Yours faithfully,
for **Principal Asset Management Berhad**

Munirah Khairuddin
Country Head and Chief Executive Officer, Malaysia
Non-Independent Executive Director

MANAGER'S REPORT**FUND OBJECTIVE AND POLICY****What is the investment objective of the Fund?**

The Fund aims to grow the value of investments over the long-term through investment in Malaysian shares.

Has the Fund achieved its objective?

The Fund has achieved its objective of providing long-term capital growth.

What are the Fund investment policy and principal investment strategy?

The Fund may invest between 70% to 98% (both inclusive) of the Fund's Net Asset Value ("NAV") in local equities. The investment policy and strategy of the Fund will be to invest in stocks which are selected based on their future growth prospects. The Fund may opt to seek investment exposure via collective investment scheme that is in line with the Fund's objective, subject to the requirement of the Securities Commission Malaysia ("SC") Guidelines. In addition, liquid assets may also be strategically used if the Manager feels that the market downside risk is high in the short term. With effect from 10 July 2023, the Fund may invest up to 25% of its NAV in companies that are listed in any Eligible Market globally with some operations or businesses in Malaysia to capture growth opportunities.

The Fund will be managed with high tracking error. The investment strategy of the Fund will be predominantly based on bottom up stock selection instead of investing mainly in the stocks represented in the benchmark. Consequently, the Fund's individual stock and sector weightage will deviate significantly from the benchmark, thus leads to high tracking error. The strategy of the Fund includes utilizing liquid assets dynamically in the changing market conditions. For example, high level of cash holdings in the bearish market will result in higher tracking error as the cash positions helps minimize the degree of the decline in Fund's NAV as compared to the benchmark which have 100% exposure to the market downside.

The asset allocation strategy for this Fund is as follows:

- between 70% to 98% (both inclusive) of the Fund's NAV will be invested in local equities; and
- at least 2% of the Fund's NAV in liquid assets.

Fund category/type

Equity/Growth

When was the Fund launched?

What was the size of the Fund as at 31 December 2023?

RM51.15 million (45.11 million units)

What is the Fund's benchmark?

FTSE Bursa Malaysia ("FBM") Top 100 ("FBM100") Index

What is the Fund distribution policy?

No distribution is expected to be paid, however, distribution, if any, will be incidental and will vary from period to period depending on interest rates, market conditions and the performance of the Fund.

What was the net income distribution for the financial year ended 31 December 2023?

The Fund distributed a total net income of RM2.35 million to unit holders for the financial year ended 31 December 2023. As a result, the NAV per unit dropped from RM1.1361 to RM1.0822 on 24 August 2023 for the financial year ended 31 December 2023.

MARKET REVIEW (1 JANUARY 2023 TO 31 DECEMBER 2023)

For the financial year under review, FBM100 Index (the "Index") rose by 0.63% from 10,419.80 points to 10,485.72 points.

Into 2023, the Index up 0.63% month-on-month ("m-o-m") in January 2023. Generally, growth stocks outperformed, with technology stocks leading the pack as United State ("US") inflation cooled further as well as optimism from China's reopening.

However, the market pullback in February 2023 and the Index fell 2.04% m-o-m in February 2023. Investors remained cautious leading up to Budget 2023 while renewed concerns over the Federal reserve (the "Fed") staying hawkish given persistent inflation coupled with encouraging consumption and employment data in the US recently further weighed on sentiment. The rebound in the US dollar also took flows out of emerging markets.

The Index continued to slip in March 2023, falling 1.53% m-o-m. Weakness was in line with the sell-off in regional markets as investors aggressively risked off following the collapse of several high-profile banks in the US and Europe, potentially triggering a global liquidity squeeze, and mounting worries that US Fed's aggressive tightening may have finally taken a toll on the US economy. The market, however, rebounded towards the later part of the month following Fed's decision to go ahead with a 25 basis points ("bps") hike, downplaying fears of a banking contagion and shifting attention back to inflation which has started to ease, albeit very gradually.

The market dropped for the 3rd consecutive month as the Index was down 0.33% m-o-m in April 2023. Commodities, Telcos and Consumer Discretionary did well during the month, while Financials weakened further on lingering fear of potential banking contagion.

