following Business Day, that is, 16 August 2016. The unit pricing will be made known on our website after 1:30 p.m. on 16 August 2016. However, the publication date on local dailies will be on 17 August 2016.

The Fund must be valued at least once a week except during the Offer Period. Unit price (i.e. NAV per unit) is calculated by dividing the NAV of the Fund with the number of units in issue at the valuation point, as follows:

$$\text{NAV per unit} = \frac{\text{Net Asset Value}}{\text{Number of units in issue}}$$

The NAV of a Fund is the sum of the value of all investments and cash held by the Fund (calculated in accordance with the Deed) including income derived by the Fund which has not been distributed to our Unit holders, less all amounts owing or payable in respect of the Fund which also includes any provisions that we and the Trustee consider should be made. For example, a provision may be made for possible future losses on an investment which cannot be fairly determined.

Note: We will ensure the accuracy of the prices to the FIMM - Funds Malaysia System for publication. However, we will not be held liable for any error or inaccuracies in prices published in the local dailies.

Incorrect Pricing

We shall take immediate remedial action to rectify any incorrect valuation and/or pricing of the Fund. Where such error has occurred, monies shall be reimbursed in the following manner:

- (a) in the event of over valuation and/or pricing, we shall reimburse the Fund for any redemption of units;
- (b) in the event of under valuation and/or pricing, we shall reimburse you, if you have redeemed units of the Fund at a lower price.

Notwithstanding the above, unless the Trustee otherwise directs, we shall make the reimbursement where an incorrect pricing:

- (i) is equal or more than 0.50% of the NAV per unit; and
- (ii) results in a sum total of RM10.00 or more to be reimbursed to a Unit Holder for each repurchase transaction.

Calculation of investment amount and units entitlement

Illustration 1:

Calculation of number of units received, Application Fee and total amount payable by you (during Offer Period)

Assumptions:

Initial Offer Price per unit = RM1.0000

You wish to invest RM10,000.00 in the Fund through an IUTA, at an Application Fee of 3.00%.

Calculation of number of units received by you

= Investment amount / Initial Offer Price per unit
= RM10,000.00 / RM1.0000
= 10,000 units

Calculation of Application Fee paid by you (to be payable in addition to the amount invested)

= Initial Offer Price per unit x number of units received x Application Fee rate
= RM1.0000 x 10,000 units x 3.00%
= RM300.00

Calculation of total amount payable by you

= Investment amount + Application Fee paid
= RM10,000.00 + RM300.00
= RM10,300.00

Illustration 2:

Calculation of withdrawal value, Withdrawal Penalty amount and amount payable to investor (prior to Maturity Date)

Assuming you have 50,000 units, you wish to withdraw 10,000 units from your investment in the Fund which is more than one (1) year but less than two (2) years after the Commencement Date of the Fund. Your withdrawal request is received by 4:00 p.m on Monday. The NAV per unit for that Monday (which will be made known on the following Business Day) is RM1.2010 (truncated to 4 decimal places).

A Withdrawal Penalty of 1.00% on the NAV per unit will be charged on the withdrawal.

Calculation of your withdrawal amount

= Units withdrawn x NAV per unit
= 10,000 x RM1.2010
= RM12,010.00

Calculation of Withdrawal Penalty amount paid by you (to be deducted from the withdrawal value)

= NAV per unit x number of units withdrawn x Withdrawal Penalty rate
= RM1.2010 x 10,000 x 1.00%
= RM120.10

Calculation of amount payable to you

= Withdrawal Value – Withdrawal Penalty amount paid
= RM12,010.00 – RM120.10
= RM11,889.90

Illustration 3:

Calculation of withdrawal value and amount payable to you (at Maturity Date)

At Maturity Date, the Fund will be liquidated and the proceeds (after deducting all expenses) would be returned to you in accordance with the proportion of your unit holdings in the Fund. No Withdrawal Penalty is charged and the amount payable to you is the withdrawal value. Assuming you have 10,000 units and the NAV per unit on Maturity Date is RM1.3300 (truncated to 4 decimal places).

Calculation of withdrawal value

= Number of units x NAV per unit
= 10,000 x RM1.3300
= RM13,300.00

Calculation of amount payable to you

= Withdrawal value
= RM13,300.00

Note: The above illustrations do not take into account the GST.

The Manager, its directors and any of its delegates including the Investment Committee members will at all times act in the best interests of the Unit holders of the Fund and will not conduct itself in any manner that will result in a conflict of interest or potential conflict of interest. In the unlikely event that any conflict of interest arises, such conflict shall be resolved such that the Fund is not disadvantaged. In the unlikely event that CIMB-Principal faces conflicts in respect of its duties to the Fund and its duties to other CIMB-Principal Funds that it manages, CIMB-Principal is obliged to act in the best interests of all its investors and will seek to resolve any conflicts fairly and in accordance with the Deed.

