You are advised to request, read and understand the Replacement Prospectus before deciding to invest.

Brief Information on Principal Islamic Global Selection Moderate Conservative Fund

The Fund is an open-ended mixed asset (Shariah-compliant) fund issued by Principal Malaysia. The Fund aims to provide long term capital appreciation and income through Shariah-compliant investments that invests in the global markets within the Target Risk range of the Fund.

This is neither a capital protected fund nor a capital guaranteed fund.

Product Suitability

This Fund is suitable for investors who:

- have a long term investment horizon;
- want Shariah-compliant investment that investment in global markets;
- seek capital appreciation and income; and
- can accept that returns may fluctuate within a target risk range over the investment period.

Key Product Features

Fund Category/Type	Mixed Asset (Shariah-compliant)/Income & Growth			
Base currency	USD			
Benchmark	The Fund is actively managed and does not refer to any specific benchmark, however the Fund will be managed within the Target Risk range of 3% to 5% per annum.			
Investment and Strategy Policy	<p>The Fund will be actively managed with the aim of maximizing the Fund's investment return relative to its Target Risk. To achieve this, the Fund will invest in a diversified mix of asset classes such as Shariah-compliant equities, Sukuk, Islamic gold ETF, Islamic money market instruments and Islamic Deposit. The allocation into each asset class is determined by selecting an optimal portfolio i.e. a portfolio of asset mix that generate the highest expected return for the prescribed Target Risk. For example, the higher the Target Risk, the higher the allocation into higher risk assets such as Shariah-compliant equities or Islamic gold ETF and hence higher potential returns. On the contrary, a low Target Risk will allocate its investment mainly in lower risk assets such as Islamic Deposit and Sukuk and hence generating a lower and more stable potential returns.</p> <p>The Fund will be continuously monitored to ensure that its overall risk level remains align with its prescribed Target Risk range. This is facilitated through rebalancing and/or optimizing the Fund if the current allocation of a particular asset deviates substantially from its optimal allocation; or if there are significant changes in valuations of the assets and market circumstances.</p> <p>The Fund invests in assets that comply to Shariah rules, which includes but not limited to Shariah-compliant equities, Sukuk, Islamic gold ETF, Islamic money market instruments and Islamic Deposit. The Fund may also seek investment exposure via Islamic CIS that is in line with the Fund's objective, subject to the requirements of the GUTF.</p> <p>The Fund's investment in Sukuk will generally be restricted to Sukuk rated at least a minimum credit rating of "BBB-" by S&P or its equivalent rating by other international rating agencies and/or at least "A3" by RAM or equivalent rating by MARC or by local rating agency(ies) of the country ("Investment Grade Sukuk"). Nonetheless, up to 20% of the Fund's NAV may be invested in non-investment grade and/or unrated Sukuk.</p> <ul style="list-style-type: none"> ▪ Up to 40% of the Fund's NAV may be invested in Shariah-compliant equities; ▪ Up to 60% of the Fund's NAV may be invested in Sukuk, out of which: <ul style="list-style-type: none"> - up to 60% of the Fund's NAV may be invested in Investment Grade Sukuk; and/ or - up to 20% of the Fund's NAV may be invested in non-investment grade and/or unrated Sukuk; ▪ Up to 60% of the Fund's NAV may be invested in Islamic money market instruments; ▪ Up to 20% of the Fund's NAV may be invested in Islamic gold ETF; and ▪ At least 2% of the Fund's NAV will be invested in Islamic Deposit.

