MANAGER'S REPORT

FUND OBJECTIVE AND POLICY

What is the investment objective of the Fund?

The Fund aims to achieve medium to long-term capital appreciation by seeking to match the performance of the FTSE Bursa Malaysia ("FBM") Kuala Lumpur Composite Index ("FBMKLCI").

Has the Fund achieved its objective?

For the financial period under review, the Fund has performed in line with its objectives as stated in its investment objective section.

What are the Fund investment policy and principal investment strategy?

The Fund is an index fund which aims to track the movement of the FBMKLCI. The Fund's indexing strategy is to hold a representative sample of the securities that make up its underlying index. Thus, the Fund normally invests at least 90% of its Net Asset Value ("NAV") in the index stocks representing the top 95%-98% of the index weights. As such, the Fund may invest up to 30 index stocks, being the representative index stocks of the FBMKLCI. The Fund may also utilise index futures to ensure it is fully invested at all times and to reduce transaction costs.

The asset allocation strategy for this Fund is as follows:

- up to 99.5% of the Fund will be invested in securities and other permissible investments; and
- at least 0.5% in liquid assets.

Fund category/ type

Equity/ Index-tracking

When was the Fund launched?

8 June 2000

What was the size of the Fund as at 31 March 2024?

RM12.95 million (9.34 million units)

What is the Fund's benchmark?

FBMKLCI

Note: The Fund's benchmark is for performance comparison purpose only.

What is the Fund distribution policy?

No distribution is expected to be paid, however, distribution, if any, will be incidental and will vary from period to period depending on interest rates, market conditions and the performance of the Fund.

MARKET REVIEW (1 OCTOBER 2023 TO 31 MARCH 2024)

FBMKLCI gained 18 points (“pts”) or 1.3% in October 2023, which improved the Year to Date (“YTD”) decline to 3.6%. There were bargain hunting in Financials and Commodities following the steep sell-off in the previous month, while Telecommunications (mainly mobile operators) were laggards. Within the broader market, Construction performed while Technology, Energy and Property languished. Overall sentiment remains clouded by the surge in US treasury yields which topped 5% last month and persistent dollar strength affecting Emerging Market (“EM”) markets, coupled with tensions in the Middle East.

Malaysian equity indices recorded positive results in November 2023. The FBMKLCI gained of 0.7% or 10.60 pts. Notable sectoral performance saw Utilities, Healthcare, Technology, Plantation, Consumer and REITs sectors leading in gains. While Energy, Telecommunication, Transportation, Construction, Property, Finance and Industrial sectors recorded losses.

In December 2023, FBMKLCI was up only 2 pts or 0.1%, and ended 2023 at 1,454.66 pts. Investors rejoiced at the Federal Reserve (the “Fed”) decision to hold rates and signalling the end of hikes given the cooling inflation data and recent economic data out of the US, coupled with the weaker Dollar and falling treasury yields, they were quick to lock in gains when the index rose to 1,470 pts and ahead of the year-end holidays. Financials, Utilities, Healthcare and select Telecommunication saw gains, while select commodities and Consumer-related names were sold off.

FBMKLCI was up 4% or 58.3 pts in January 2024, closing the month at 1,512.98 pts. This marked the 4th consecutive month of gains, with Malaysia outperforming most ASEAN markets. Sentiment was lifted by Fed’s communication on interest rates given the recent cooling inflation and economic data out of the US. The weaker Dollar and lower treasury yield that ensued favored EM. Utilities, Commodities, Telecommunication and Financials topped the gainers list. Within the broader market, Energy, Construction and Property did well, while Technology languished despite the sentiment on Fed rates.

FBMKLCI’s rally extended into February 2024, up 2.5% for the month vs up 4% in January 2024, closing the month at 1,551.44 pts. This marked the 5th consecutive month of gains, with Malaysia outperforming most ASEAN markets. This was also despite the stronger dollar following stronger-than-expected inflation and economic data out of the US, and bets on rate cuts by the Fed pushed back. Financials, Utilities, Commodities and Telcos topped the gainers list. Within the broader market, Energy did well, and Technology rebounded strongly.