MARKET REVIEW (1 JANUARY 2023 TO 31 DECEMBER 2023) (CONTINUED)

Recent economic data out of the US were mixed. We have a lower first quarter of 2023 ("1Q23") US Gross Domestic Product ("GDP") print of a mere 1%, down from 2.6% in fourth quarter of 2022 ("4Q22").

On the other hand, the US consumer spending remains strong, up 3.7% over the same period (versus ("vs") 1% in 4Q22) on the back of low unemployment and solid wage gains. US Consumer Price Index ("CPI") cooled to 5% in March 2023, a lower-end of forecast, but core Personal Consumption Expenditures ("PCE") picked up from 3.5% in February 2023 to 3.6% in March 2023 no thanks to higher rents.

The Index further dropped by 1.30% m-o-m in May 2023. The sell-off was relatively broad-based, with select stocks within defensive sectors showing green, and we believe it was largely triggered by the recent weakness of the Malaysia/Ringgit ("MYR/RM") on the back of poor Chinese data and consequently the depreciation of the Yuan. Further aggravating the situation was the stronger US Dollar ("USD"). Encouraging payroll and wage, sticky inflation and recent rebound in job openings stoke bets on further rates hikes in the next Federal Open Market Committee ("FOMC") meeting.

The market continued to be jittery with the Index losing 1.06% m-o-m in June 2023. Investors remain wary of the sustained weakness of the MYR, a rather uninspiring 1Q23 corporate results although they were broadly in line, and domestic political uncertainties caused by the upcoming State elections. Expectations of a US recession have now been pushed back to 2024 given the still buoyant data points coming out of the US.

Reversing the loss sustained in previous months, the Index strongly rebounded by 5.58% m-o-m in July 2023. Sentiment was sharply lifted by the slump in the USD, benefiting the MYR, and waning expectations of a US recession following recent favourable economic data points – cooling inflation and still resilient jobs market. Gainers were broad-based, with mainly large caps forging ahead.

The market took a pause following a dizzying rally the previous month, the Index was up just 0.18% m-o-m in August 2023. That said, we saw decent gains in Financials, Utilities and Materials. Sentiment was dampened by rebound in the USD and rising US treasury yields on expectations of further interest rate hikes in the US as economic data points remain strong.

The Index dropped 1.61% m-o-m in September 2023. The sell-off, which largely concentrated towards the last week of the month, was rather broad-based, led by Financials and Commodities. While there could be volatility caused by quarter-end rebalancing, investors were spooked by US treasury yields at a 16-year high and persistent USD strength affecting Emerging Market ("EM") markets, in addition to the Fed's hawkish messaging on interest rates.

In October 2023, the Index gained 0.69% m-o-m. There were bargain hunting in Financials and Commodities following the steep sell-off in the previous month. Within the broader market, Construction performed better while Tech, Energy and Property languished. Overall sentiment remains clouded by the surge in US treasury yields which topped 5% last month and persistent dollar strength affecting EM markets, coupled with tensions in the Middle East.

The Index gained 0.79% m-o-m in November 2023. Overall sentiment was lifted by expectations that the US Fed may be done with rate hikes given the cooling inflation and recent economic data out of the US. The pullback in US treasury yields and the weaker USD lifted interest in EM markets.

FBM100 index ended 2023 higher with the month of December 2023 rising by 0.86% m-o-m. Investors rejoiced at the US Fed's decision to hold rates and signaling the end of hikes given the cooling inflation data and recent economic data out of the US. Coupled with the weaker USD and falling treasury yields, investors were quick to lock in gains ahead of the year-end holidays.

FUND PERFORMANCE

Asset allocation for quoted securities reduced from 96.88% as at 31 December 2022 to 95.03% as at 31 December 2023 whilst 1.48% was invested in collective investment scheme as at 31 December 2023, reflecting our constructive view on the equity market as we position the Fund for 2024.

MARKET OUTLOOK*

Malaysia's PMI was unchanged at 47.9 pts in December 2023. According to Standard & Poor's ("S&P") Global, Malaysian manufacturers continue to endure weak demand conditions, albeit the moderation of new orders was the softest since August 2023. Nonetheless, manufacturers remain optimistic of demand conditions over the course of the next 12 months. The latest PMI suggests that GDP growth is running at similar level to that seen in second quarter ("2Q") and third quarter ("3Q") of 2.9% and 3.3% year-on-year ("y-o-y") respectively. To recap, Bank Negara Malaysia ("BNM") projects GDP to grow 4% in 2023 and 4-5% in 2024.

