MARKET REVIEW (1 AUGUST 2023 TO 31 OCTOBER 2023)

Emerging-market ("EM") equities, as measured by the Morgan Stanley Capital International ("MSCI") Emerging Markets Index, pulled back in August 2023, declining 6.2% and underperforming developed markets, which rallied at the end of the month as United States ("US") economic data raised confidence that the US Federal Reserve (the "Fed") is nearing the end of its rate-hike cycle. During the month, sector performance within the MSCI EM Index was negative. The communication-services and consumer-discretionary sectors led underperformance. The energy and technology sectors also delivered negative absolute returns but outperformed other sectors on a relative basis. Equity markets in China declined amid negative sentiment and increased scrutiny of its worsening property market slump and weak consumer spending. US companies with exposure to China cited falling export demand as a reason for lowered earnings guidance. After the latest round of disappointing economic data showed growth continuing to slow despite earlier stimulus measures, China's central bank unexpectedly cut a range of key interest rates in an emergency move to try and jump-start its economy.

EM equities declined during the third quarter but modestly outperformed Developed Markets ("DMs"). EM foreign exchange rates broadly weakened against the USD, and China's economic recovery continued to falter and spill over into other EMs. Stocks sold off as US bond yields rose, and the Fed emphasized its higher-for-longer intentions, which reverberated globally. During the quarter, sector performance within the MSCI EM Index was mixed. The communication-services and technology sectors underperformed and delivered negative absolute returns, while the energy and consumer-discretionary sectors delivered positive absolute returns and outperformed on a relative basis.

MARKET REVIEW (1 AUGUST 2023 TO 31 OCTOBER 2023)

EM equities, as measured by the MSCI Emerging Markets Index, declined 3.9% in October 2023, underperforming DMs. A rapid rise in bond yields—especially the 10-years US Treasury note, which briefly crossed the 5% threshold—and headwinds from the conflict in the Middle East weakened EM risk sentiment considerably and helped maintain the US dollar's elevated level against regional currencies. Year to date, the MSCI EM Index is down 2.1% (all returns in USD terms). China's equity markets declined amid increased scrutiny of its worsening property market slump and weak consumer spending. After economic data showed growth continuing to slow despite earlier stimulus measures, China's central bank unexpectedly cut a range of key interest rates in an effort to revive its economy.

MARKET OUTLOOK*

Valuations across the EM equity market continue to look very attractive and, in our view, offer investors an opportunity to diversify risk outside of DMs, where valuations are richer, and earnings could come under pressure should we see material economic deceleration from here. We remain optimistic for the prospects for EM returns this year and are encouraged by EMMA's strong year-to-date outperformance versus both the equity and debt market. Our favorable view on EM continues to be backed by solid fundamentals, attractive relative valuations and improving technical. Against this backdrop, we expect to see good forward returns for EM, but as we have seen this year, it may be a bumpy ride, which is why a risk-managed solution for EM.