In March 2024 KLCI lost 1% as profit-taking set in following 5 months of consecutive gains. Bets on rate cuts by the Fed were pushed back given the persistent strong data out of the US, and there was an absence of fresh catalysts domestically.

MARKET REVIEW (1 OCTOBER 2023 TO 31 MARCH 2024) (CONTINUED)

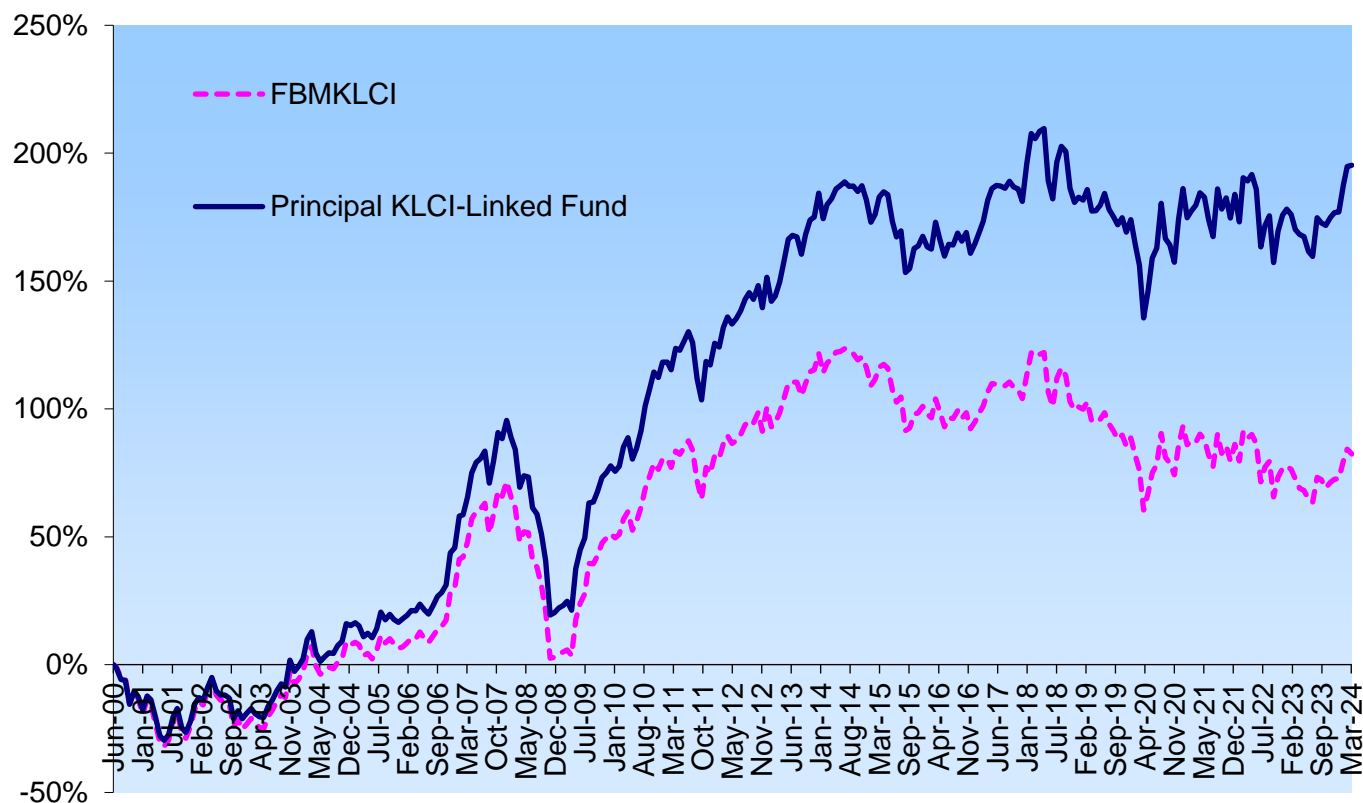

During the month, there were also distortions caused by FTSE rebalancing (as well as MSCI rebalancing in February 2024) and many index stocks going ex-dividends. Financials, Transport, Utilities and Commodities topped the gainers list while Telcos languished. Within the broader market, Property, Construction, Technology, Healthcare and Energy did well.