BNM maintained Overnight Policy Rate ("OPR") at 3.00% in November's 2023 Monetary Policy Committee ("MPC"). We expect no rate hikes for 2024 given muted inflation and modest economic growth. Inflation eased further to 1.5% in November 2023, significantly undershooting BNM's revised target of 2.5-3.0% for 2023. Given the low base, there appears to be sufficient headroom to central bank's 2.1-3.6% CPI forecast for 2024 with the impending cut back in subsidies.

Malaysia's equity market valuation remains compressed with forward Price per Earning ("P/E") ratio of 13.4 times which is still ~1.5SD below the historical mean. This is based on consensus earnings growth of 4% for 2023 and 11% for 2024. More clarity on the new Government's policy posture, in our view, should reduce the current extreme risk premiums applied to the market (yield gap of ~360 bps). We are also hopeful that the newly launched National Energy Transition Roadmap ("NETR") by the government would revitalize domestic investment and buoy consumption.

We identify 4 key catalysts that could spur the market: (i) Fed pivot and further weakness in the USD, (ii) Reallocation of portfolio investments domestically, (iii) Lower risk premiums as a result of fiscal consolidation and policy continuity, and (iv) Corporate earnings sustaining with growth re-accelerating.

* This market outlook does not constitute an offer, invitation, commitment, advice, or recommendation to make a purchase of any investment. The information given in this article represents the views of Principal Asset Management Berhad ("Principal Malaysia") or based on data obtained from sources believed to be reliable by Principal Malaysia. Whilst every care has been taken in preparing this, Principal Malaysia makes no guarantee, representation or warranty and is under no circumstances liable for any loss or damage caused by reliance on, any opinion, advice or statement made in this market outlook.

INVESTMENT STRATEGY

We remain positive on the market. We remain constructive on sectors that stand to gain from the NETR, including Utilities, Construction, and Property. Additionally, we remain optimistic on selective Technology due to the ongoing structural growth trends in the sector.

INVESTMENT STRATEGY (CONTINUED)

Key risks are the derailment of Malaysia's macroeconomic recovery and corporate earnings growth due to the larger-than-expected impact of rising inflation, slower global economic growth, and heightened geopolitical risks.

SOFT COMMISSIONS AND REBATES

Principal Malaysia (the "Manager") and the Trustee will not retain any form of rebate from, or otherwise share in any commission with, any broker or dealer in consideration for directing dealings in the investments of the Principal Malaysia Funds ("Funds"). Accordingly, any rebate or shared commission will be directed to the account of the Fund. We may retain goods and services (soft commission) provided by any broker or dealer if the following conditions are met:

- (a) the soft commission brings direct benefit or advantage to the management of the Fund and may include research and advisory related services;
- (b) any dealings with the broker or dealer is executed on terms which are the most favourable for the Fund; and
- (c) the availability of soft commission is not the sole or primary purpose to perform or arrange transactions with such broker or dealer, and we and the fund the manager will not enter into unnecessary trades in order to achieve a sufficient volume of transactions to qualify for soft commission.

During the financial year review, the Manager and Trustee did not receive any rebates from the brokers or dealers but the Manager has retained soft commission in the form of goods and services for the benefit of the fund such as financial wire services and stock quotations system incidental to investment management of the Funds and there was no churning of trades.

SECURITIES FINANCING TRANSACTIONS

The Fund has not undertaken any securities lending or repurchase transactions during the financial year under review.

STATE OF AFFAIR OF THE FUND

In relation to this Fund, the Fund had issued the Replacement Master Prospectus (Conventional funds) dated 10 July 2023.

Effective 24 November 2023, the Fund has changed Trustee to HSBC (Malaysia) Trustee Berhad following the issuance of the First Supplemental Master Prospectus (Conventional funds) dated 27 October 2023.

We are of view that the changes above do not affect the existing unit holder to stay invested in the Fund and it is not a significant change. Unit holders may refer to Appendix 1 for the detailed list of changes.

There were no significant changes in the state of affairs of the Fund during the financial year and up to the date of Manager's report, not otherwise disclosed in the financial statements.