The Manager shall not act as principal in the sale and purchase of any securities or investments to and from the Fund. The Manager shall not make any investment for the Fund in any securities, properties or assets in which the Manager or its officer has financial interest in or from which the Manager or its officer derives a benefit, unless with the prior approval of the Trustee. Any Investment Committee member or director of CIMB-Principal who hold substantial shareholdings or directorships in public companies shall refrain from any decision making relating to that particular investment of the Fund.

The Fund may maintain Deposits with CIMB Bank Berhad and CIMB Investment Bank Berhad. CIMB-Principal may enter into transactions with other companies within the CIMB Group and the Principal Financial Group provided that the transactions are effected at market prices and are conducted at arm's lengths.

As the Trustee for the Fund, there may be proposed related party transactions involving or in connection with the Fund in the following events:

- (1) where the Fund invests in instrument(s) offered by the related party of the Trustee (i.e. placement of monies, structured products etc);
- (2) where the Fund is being distributed by the related party of the Trustee as IUTA;
- (3) where the assets of the Fund are being custodised by the related party of the Trustee both as sub-custodian and global custodian of that Fund (i.e. Trustee's delegate); and
- (4) where the Fund obtains financing as permitted under the SC Guidelines, from the related party of the Trustee.

The Trustee has in place policies and procedures to deal with any conflict of interest situation. The Trustee will not make improper use of its position as the owner of the Fund's assets to gain, directly or indirectly, any advantage or cause detriment to the interests of Unit holders. Any related party transaction is to be made on terms which are best available to the Fund and which are not less favourable to the Fund than an arms-length transaction between independent parties.

Subject to the above and any local regulations, the Trustee and/or its related group of companies may deal with each other, the Fund or any Unit holder or enter into any contract or transaction with each other, the Fund or any Unit holder or retain for its own benefit any profits or benefits derived from any such contract or transaction or act in the same or similar capacity in relation to any other scheme.

Interests in the Fund

Subject to any legal requirement, CIMB-Principal or any related corporation of the Manager, or any officers or directors of any of them, may invest in the Fund. The directors of CIMB-Principal will receive no payments from the Fund other than distributions that they may receive as a result of investment in the Fund. No fees other than the ones set out in this Prospectus have been paid to any promoter of the Fund, or the Trustee (either to become a Trustee or for other services in connection with the Fund), or CIMB-Principal for any purpose.

Employees' securities dealings

CIMB-Principal has in place a policy contained in its Rules of Business Conduct, which regulates its employees' securities dealings. An annual declaration of securities trading is required from all employees to ensure that there is no potential conflict of interest between the employees' securities trading and the execution of the employees' duties to the company and customers of the company.

Dear Sirs,

TAXATION OF THE TRUST OFFERED UNDER THE CIMB-PRINCIPAL TOTAL RETURN BOND FUND 6 AND UNIT HOLDERS

This letter has been prepared for inclusion in the Prospectus Issue No. 1 ("hereinafter referred to as "the Prospectus") in connection with the offer of units in the CIMB-Principal Total Return Bond Fund 6 ("the Trust").

The taxation of income for both the Trust and the unit holders are subject to the provisions of the Malaysian Income Tax Act, 1967 ("the Act"). The applicable provisions are contained in Section 61 of the Act, which deals specifically with the taxation of trust bodies in Malaysia.

TAXATION OF THE TRUST

The Trust will be regarded as resident for Malaysian tax purposes since the trustee of the Trust is resident in Malaysia.

(1) Domestic Investments

(i) General taxation

The income of the Trust consisting of dividends, interest (other than interest which is exempt from tax) and other investment income derived from or accruing in Malaysia, after deducting tax allowable expenses, is liable to Malaysian income tax at the rate of 24 per cent.

Gains on disposal of investments by the Trust will not be subject to income tax.

(ii) Dividend and other exempt income

Effective 1 January 2014, all companies would adopt the single-tier system. Hence, dividends received would be exempted from tax and the deductibility of expenses incurred against such dividend income would be disregarded. There will no longer be any tax refunds available for single-tier dividends received. Dividends received from companies under the single-tier system would be exempted.

The Trust may receive Malaysian dividends which are tax exempt. The exempt dividends may be received from investments in companies which had previously enjoyed or are currently enjoying the various tax incentives provided under the law. The Trust will not be taxable on such exempt income.