MARKET OUTLOOK*

Malaysia's equity market valuation still remains extremely compressed with forward price earning ("P/E") ratio of c13.5 times which is still ~1.5 Standard Deviation ("SD") below the historical mean. This is based on consensus earnings growth of 9% for 2024 and 6% for 2025. More clarity on the new Government's policy posture, in our view, should reduce the current extreme risk premiums applied to the market (yield gap of ~360 basis points ("bps")). We are also hopeful that the newly launched National Energy Transition Roadmap ("NETR") by the government would revitalize domestic investment and buoy consumption.

We see prospect for the KLCI to rise to 1,600 pts by end-2024. Four key catalysts that could spur the market are Fed pivot and further weakness in the Dollar, Reallocation of portfolio investments domestically, Lower risk premiums as a result of fiscal consolidation and policy continuity and corporate earnings sustaining with growth re-accelerating.

* This market outlook does not constitute an offer, invitation, commitment, advice, or recommendation to make a purchase of any investment. The information given in this article represents the views of Principal Asset Management Berhad ("Principal Malaysia") or based on data obtained from sources believed to be reliable by Principal Malaysia. INVESTMENT STRATEGY

As this is an index fund, the Fund will continue to remain fully invested in the benchmark index stocks with minimal cash kept for liquidity purposes in order to track the performance of the benchmark.

SOFT COMMISSIONS AND REBATES

Principal Malaysia (the "Manager") and the Trustee will not retain any form of rebate from, or otherwise share in any commission with, any broker or dealer in consideration for directing dealings in the investments of the Principal Malaysia Funds ("Funds"). Accordingly, any rebate or shared commission will be directed to the account of the Fund. The Manager may retain goods and services (soft commission) provided by any broker or dealer if the following conditions are met:

SOFT COMMISSIONS AND REBATES (CONTINUED)

- (a) the soft commission brings direct benefit or advantage to the management of the Fund and may include research and advisory related services;
- (b) any dealings with the broker or dealer is executed on terms which are the most favourable for the Fund; and
- (c) the availability of soft commission is not the sole or primary purpose to perform or arrange transactions with such broker or dealer, and we and the fund the manager will not enter into unnecessary trades in order to achieve a sufficient volume of transactions to qualify for soft commission.

During the financial period under review, the Manager and Trustee did not receive any rebates from the brokers or dealers but the Manager has retained soft commission in the form of goods and services for the benefit of the fund such as financial wire services and stock quotations system incidental to investment management of the Funds and there was no churning of trades.

SECURITIES FINANCING TRANSACTIONS

The Fund has not undertaken any securities lending or repurchase transactions during the financial period under review.

STATE OF AFFAIR OF THE FUND

In relation to this Fund, the Fund had issued the First Supplemental Master Prospectus (Conventional funds) dated 27 October 2023.

We are of view that the changes above do not affect the existing unit holder to stay invested in the Fund and it is not a significant change. Unit holders may refer to Appendix 1 for the detailed list of changes.

There were no significant changes in the state of affairs of the Fund during the period and up to the date of Manager's report, not otherwise disclosed in the financial statements.

CIRCUMSTANCES THAT MATERIALLY AFFECT ANY INTEREST OF UNIT HOLDERS

There were no circumstances that had materially affected the interest of the unit holders during the financial period under review.

CROSS TRADE

No cross-trade transactions have been carried out during the financial period under review.