CIRCUMSTANCES THAT MATERIALLY AFFECT ANY INTEREST OF UNIT HOLDERS

There were no circumstances that had materially affected the interest of the unit holders during the financial year under review.

CROSS TRADE

No cross-trade transactions have been carried out during the financial year.

UNIT SPLIT

No unit split exercise has been carried out during the financial year.

**STATEMENT BY MANAGER TO THE UNIT HOLDERS OF
PRINCIPAL MALAYSIA OPPORTUNITIES FUND**

**INDEPENDENT AUDITORS' REPORT TO THE UNIT HOLDERS OF
PRINCIPAL MALAYSIA OPPORTUNITIES FUND**

Report on the audit of the financial statements

Opinion

In our opinion, the financial statements of Principal Malaysia Opportunities Fund (the "Fund"), which comprise the statement of financial position of the fund as at 31 December 2023, and statement of comprehensive income, statement of changes in net assets attributable to unit holders and statement of cash flows of the Fund for the year then ended, and notes to the financial statements, including material accounting policy information, as set out on pages 8 to 35.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund as at 31 December 2023, and of its financial performance and cash flows for the year then ended in accordance with Malaysian Financial Reporting Standards and International Financial Reporting Standards.

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the financial statements* section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence and other ethical responsibilities

We are independent of the Fund in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By-Laws") and the International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Information other than the financial statements and auditors' report thereon

The Manager of the Fund (the "Manager") is responsible for the other information. The other information comprises the information included in the annual report of the Fund but does not include the financial statements of the Fund and our auditors' report thereon.

Our opinion on the financial statements of the Fund does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Fund, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Fund or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

**INDEPENDENT AUDITORS' REPORT TO THE UNIT HOLDERS OF
PRINCIPAL MALAYSIA OPPORTUNITIES FUND (cont'd.)**

Report on the audit of the financial statements (cont'd.)

Responsibilities of the Manager for the financial statements

The Manager is responsible for the preparation of financial statements of the Fund that give a true and fair view in accordance with Malaysian Financial Reporting Standards and International Financial Reporting Standards. The Manager is also responsible for such internal control as the Manager determines is necessary to enable the preparation of financial statements of the Fund that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Fund, the Manager is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to liquidate the Fund or to cease operations, or have no realistic alternative but to do so.

The Trustee is responsible for overseeing the Fund's financial reporting process. The Trustee is also responsible for ensuring that the Manager maintains proper accounting and other records as are necessary to enable true and fair presentation of these financial statements.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Fund as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

**INDEPENDENT AUDITORS' REPORT TO THE UNIT HOLDERS OF
PRINCIPAL MALAYSIA OPPORTUNITIES FUND (cont'd.)**

Report on the audit of the financial statements (cont'd.)

Auditors' responsibilities for the audit of the financial statements (cont'd.)

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We are also:

- Identify and assess the risks of material misstatement of the financial statements of the Fund, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.
- Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Fund or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the financial statements of the Fund, including the disclosures, and whether the financial statements of the Fund represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL YEAR ENDED 31 DECEMBER 2023**

1. THE FUND, THE MANAGER, AND ITS PRINCIPAL ACTIVITIES

Principal Malaysia Opportunities Fund (the “Fund”) is governed by a Principal Master Deed dated 15 May 2008, a Fourth Supplemental Master Deed dated 18 March 2009, a Thirteenth Supplemental Master Deed dated 26 June 2012, an Eighteenth Supplemental Master Deed dated 25 March 2015 and a Twentieth Supplemental Master Deed dated 21 October 2019, a Twenty Third Supplemental Master Deed dated 27 June 2022, a Twenty Fourth Supplemental Master Deed dated 13 January 2023 between Principal Asset Management Berhad (the “Manager”) and Maybank Trustees Berhad (the “Previous Trustee”) and a Twenty Fifth Supplemental Master Deed dated 26 May 2023 (collectively referred to as the “Deeds”) between the Manager and HSBC (Malaysia) Trustee Berhad (the “Trustee”).

The Fund may invest between 70% to 98% (both inclusive) of the Fund’s NAV in local equities. The investment policy and strategy of the Fund will be to invest in stocks which are selected based on their future growth prospects. The Fund may opt to seek investment exposure via collective investment scheme that is in line with the Fund’s objective, subject to the requirement of the GUTF. In addition, liquid assets may also be strategically used if the Manager feels that the market downside risk is high in the short term. With effect from 10 July 2023, the Fund may invest up to 25% of its NAV in companies that are listed in any Eligible Market globally with some operations or businesses in Malaysia to capture growth opportunities.

