Key Risks

General risks of investing in a collective investment scheme	
Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that your investment in the wholesale fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager's risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments. In the event units are used as collateral, you may be required to top-up your existing instalment if the price of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the financing.
Reclassification of Shariah status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the SAC of the SC, Shariah adviser of the issuer, the Shariah adviser of the Fund or the Shariah boards of the relevant Islamic indices. If this occurs, we will take the necessary steps to dispose such securities. There may be opportunity loss to the fund due to the fund not being allowed to retain the excess gains derived from the disposal of the Shariah non-compliant securities. In the event that the Shariah non-compliant securities are disposed at a price lower than the investment cost, it may adversely affect the value of the fund. Thus, it may cause the NAV of the fund or price of units to fall.
Specific risks related to the Fund	
Risk associated with investing in Islamic CIS	Since the Fund will invest entirely into Islamic CIS, there is a risk of concentration into Islamic CIS, in which the Islamic CIS's management company has absolute discretion over the Islamic CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Islamic CIS and/or the management company, the NAV of the Fund, which invests into those Islamic CIS would be affected negatively. Should the situation arise, we will seek for another Islamic CIS that is consistent with the objective of this Fund.
Country risk	The Fund may invest into Islamic CIS which can be domiciled in various countries. Therefore, the Fund will be subjected to risks specific to the countries in which the Islamic CIS are domiciled in. Such risks include adverse changes in economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may be an adverse impact on the price of the Islamic CIS, which will depress the Islamic CIS's NAV growth, and consequently depress the Fund's NAV growth.
Currency risk	As the Fund may invest into Islamic CIS denominated in currencies other than MYR, any fluctuation in the exchange rate between MYR and the currencies in which the Islamic CIS are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the Islamic CIS are denominated depreciate against MYR, this will have an adverse effect on the NAV of the Fund in MYR and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Fund and are not set out in any particular order of priority. You should be aware that an investment in a Wholesale Fund may be exposed to other risks from time to time. If in doubt, please consult your professional advisers for a better understanding of the risks.

Note: Please take note that if your investments are made through an institutional unit trust schemes adviser via a nominee system of ownership, you would not be deemed as a Unit holder under the deed of the Fund and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).