UNIT SPLIT

No unit split exercise have been carried out during the financial period under review.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE SIX MONTHS FINANCIAL PERIOD ENDED 31 MARCH 2024****1. THE FUND, THE MANAGER, AND ITS PRINCIPAL ACTIVITIES**

Principal KLCI-Linked Fund (the “Fund”) is governed by a Master Deed dated 30 November 2007, a First Supplemental Master Deed dated 25 June 2008, a Second Supplemental Master Deed dated 14 July 2008, a Third Supplemental Deed dated 16 July 2009, a Fourth Supplemental Deed dated 26 July 2013, a Fifth Supplemental Deed dated 23 March 2015, a Sixth Supplemental Deed dated 21 October 2019 and a Seventh Supplemental Deed dated 13 January 2023 (collectively referred to as the “Deeds”), made between Principal Asset Management Berhad (the “Manager”) and HSBC (Malaysia) Trustee Berhad (the “Trustee”).

The Fund is an index fund which aims to track the movement of the FBMKLCI. The Fund’s indexing strategy is to hold a representative sample of the securities that make up its underlying index. Thus, the Fund normally invests at least 90% of its NAV in the index stocks representing the top 95%-98% of the index weights. As such, the Fund may invest up to 30 index stocks, being the representative index stocks of the FBMKLCI. The Fund may also utilise index futures to ensure it is fully invested at all times and to reduce transaction costs.

The asset allocation strategy for this Fund is as follows:

- up to 99.5% of the Fund will be invested in securities and other permissible investments; and
- at least 0.5% in liquid assets.

All investments are subjected to the Securities Commission Malaysia (“SC”) Guidelines on Unit Trust Funds (“GUTF”), SC requirements, the Deeds, except where exemptions or variations have been approved by the SC, internal policies and procedures and the Fund’s objective.

The Fund had issued First Supplemental Master Prospectus (Conventional Funds) dated 27 October 2023.

The Manager is a joint venture between Principal Financial Group®, a member of the FORTUNE 500® and a Nasdaq-listed global financial services and CIMB Group Holdings Berhad, one of Southeast Asia’s leading universal banking groups. The principal activities of the Manager are the establishment and management of unit trust funds and fund management activities.

2. MATERIAL ACCOUNTING POLICIES

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements:

(a) Basis of preparation

The financial statements have been prepared in accordance with the provisions of the MFRS as issued by the Malaysian Accounting Standards Board (“MASB”) and International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

The financial statements have been prepared under the historical cost convention, as modified by financial assets at fair value through profit or loss.

The preparation of financial statements in conformity with MFRS and IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported period.

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(a) Basis of preparation (continued)

It also requires the Manager to exercise their judgement in the process of applying the Fund's accounting policies. Although these estimates and assumptions are based on the Manager's best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 2(j).

There are no other standards, amendments to standards or interpretations that are effective for interim periods beginning on 1 October 2023 that have a material effect on the financial statements of the Fund.

None of the standards, amendments to standards or interpretations that are effective for the financial period beginning on/after 1 April 2024 are applicable to the Fund.

(b) Financial assets and financial liabilities

Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those to be measured at amortised cost.

The Fund classifies its investments based on both the Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed, and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities at fair value through other comprehensive income ("OCI").

The contractual cash flows of the Fund's debt securities are solely principal and profit ("SPPI"). However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

The Fund classifies cash and cash equivalents, amount due from Manager and dividends receivable as financial assets at amortised cost as these financial assets are held to collect contractual cash flows consisting of the amount outstanding.

All of the Fund's financial liabilities are measured at amortised cost.

Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date, the date on which the Fund commits to purchase or sell the asset. Investment are initially recognised at fair value. Transaction costs are expensed in the statement of comprehensive income.

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(b) Financial assets and financial liabilities (continued)

Recognition and measurement (continued)

Financial instruments are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Unrealised gains or losses arising from changes in the fair value of the financial assets at fair value through profit or loss are presented in the statement of comprehensive income within net gain or loss on financial assets at fair value through profit or loss in the financial period which they arise.