Key Risks

General risks of investing in a fund	
Returns and capital not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment which includes your investment capital and returns, nor any assurance that the fund's objective will be achieved. You should also note that the fund is neither a capital guaranteed fund nor a capital protected fund. However, we reduce this risk by ensuring diligent management of the assets of the fund based on a structured investment process.
Market risk	This risk refers to the possibility that an investment will lose value because of a general decline in financial markets due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that your investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments. In the event units are used as collateral and if the prices of units fall below a certain level due to market conditions, you may be required to pay additional amount on top of your existing instalment. If you fail to do so within the time prescribed, your units may be sold at an unfavourable price and the proceeds thereof will be used towards the settlement of your financing.
Manager risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Liquidity risk	Liquidity risk refers to the ease of liquidating an asset without causing market dislocation. This depends on the supply and demand as well as the asset's volume or amount traded in the market. If the fund holds assets that are illiquid or difficult to dispose of, or due to liquidity policy applied by the CIS (e.g. suspension of the CIS), the value of the fund and consequently the value of unit holders' investment in the fund, will be negatively affected.
Shariah non-compliance risk	This refers to the risk of the fund not conforming to Shariah Investment Guidelines due to investment in Shariah non-compliant instrument or reclassification of Shariah status. In the event that the manager is required to rectify any Shariah non-compliance by disposing the related instrument, any losses from disposal due to investment in Shariah non-compliant instrument will be borne by the manager whereas any losses from disposal due to reclassification of Shariah status will be borne by the fund. In any circumstances, gain received from disposal shall be channeled to baitulmal and/or charitable bodies as approved by the Shariah Adviser.
Specific risks associated with the investment portfolio of the Fund	
Stock specific risk	Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
Country risk	Investments of the Fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund to fall.
Risk of investing in emerging markets	In comparison with investments in the developed markets, investments in emerging markets may involve a higher degree of risk due to the greater possibility of political or economic instability and societal tensions. Emerging markets are markets that are, by definition, "in a state of transition" and are therefore exposed to rapid political change and economic declines. The Shariah-compliant securities in the emerging markets may face a higher risk of price drop while the exchange rates in these emerging markets are generally more volatile than those of developed markets. As such, you should be aware that investments in emerging markets may be subjected to higher price volatility and therefore will tend to have a higher investment risk that will affect the Fund's growth. We attempt to mitigate these risks through active asset allocation management and diversification across different countries and sectors, in addition to our continuous bottom-up and top-down research and analysis.
Currency risk	There are 2 levels of currency risk associated with the investment of the Funds: <ul style="list-style-type: none"> • Currency risk at the Fund's portfolio level As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment. • Currency risk at the Class level