The Fund will be managed with high tracking error. The investment strategy of the Fund will be predominantly based on bottom up stock selection instead of investing mainly in the stocks represented in the benchmark. Consequently, the Fund’s individual stock and sector weightage will deviate significantly from the benchmark, thus leads to high tracking error. The strategy of the Fund includes utilising liquid assets dynamically in the changing market conditions. For example, high level of cash holdings in the bearish market will result in higher tracking error as the cash positions helps minimise the degree of the decline in Fund’s NAV as compared to the benchmark which have 100% exposure to the market downside.

The asset allocation strategy for this Fund is as follows:

- between 70% to 98% (both inclusive) of the Fund’s NAV will be invested in local equities; and
- at least 2% of the Fund’s NAV in liquid assets.

All investments will be subjected to the SC Guidelines on Unit Trust Funds (“GUTF”), SC requirements, the Deeds, except where exemptions or variations have been approved by the SC, internal policies and procedures and the Fund’s objective.

The Fund has issued the Replacement Master Prospectus (Conventional funds) dated 10 July 2023 and First Supplemental Master Prospectus (Conventional funds) dated 27 October 2023.

The Manager is a joint venture between Principal Financial Group®, a member of the FORTUNE 500® and a Nasdaq-listed global financial services and CIMB Group Holdings Berhad, one of Southeast Asia’s leading universal banking groups. The principal activities of the Manager are the establishment and management of Unit Trust Funds and fund management activities.

2. MATERIAL ACCOUNTING POLICIES

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements:

(a) Basis of preparation

The financial statements have been prepared in accordance with the provisions of the MFRS as issued by the Malaysian Accounting Standards Board ("MASB") and IFRS as issued by the International Accounting Standards Board ("IASB").

The financial statements have been prepared under the historical cost convention, as modified by financial assets at fair value through profit or loss.

The preparation of financial statements in conformity with MFRS and IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported year.

It also requires the Manager to exercise their judgement in the process of applying the Fund's accounting policies. Although these estimates and assumptions are based on the Manager's best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 2(l).

There are no other standards, amendments to standards or interpretations effective for financial year beginning on 1 January 2023 that have a material effect on the financial statements of the Fund.

None of the standards, amendments to standards or interpretations that are effective for the financial year beginning on/after 1 January 2024 are applicable to the Fund.

(b) Financial assets and financial liabilities

Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those to be measured at amortised cost.

The Fund classifies its investments based on both the Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed, and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income ("OCI").

The contractual cash flows of the Fund's debt securities are solely principal and interest ("SPPI"). However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale.

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(b) Financial assets and financial liabilities (continued)

Classification (continued)

The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

The Fund classifies cash and cash equivalents, amount due from Manager, amount due from Manager of collective investment scheme – management fee rebates and dividends receivable as financial assets at amortised cost as these financial assets are held to collect contractual cash flows consisting of the amount outstanding.

All of the Fund's financial liabilities are measured at amortised cost.

Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date, the date on which the Fund commits to purchase or sell the asset. Shariah-compliant investments are initially recognised at fair value. Transaction costs are expensed in the statement of comprehensive income.

Financial instruments are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the Shariah-compliant investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Unrealised gains or losses arising from changes in the fair value of the financial assets at fair value through profit or loss are presented in the statement of comprehensive income within net gain or loss on financial assets at fair value through profit or loss in the financial year which they arise.

Dividend income from financial assets at fair value through profit or loss is recognised in the statement of comprehensive income as part of gross dividend income when the Fund's right to receive payments is established.

Quoted securities in Malaysia are valued at the last traded market price quoted on Bursa Malaysia Securities Bhd ("Bursa Securities") at the date of the statement of financial position.

If a valuation based on the market price does not represent the fair value of the quoted securities, for example during abnormal market conditions or when no market price is available, including in the event of a suspension in the quotation of the quoted securities for a period exceeding 14 days, or such shorter period as agreed by the Trustee, then the quoted securities are valued as determined in good faith by the Manager, based on the methods or basis approved by the Trustee after appropriate technical consultation.