Dividend income from financial assets at fair value through profit or loss is recognised in the statement of comprehensive income as part of gross dividend income when the Fund's right to receive payments is established.

Quoted securities in Malaysia are valued at the last traded market price quoted on Bursa Malaysia Securities Bhd ("Bursa Securities") at the date of the statement of financial position.

If a valuation based on the market price does not represent the fair value of the quoted securities, for example during abnormal market conditions or when no market price is available, including in the event of a suspension in the quotation of the quoted securities for a period exceeding 14 days, or such shorter period as agreed by the Trustee, then the quoted securities are valued as determined in good faith by the Manager, based on the methods or bases approved by the Trustee after appropriate technical consultation.

Deposits with licensed financial institutions are stated at cost plus accrued interest calculated on the effective interest method over the financial period from the date of placement to the date of maturity of the respective deposits.

Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective interest rate method.

Impairment for assets carried at amortised costs

The Fund measures credit risk and expected credit losses ("ECL") using probability of default, exposure at default and loss given default. The Manager consider both historical analysis and forward looking information in determining any ECL. The Manager consider the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month ECL as any such impairment would be wholly insignificant to the Fund.

Significant increase in credit risk

A significant increase in credit risk is defined by the Manager as any contractual payment which is more than 30 days past due.

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)**(b) Financial assets and financial liabilities (continued)**Definition of default and credit-impaired financial assets

Any contractual payment which is more than 90 days past due is considered credit impaired.

Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor's sources of income or assets to generate sufficient future cash flows to repay the amount. The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in impairment gains. There are no write-offs/recoveries during the financial period.

(c) Income recognition

Dividend income is recognised on the ex-dividend date when the right to receive payment is established.

Interest income from deposits with licensed financial institutions is recognised on a time proportionate basis using the effective interest rate method on an accrual basis.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

Realised gain or loss on disposal of quoted securities are accounted for as the difference between the net disposal proceeds and the carrying amount of investments, determined on a weighted average cost basis.

(d) Functional and presentation currency

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Malaysian Ringgit ("MYR/RM"), which is the Fund's functional and presentation currency.

(e) Cash and cash equivalents

For the purpose of statement of cash flows, cash and cash equivalents comprise bank balances and deposits held in highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(f) Taxation

Current tax expense is determined according to Malaysian tax laws at the current rate based upon the taxable profit earned during the financial period.

Withholding taxes on investment income from investments are based on tax regime of the respective countries that the Fund invests in. They are presented within other expenses line in the statement of comprehensive income.

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)**(g) Transaction costs**

Transaction costs are costs incurred to acquire or dispose financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers, and dealers. Transaction costs, when incurred, are immediately recognised in the statement of comprehensive income as expenses.

(h) Realised and unrealised portions of increase/decrease in net assets attributable to unit holders.

The analysis of realised and unrealised portions of increase/decrease in net assets attributable to unit holders as presented on the statement of comprehensive income is prepared in accordance with GUTF.

(i) Unit holders' contributions

The unit holders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "*Financial Instruments: Presentation*". Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's NAV;
- the units are the most subordinated class and class features are identical;
- there is no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

The outstanding units are carried at the redemption amount that is payable at each financial period if unit holder exercises the right to put the unit back to the Fund.

Units are created and cancelled at prices based on the Fund's NAV per unit at the time of creation or cancellation. The Fund's NAV per unit is calculated by dividing the net assets attributable to unit holders with the total number of outstanding units.

(j) Critical accounting estimates and judgements in applying accounting policies

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Funds' results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgement are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the GUTF.

However, the Manager is of the opinion that there are no accounting policies which require significant judgement to be exercised.

3. RISK MANAGEMENT OBJECTIVES AND POLICIES

The investment objective of the Fund is to achieve medium to long-term capital appreciation by seeking to match the performance of the FBMKLCI.

The Fund is exposed to a variety of risks which include market risk (inclusive of price risk and interest rate risk), credit risk and liquidity risk.