	<p>You should be aware that the currency risk is applicable to Class(es) which is denominated in a different currency other than the base currency of the Fund. The impact of the exchange rate movement between the base currency of the Fund and the currency denomination of the respective Class(es) may result in a depreciation of the value of your holdings as expressed in the currency denomination of the respective Class(es).</p> <p>You should realise that currency risk is considered as one of the major risks due to the volatile nature of the foreign exchange market. When deemed necessary, we may utilize Islamic derivative instruments, subject to GUTF, to hedge currency risk. If the Fund utilizes Islamic derivative for hedging against the base currency of the Fund, you should note that as a result of hedging, the Fund will not be able to enjoy the full benefits of currency movement in the event of a favourable movement of currency.</p>
Credit and default risk	<p>The Fund will be exposed to a certain degree of credit and default risk of issuers or counterparties when the Fund invests in Sukuk, Islamic money market instruments and/or places in Islamic Deposits. Credit risk relates to the creditworthiness of the securities issuers or counterparties and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer or counterparties may impact the value as well as liquidity of the investments. In the case of rated Sukuk, this may lead to a credit downgrade. Default risk relates to the risk that a securities issuer or counterparties either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investments. This could adversely affect the value of the Fund. We aim to mitigate this risk by performing bottom-up and top-down credit research and analysis to determine the creditworthiness of the issuers or counterparties, and impose investment limits on exposures for issuers or counterparties with different credit profiles as a precautionary step to limit any loss that may arise directly or indirectly as a result of a defaulted transaction.</p>
Interest rate risk	<p>Interest rate risk refers to the impact of interest rate changes on the valuation of Sukuk and Islamic money market instruments. When interest rates rise, Sukuk and Islamic money market instruments prices generally decline and this may lower the market value of the Fund's investment in Sukuk and Islamic money market instruments. In managing the Sukuk, we take into account the coupon rate and time to maturity of the Sukuk with an aim to mitigate the interest rate risk. As for Islamic money market instruments, the typical tenor of these instruments are less than 12-month maturity and unlike Sukuk, any change to interest rate will only have a minor impact to the prices of these instruments.</p> <p>Please note that although Sukuk is a non-interest bearing instrument, its price movement is correlated to the movement in the interest rates. As such, investment in Sukuk will have an exposure to the movement of the interest rates. Even though the Fund does not invest in interest bearing instruments, the interest rate referred herein is to the general interest rate of the country, which may affect the value of the investment of the Fund.</p>
Risk associated with investing in Islamic CIS	<p>Since the Fund may invest into Islamic CIS, there is a risk of concentration into Islamic CIS, in which the Islamic CIS's management company has absolute discretion over the Islamic CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Islamic CIS and/or the management company, the NAV of the Fund, which invests into those Islamic CIS would be affected negatively. Should the situation arise, we will seek for another Islamic CIS that is consistent with the objective of the Fund.</p>
Risk associated with investing in Islamic Gold ETF	<p>Gold is a type of precious metal that is finite in nature. As the supply of gold decreases, the price of gold will increase and vice versa, assuming all other factors remain the same. There is a constant mismatch in the supply and demand space, which makes it difficult to adjust production of gold to meet the changing demand. Gold contains various attributes both for industrial and non-industrial purposes; however as gold becomes more expensive, there may be incentive to seek out other alternatives or substitutes that may be cheaper and/ or more readily available. This will result in decrease in both the price and demand of gold.</p>

The above summary of risks does not purport to be an exhaustive list of all the risk factors relating to investments in the Fund and are not set out in any particular order of priority. You should be aware that an investment in a unit trust fund may be exposed to other risks from time to time. If in doubt, you should consult professional advisers for a better understanding of the risks.

Note: If your investments are made through an IUTA via a nominee system of ownership, you would not be deemed to be a Unit holder under the Deed and as a result, you may not exercise all the rights ordinarily conferred to a Unit holder (e.g. the right to call for Unit holders' meetings and the right to vote at a Unit holders' meeting).

Valuations

We will carry out the valuation for the Classes for a Business Day on the next Business Day (T+1) by 4:00 p.m. This is to cater for the currency translation of the foreign Shariah-compliant securities and/or Shariah-compliant instruments to the Fund’s base currency (i.e. USD) based on the bid exchange rate quoted by Bloomberg or Refinitiv at UK time 4:00 p.m. on the same day (Malaysian time 11:00 p.m. or 12:00 a.m.), or such other time as stipulated in the IMS. The NAV per unit for a Business Day is available on our website at www.principal.com.my after 5:30 p.m. on the following Business Day (T+1). Please refer to the “Unit Pricing” section of the Prospectus for more information.

Avenues to Exit This Investment

To exit from this investment, you may withdraw, switch out or transfer your units holdings to other investors. You may withdraw your investment at the NAV per unit of the Business Day.

Withdrawals can be made from a Class by completing a withdrawal application and submit it to the relevant Distributor or Principal Malaysia’s offices. There is no restriction on the frequency of withdrawals and no Withdrawal Penalty will be charged. Hence, the amount that you will receive is the withdrawal value. You will be paid in the currency of the Class (e.g. Class USD Unit holders will be paid in USD) within seven (7) Business Days upon our receipt of the complete withdrawal request. You will have to bear the applicable bank fees and charges, if any.

For more information on the withdrawals, switching, transfer facility and cooling-off period, please refer to the “Transaction Information” chapter of the Prospectus. For more information on the fees and charges incur when you exit from this investment, please refer to “Fees, Charges and Expenses” chapter of the Prospectus.
