## Fund Manager's Report

The Fund fell by 5.02% in May 2021, underperforming the benchmark by 126bps. Stock selection in Materials and Information Technology dragged the fund performance. On the YTD, the fund underperformed the Benchmark by 47bps.

Malaysia's manufacturing PMI eased from April's record of 53.9pts to 51.3pts in May, given the stricter measures imposed to combat COVID-19 infections, but the measure suggested that the manufacturing sector was still expanding. It was also the first time back-to-back monthly improvements were reported since mid-2018. Manufacturing output could be dampened in the months ahead, as the country goes into 'full lockdown', but firms surveyed by IHS Markit remained optimistic that output would increase over the coming 12 months.

BNM maintained its OPR at 1.75% during its May policy meeting despite expecting inflation to average 2.5-4.0% this year. We continue to expect that the central bank will maintain an accommodative monetary policy and resort to fiscal measures and stimulus to support the economy. Bank Negara pegs 2021 GDP growth at 6.0-7.5%, but the recent lockdown measures have caused economists to shave 100-150bps off their respective GDP forecasts.

Consensus projects KLCI earnings to grow almost 45% in 2021 but stay flat in 2022. There were modest upgrades in Financials and Materials, but they were largely offset by cuts in reopening plays such as Transport and Gaming. Excluding gloves, earnings growth for 2022 is still projected to be in the mid-teens, which is very commendable. However, there seems downside risk to earnings for most of the laggard sectors, in particular Gaming, Transport and Tech. Gaming and Transport would largely depend on the pace of reopening, while expectations for Technology companies is quite high.

We stay Neutral on Malaysia. Despite the near-term headwinds, we remain proponents of the reopening theme and thus constructive on Cyclical, Consumer Discretionary and select Transport sectors. We turned cautious on some commodities but remain positive on energy and aluminum. The former will benefit from rising air travel activities and the latter due green infrastructure spending. We are very selective on Tech and maintain our underweight stance on Gloves as earnings seem to have peaked despite ESG issues waning.

<sup>a</sup>Based on the fund's portfolio returns as at 15 May 2021, the Volatility Factor (VF) for this fund is 16.160 and is classified as "High" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