Financial risk management is carried out through internal control process adopted by the Manager and adherence to the investment restrictions as stipulated in the Deeds and GUTF

(a) Market risk

(i) Price risk

Price risk is the risk that the fair value of an investment in quoted securities will fluctuate because of changes in market prices (other than those arising from interest rate risk). The value of quoted securities may fluctuate according to the activities of individual companies, sector, and overall political and economic conditions. Such fluctuation may cause the Fund's NAV and prices of units to fall as well as rise, and income produced by the Fund may also fluctuate.

The price risk is managed through portfolio diversification and selection of quoted securities and other financial instruments within specified limits according to the Deeds.

(ii) Interest rate risk

Interest rate is a general economic indicator that will have an impact on the management of the Fund.

Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates.

The Fund's exposure to fair value interest rate risk arises from investment in money market instruments. The interest rate risk is expected to be minimal as the Fund's investments comprise mainly short-term deposits with approved licensed financial institutions.

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Fund is not exposed to cash flow interest rate risk as the Fund does not hold any financial instruments at variable interest rate.

As at the end of each financial period, the Fund is not exposed to a material level of interest rate risk.

The Fund's exposure to interest rate risk associated with deposits with licensed financial institutions is expected to be minimal as the deposits are held on short-term basis.

3. RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)**(b) Credit risk**

Credit risk refers to the risk that a counterparty will default on its contractual obligation resulting in financial loss to the Fund.

The credit risk arising from placements of deposits in licensed financial institutions is managed by ensuring that the Fund will only place deposits in reputable licensed financial institutions.

For amount due from stockbrokers, the settlement terms are governed by the relevant rules and regulations as prescribed by respective stock exchange. The credit risk is minimal as all transactions in quoted securities are settled or paid upon delivery using approved stockbrokers.

For amount due from Manager, the settlement terms of the proceeds from the creation of units receivable from the Manager are governed by the GUTF.

(c) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations.

The Manager manages this risk by maintaining sufficient level of liquid assets to meet anticipated payments and cancellations of the units by unit holders. Liquid assets comprise bank balances and deposits with licensed financial institutions, which are capable of being converted into cash within 7 business days. Generally, all investments are subject to a certain degree of liquidity risk depending on the nature of the investment instruments, market, sector, and other factors. For the purpose of the Fund, the Manager will attempt to balance the entire portfolio by investing in a mix of assets with satisfactory trading volume and those that occasionally could encounter poor liquidity. This is expected to reduce the risks for the entire portfolio without limiting the Fund's growth potentials.

(d) Capital risk management

The capital of the fund is represented by net asset attributable to unit holders. The amount of capital can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unit holders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns to unit holders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

(e) Fair value estimation

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

The fair value of financial assets traded in active markets (such as trading securities) are based on quoted market prices at the close of trading on the financial period end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

3. RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(e) Fair value estimation (continued)

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

(i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

3. RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(e) Fair value estimation (continued)

(i) Fair value hierarchy (continued)

Investments whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include active listed equities. The Fund does not adjust the quoted prices for these instruments. The Fund's policies on valuation of these financial assets are stated in Note 2(b).

ii) The carrying values of cash and cash equivalents, amount due from Manager, dividends receivable and all current liabilities are a reasonable approximation of their fair values due to their short-term nature.

4. MANAGEMENT FEE

In accordance with the Deeds, the Manager is entitled to a maximum management fee of 1.50% per annum, calculated daily based on the NAV of the Fund.

For the six months financial period ended 31 March 2024, the management fee is recognised at a rate of 0.95% per annum (31.03.2023: 0.95% per annum).

There was no further liability to the Manager in respect of management fee other than amounts recognised above.

5. TRUSTEE FEE

In accordance with the Deeds, the Trustee is entitled to a maximum fee of 0.20% per annum, calculated daily based on the NAV of the Fund. The Trustee fee includes local custodian fees but excludes foreign sub-custodian fees (if any).