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)**(b) Financial assets and financial liabilities (continued)**Recognition and measurement (continued)

Deposits with licensed financial institutions are stated at cost plus accrued interest calculated on the effective interest method over the period from the date of placement to the date of maturity of the respective deposits.

Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective interest rate method.

Impairment for assets carried at amortised costs

The Fund measures credit risk and expected credit losses (“ECL”) using probability of default, exposure at default and loss given default. The Manager consider both historical analysis and forward-looking information in determining any ECL. The Manager consider the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month ECL as any such impairment would be wholly insignificant to the Fund.

Significant increase in credit risk

A significant increase in credit risk is defined by the Manager as any contractual payment which is more than 30 days past due.

Definition of default and credit-impaired financial assets

Any contractual payment which is more than 90 days past due is considered credit impaired.

Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor’s sources of income or assets to generate sufficient future cash flows to repay the amount. The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in impairment gains. There are no write-offs/recoveries during the financial year.

(c) Functional and presentation currency

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the “functional currency”). The financial statements are presented in MYR, which is the Fund’s functional and presentation currency.

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)**(d) Income recognition**

For quoted equities, realised gains and losses on sale of investments are accounted for as the difference between the net disposal proceeds and the carrying amount of investments, determined on a weighted average cost basis.

Interest income from deposits with licensed financial institutions is recognised on a time proportionate basis using the effective interest rate method on an accrual basis.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit impaired. For credit-impaired financial assets the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

Realised gain or loss on disposal of quoted securities is accounted for as the difference between the net disposal proceeds and the carrying amount of quoted securities, determined on a weighted average cost basis.

(e) Cash and cash equivalents

For the purpose of statement of cash flows, cash and cash equivalents comprise bank balance and deposits held in highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(f) Taxation

Current tax expense is determined according to Malaysian tax laws at the current rate based upon the taxable profit income earned during the financial year.

Withholding taxes on investment income from investment is based on tax regime of the respective countries that the Fund invests in. They are presented within other expenses line in the statement of comprehensive income.

(g) Distribution

A distribution to the Fund's unit holders is accounted for as a deduction from realised reserve. A proposed distribution is recognised as a liability in the financial year in which it is approved by the Trustee.

(h) Amount due from/to stockbrokers

Amounts due from and amount due to stockbrokers represent receivables for quoted securities sold and payables for quoted securities purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively.

(i) Transactions costs

Transaction costs are costs incurred to acquire or dispose financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisors, brokers, and dealers. Transaction costs, when incurred, are immediately recognised in the statement of comprehensive income as expenses.

2. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(j) Unit holders' contributions

The unit holders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "Financial Instruments: Presentation". Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's NAV;
- the units are the most subordinated class and class features are identical;
- there is no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

The outstanding units are carried at the redemption amount that is payable at each financial year if unit holder exercises the right to put the unit back to the Fund.

Units are created and cancelled at prices based on the Fund's NAV per unit at the time of creation or cancellation. The Fund's NAV per unit is calculated by dividing the net assets attributable to unit holders with the total number of outstanding units.

(k) Realised and unrealised portions of profit or loss after tax

The analysis of realised and unrealised profit or loss after tax as presented on the statement of comprehensive income is prepared in accordance with GUTF.

(l) Critical accounting estimates and judgements in applying accounting policies

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information content of the estimates, certain key variables that are anticipated to have material impact to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgement are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the GUTF.

However, the Manager is of the opinion that in applying these accounting policies, no significant judgement was required.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES

Financial instruments of the Fund are as follows:

	Financial assets at fair value through profit or loss RM	Financial assets at amortised cost RM	Total RM
2023			
Cash and cash equivalents (Note 9)	-	1,730,182	1,730,182

	<u>49,812,496</u>	<u>1,723,478</u>	<u>51,535,974</u>

All liabilities are financial liabilities which are carried at amortised cost.

The investment objective of the Fund is to grow the value of investments over the long-term through investment in Malaysian shares.

The Fund is exposed to a variety of risks which include market risk (inclusive of price risk and interest rate risk), credit risk and liquidity risk.

Financial risk management is carried out through internal control process adopted by the Manager and adherence to the investment restrictions as stipulated in the Deeds and GUTF.