Interest income or discount income derived from the following investments is exempt from tax:

- a) Securities or bonds issued or guaranteed by the Government of Malaysia;

- b) Debentures or sukuk¹, other than convertible loan stocks, approved or authorized by, or lodged with, the Securities Commission² Malaysia;
- c) Bon Simpanan Malaysia issued by Bank Negara Malaysia; and
- d) Interest income paid or credited by Malaysia Building Society Berhad³.

As such, provided the investment in structured products is seen to be “debentures” under Capital Markets and Services Act 2007, the income received will be exempted. Otherwise, tax implications could arise.

Interest income derived from the following investments is exempt from tax:

- a) Interest paid or credited by any bank or financial institution licensed under the Financial Services Act 2013 or Islamic Financial Services Act 2013;
- b) Interest paid or credited by any development financial institution regulated under the Development Financial Institutions Act 2002; and
- c) Bonds, other than convertible loan stocks, paid or credited by any company listed in Bursa Malaysia Securities Berhad ACE Market.

The income exempted from tax at the Trust level will also be exempted from tax upon distribution to the unit holders.

(2) Foreign Investments

Income of the Trust in respect of overseas investment is exempt from Malaysian tax by virtue of Paragraph 28 of Schedule 6 of the Act and distributions from such income will be tax exempt in the hands of the unit holders. Such income from foreign investments may be subject to taxes or withholding taxes in the specific foreign country. However, any foreign tax suffered on the income in respect of overseas investment is not tax refundable to the Trust in Malaysia.

The foreign income exempted from Malaysian tax at the Trust level will also be exempted from tax upon distribution to the unit holders.

(3) Hedging Instruments

The tax treatment of hedging instruments would depend on the particular hedging instruments entered into.

Generally, any gain / loss relating to the principal portion will be treated as capital gain / loss. Gains / losses relating to the income portion would normally be treated as revenue gains / losses. The gain / loss on revaluation will only be taxed or claimed upon realisation. Any gain / loss on foreign exchange is treated as capital gain / loss if it arises from the revaluation of the principal portion of the investment.

(4) Other Income

The Trust may be receiving income such as exit fee which will be subject to tax at the rate of 24 per cent.

(5) Tax Deductible Expenses

Expenses wholly and exclusively incurred in the production of gross income are allowable as deductions under Section 33(1) of the Act. In addition, Section 63B of the Act provides for tax deduction in respect of managers’ remuneration, expenses on maintenance of the register of unit holders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postages. The deduction is based on a formula subject to a minimum of 10 per cent and a maximum of 25 per cent of the expenses.

1 Pursuant to the Finance Act 2015 which was gazetted on 30 December 2015, the words “Islamic Securities” were substituted with the words “sukuk”.

2 Pursuant to the Finance Act 2015 which was gazetted on 30 December 2015, the words “approved by the Securities Commission” were substituted with the words “approved or authorized by, or lodged with, the Securities Commission”.

3 Pursuant to the letters from Ministry of Finance Malaysia dated 11 June 2015 and 16 June 2015 with effect from year of assessment (“YA”) 2015.

(6) Real Property Gains Tax (“RPGT”)

With effect from 1 January 2014, any gains on disposal of real properties or shares in real property companies⁴ would be subject to RPGT at the following rates:-

Disposal time frame	RPGT rates
Within 3 years	30%
In the 4 th year	20%
In the 5 th year	15%
In the 6 th year and subsequent years	5%

(7) Goods and Services Tax (“GST”)

GST has been implemented effective 1 April 2015 at the rate of 6% to replace the existing sales tax and service tax. Based on the guidelines⁵ issued, the Trust, being collective investment vehicles, will be making exempt supplies. Hence, the Trust is not required to register for GST purposes. However, the Trust will incur expenses such as management fees, trustee fees and other administrative charges which will be subject to 6% GST. The 6% input tax incurred on such expenses will not be claimable by the Trust and represents a cost to the Trust.

TAXATION OF UNIT HOLDERS

Unit holders will be taxed on an amount equivalent to their share of the total taxable income of the Trust to the extent of the distributions received from the Trust. The income distribution from the Trust will carry a tax credit in respect of the Malaysian tax paid by the Trust. Unit holders will be entitled to utilise the tax credit against the tax payable on the income distribution received by them. No additional withholding tax will be imposed on the income distribution from the Trust.

Non-resident unit holders may also be subject to tax in their respective jurisdictions. Depending on the provisions of the relevant country’s tax legislation and any double tax treaty with Malaysia, the Malaysian tax suffered may be creditable against the relevant foreign tax.

Corporate unit holders, resident⁶ and non-resident, will generally be liable to income tax at 24 per cent on distribution of income received from the Trust. The tax credits attributable to the distribution of income can be utilised against the tax liabilities of these unit holders.