For the six months financial period ended 31 March 2024, the Trustee fee is recognised at a rate of 0.045% per annum (31.03.2023: 0.07% per annum).

There was no further liability to the Trustee in respect of Trustee fee other than the amount recognised above.

Companies are assessed against relevant and material ESG risks such as climate change, natural resources, human capital, social opportunities which may include but are not limited to climate change and corporate governance. We do not seek to exclude companies which are ranked relatively low in an ESG assessment, rather we see this as an opportunity to engage these companies and advocate adoption of best practices for further improvement. However, companies that do not improve or demonstrate a commitment to improve after engagement exercises may be excluded from further investment or we may dispose of the investment within an appropriate timeframe. We may engage companies in any area of ESG concern, as our understanding of each company is constantly informed by ongoing developments in the company/industry. In our investment process of ESG integration, it is not necessary to dispose of the investment even if the company does not demonstrate a commitment to improve on a particular ESG issue if it is not deemed as material. Effecting change on a company as a minority shareholder would also take time. The appropriate timeframe referred to here would be subject to recommendation by the analyst covering the security, and the decision by the portfolio manager.</p> <p>As part of ESG integration, we overlay ESG analysis into the fundamental research process, where a wide range of ESG factors are considered, including a company’s relationships with each of its stakeholders, such as shareholders, customers, suppliers and their supply chains, their communities, and the environment. The applicable ESG characteristics will depend on the sector from which the stock originates and so will vary from stock to stock. The final outcome of the analysis is to assign either a low, medium or high sustainability risk and an improving, stable or deteriorating sustainability trend. The analyst will document the assessment and discussion in the research platform or via email. Companies ranked relatively low in an ESG assessment means that they are determined to have “high” level of sustainability risk, based on our sustainability risk framework.</p>

1.8.2/48	Nil	<p>1.8.2.16. Sustainability risk</p> <p>The Fund is managed based on the characteristics of sustainability. The Fund may exclude securities of certain companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings that do not align with the sustainability criteria. As such, the Fund may underperform funds that do not consider sustainability criteria in their investment strategy. This risk cannot be mitigated as it is inherent to the investment strategy of the Fund.</p> <p>The Fund may be exposed to companies which are ranked relatively low in an ESG assessment.</p>	<ul style="list-style-type: none"> ▪ Principal Asia Pacific Renewables Fund

		<p>We will take the opportunity to engage with these companies to advocate adoption of best practices for further improvement. However, the effectiveness of engagement may vary from company to company. If the engagement with such companies is not effective, we may exclude such companies from further investment or may dispose of the investment within an appropriate timeframe subject to recommendation by the analyst covering the security, and the decision by the portfolio manager as part of the mitigation plan.</p> <p>We may also rely on third party data to assess sustainability risk. However, the data we use could be inaccurate. Hence, we may not correctly assess the impact of sustainability risk, which may negatively impact the performance and consequently the NAV of the Fund. We mitigate the risk through further analysis of data as part of our sustainability research process.</p>	
1.8/48	Nil	<p>RISKS ASSOCIATED WITH INVESTMENT IN CLASS D</p> <p>Cyber security risk This is the risk arising from cyber-attack on e-Wallet App. Should the e-Wallet App be compromised, it may result in unauthorised transactions pertaining to the Fund. Further to that, your investment-related information and personal data may be leaked. All transactions through e-Wallet App and/or the Fund may be temporarily suspended, in which you may not be able to transact through e-Wallet App or in the Fund due to cyber-attack.</p> <p>Functionality risk This is the risk that the e-Wallet App does not operate as intended due to factors including but not limited to connectivity and interface issues. If the e-Wallet App does not function as expected, your transaction through the e-Wallet App may not be correctly processed and/or completed.</p> <p>Risk associated with discontinuation risk on e-Wallet Provider As all the transactions are done through e-Wallet App developed by the e-Wallet Provider, the continuous operation of the e-Wallet Provider is crucial.</p>