(a) Market risk

(i) Price risk

This is the risk that the fair value of an investment in quoted securities will fluctuate because of changes in market prices (other than those arising from interest rate risk). The value of quoted securities may fluctuate according to the activities of individual companies, sector, and overall political and economic conditions. Such fluctuation may cause the Fund's NAV and prices of units to fall as well as rise, and income produced by the Fund may also fluctuate.

The price risk is managed through diversification and selection of quoted securities and other financial instruments within specified limits according to the Deeds.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(a) Market risk (continued)

(i) Price risk (continued)

The Fund's overall exposure to price risk is as follows:

	2023 RM	2022 RM
Financial assets at fair value through profit or loss:		
- Collective investment scheme	760,136	-
- Quoted securities	48,605,422	49,812,496

The table below summarises the sensitivity of the Fund's profit or loss and NAV to movements in prices of quoted securities at the end of each reporting year. The analysis is based on the assumptions that the price of the quoted securities fluctuated by 5% with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the quoted securities, having regard to the historical volatility of the prices.

% Change in price of quoted securities	Market value RM	Impact on profit or loss and NAV RM
2023		
-5%	46,897,280	(2,468,278)
0%	49,365,558	-
+5%	51,833,836	2,468,278
2022		
-5%	47,321,871	(2,490,625)
0%	49,812,496	-
+5%	52,303,121	2,490,625

(ii) Currency risk

Currency risk is associated with investments that are quoted and/or priced in foreign currency denomination. Foreign currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Manager will evaluate the likely directions of a foreign currency versus RM based on considerations of economic fundamentals such as interest rate differentials, balance of payments position, debt levels, and technical chart considerations.

The following table sets out the foreign currency risk concentrations arising from the denomination of the Fund's financial instrument in foreign currencies:

Financial assets	Cash and cash equivalents RM	Total RM
2023		
USD	9,180	9,180

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(a) Market risk (continued)

(ii) Currency risk (continued)

The table below summarises the sensitivity of the Fund's profit or loss and NAV to changes in foreign exchange movements at the end of each reporting year. The analysis is based on the assumption that the foreign exchange rate fluctuates by 5%, with all other variables remain constants. This represents management's best estimate of a reasonable possible shift in the foreign exchange rate, having regard to historical volatility of this rate. Disclosures below are shown in absolute terms, changes and impacts could be positive or negative.

	% Change in foreign exchange rate %	Impact on profit or loss/NAV 2023 RM
USD	+/- 5	459

(iii) Interest rate risk

Interest rate is a general economic indicator that will have an impact on the management of the Fund.

Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates.

The Fund's exposure to fair value interest rate risk arises from investment in money market instruments. The interest rate risk is expected to be minimal as the Fund's investments comprise mainly short-term deposits with approved licensed financial institutions.

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Fund is not exposed to cash flow interest rate risk as the Fund does not hold any financial instruments at variable interest rate.

As at the end of each financial year, the Fund is not exposed to a material level of interest rate risk.

The weighted average effective interest rate per annum is as follows:

	2023 %	2022 %
Deposits with licensed financial institutions	1.00	1.98

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(b) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligation resulting in financial loss to the Fund.

The credit risk arising from bank balance and placements of deposits in licensed financial institutions is managed by ensuring that the Fund will only place deposits in reputable licensed financial institutions.

For amount due from stockbrokers, the settlement terms are governed by the relevant rules and regulations as prescribed by respective stock exchanges. The credit risk is minimal as all transactions in quoted securities are settled/paid upon delivery using approved stockbrokers.

For the amount due from Manager, the settlement terms of the proceeds from the creation of units receivable from the Manager are governed by the GUTF.

The following table sets out the credit risk concentration of the Fund:

	Cash and cash equivalents RM	Amount due from Manager RM	Amount due from Manager of CIS - Rebate RM	Dividends receivable RM	Total RM
2023					
- AAA	1,730,182	-	-	-	1,730,182
- Not Rated	-	193,275	680	39,989	233,944
	1,730,182	193,275	680	39,989	1,964,126
	Cash and cash equivalents RM	Amount due from stockbrokers RM	Amount due from Manager RM		Total RM
2022					
- AAA	1,701,159	-	-		1,701,159
- Not Rated	-	3,259	19,060		22,319
	1,701,159	3,259	19,060		1,723,478

Deposits with licensed financial institutions of the Fund have an average remaining maturity of 1 days (2022: 2 days).