Individuals and other non-corporate unit holders who are tax resident in Malaysia will be subject to income tax at graduated rates ranging from 1 per cent to 28⁷ per cent. Individuals and other non-corporate unit holders who are not resident in Malaysia will be subject to income tax at 28⁸ per cent. The tax credits attributable to the distribution of income can be utilised against the tax liabilities of these unit holders.

4 A real property company is a controlled company which owns or acquires real property or shares in real property companies with a market value of not less than 75 per cent of its total tangible assets. A controlled company is a company which does not have more than 50 members and is controlled by not more than 5 persons.

5 Pursuant to GST Guide on Fund Management (as at 11 April 2016 issued by the Royal Malaysian Customs).

6 Resident companies with paid up capital in respect of ordinary shares of RM2.5 million and below will pay tax at 19 per cent for the first RM500,000 of chargeable income with the balance taxed at 24 per cent.

With effect from YA 2009, the above shall not apply if more than –

- (a) 50 per cent of the paid up capital in respect of ordinary shares of the company is directly or indirectly owned by a related company;
- (b) 50 per cent of the paid up capital in respect of ordinary shares of the related company is directly or indirectly owned by the first mentioned company;
- (c) 50 per cent of the paid up capital in respect of ordinary shares of the first mentioned company and the related company is directly or indirectly owned by another company.

“Related company” means a company which has a paid up capital in respect of ordinary shares of more than RM2.5 million at the beginning of the basis period for a YA.

7 Pursuant to the Finance Act 2015 which was gazetted on 30 December 2015, the income tax rates for individual tax residents in Malaysia will be increased to rates ranging from 1 to 28 per cent effective YA 2016.

8 Pursuant to the Finance Act 2015 which was gazetted on 30 December 2015, the income tax rate for non-resident individuals will be increased to 28 per cent effective YA 2016.

The distribution of exempt income and gains arising from the disposal of investments by the Trust will be exempted from tax in the hands of the unit holders.

Any gains realised by unit holders (other than dealers in securities, insurance companies or financial institutions) on the sale or redemption of the units are treated as capital gains and will not be subject to income tax. This tax treatment will include gains in the form of cash or residual distribution in the event of the winding up of the Trust.

Unit holders electing to receive their income distribution by way of investment in the form of new units will be regarded as having purchased the new units out of their income distribution after tax.

Unit splits issued by the Trust are not taxable in the hands of unit holders.

The issuance of units by the Trust is an exempt supply. The selling or redemption of the units is also an exempt supply and therefore is not subject to GST. Any fee based charges related to buying of the units by unit holders in Malaysia and outside Malaysia such as sales or service charge or switching fees will be subject to GST at a standard rate of 6%.

We hereby confirm that the statements made in this report correctly reflect our understanding of the tax position under current Malaysian tax legislation. Our comments above are general in nature and cover taxation in the context of Malaysian tax legislation only and do not cover foreign tax legislation. The comments do not represent specific tax advice to any investors and we recommend that investors obtain independent advice on the tax issues associated with their investments in the Trust.

Yours faithfully,

for and on behalf of

Appendix 1 – Unit Trust Loan Financing Risk Disclosure Statement

Investing in a unit trust fund with borrowed money is more risky than investing with your own savings.

You should assess if loan financing is suitable for you in light of your objectives, attitudes to risk and financial circumstances. You should be aware of the risks, which would include the following:

1. The higher the margin of financing (that is, the amount of money you borrowed for every Ringgit of your own money that you put in as deposit or down payment) the greater the loss or gain on your investment.
2. You should assess whether you have the ability to service the repayments on the proposed loan. If your loan is a variable rate loan, and if interest rates rise, your total repayment amount will be increased.
3. If unit prices fall beyond a certain level, you may be asked to provide additional acceptable collateral (where units are used as collateral) or pay additional amounts on top of your normal instalments. If you fail to comply within the time prescribed, your units may be sold towards the settlement of your loan.
4. Returns on unit trusts are not guaranteed and may not be earned evenly over time. This means that there may be some years where returns are high and other years where losses are experienced. Whether you eventually realise a gain or loss may be affected by the timing of the sale of your units. The value of units may fall just when you want your money back even though the investment may have done well in the past.

The brief statement cannot disclose all the risks and other aspects of loan financing. You should therefore carefully study the terms and conditions before you decide to take a loan. If you are in doubt about any aspect of this Risk Disclosure Statement or the terms of the loan financing, you should consult the institution offering the loan.

ACKNOWLEDGEMENT OF RECEIPT OF RISK DISCLOSURE STATEMENT