(c) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations.

The Manager manages this risk by maintaining sufficient level of liquid assets to meet anticipated payments and cancellations of the units by unit holders. Liquid assets comprise bank balances and deposits with licensed financial institutions, which are capable of being converted into cash within 7 business days. Generally, all investments are subject to a certain degree of liquidity risk depending on the nature of the investment instruments, market, sector and other factors.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(c) Liquidity risk (continued)

For the purpose of the Fund, the Manager will attempt to balance the entire portfolio by investing in a mix of assets with satisfactory trading volume and those that occasionally could encounter poor liquidity. This is expected to reduce the risks for the entire portfolio without limiting the Fund's growth potentials.

The table below summarises the Fund's financial liabilities into relevant maturity groupings based on the remaining year as at the statement of financial position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows.

	Less than 1 month RM	Between 1 month to 1 year RM	Total RM

(d) Capital risk management

The capital of the fund is represented by net assets attributable to unit holders of RM51,153,194 (2022: RM51,418,012). The amount of capital can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unit holders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns to unit holders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

(e) Fair value estimation

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

The fair values of financial assets traded in active markets (such as trading securities) are based on quoted market prices at the close of trading on the financial year end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

(e) Fair value estimation (continued)

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

(i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

2022				
Financial assets at fair value through profit or loss:				
- Quoted securities	49,812,496	-	-	49,812,496

Investments whose values are based on quoted market prices in active markets, and are therefore classified within Level 1, include active listed equities. The Fund does not adjust the quoted prices for these instruments. The Fund's policies on valuation of these financial assets are stated in Note 2(b).

- (i) The carrying values of cash and cash equivalents, amount due from Manager, amount due from Manager of collective investment scheme – management fee rebates, dividends receivable and all current liabilities are a reasonable approximation of their fair values due to their short-term nature.

4. MANAGEMENT FEE

In accordance with Deeds, the Manager is entitled to a maximum management fee of 1.85% per annum, calculated daily based on the NAV of the Fund.

For the financial year ended 31 December 2023, the management fee is recognised at a rate of 1.85% per annum (2022: 1.85% per annum).

There is no further liability to the Manager in respect of management fee other than amounts recognised above.

5. TRUSTEE FEE

In accordance with the Deeds, the Trustee is entitled to a maximum management fee of 0.045% per annum, calculated daily based on the NAV of the Fund. The Trustee fee includes the local custodian fee but excludes the foreign sub-custodian fee (if any).

For the financial period from 1 January 2023 until 24 November 2023, the Trustee fee was recognised at a rate of 0.08% per annum. Effective 25 November 2023, Trustee fee is recognised at a rate of 0.045% per annum for each unit class (2022: 0.08% per annum).

There is no further liability to the Trustee in respect of Trustee's fee other than the amount recognised above.

6. DISTRIBUTION

Distributions to unit holders are derived from the following sources:

	RM	2023 %	RM	2022 %

Distribution on 24 August 2022	-	3.95

* Distribution income has been accrued as at the end of the prior financial year but is not declared and paid as distribution.

Gross distribution is derived using total income less total expenses. Net distribution above is sourced from current and prior financial years' realised income.

Gross distribution per unit is derived from gross realised income less expenses, divided by the number of units in circulation. Net distribution per unit is derived from gross realised income less expenses and taxation, divided by the number of units in circulation.

12. TOTAL EXPENSE RATIO ("TER")

	2023 %	2022 %
TER	<u>2.00</u>	<u>1.97</u>

TER is derived from the following calculation:

$$\text{TER} = \frac{(A + B + C + D + E) \times 100}{F}$$

A	=	Management fee
B	=	Trustee fee
C	=	Audit fee
D	=	Tax agent's fee
E	=	Other expenses excluding CDS fee and withholding tax
F	=	Average NAV of the Fund calculated on a daily basis

The average NAV of the Fund for the financial year calculated on a daily basis is RM50,085,050 (2022: RM52,532,530).

13. PORTFOLIO TURNOVER RATIO ("PTR")

	2023	2022
PTR (times)	<u>1.30</u>	<u>0.54</u>

PTR is derived based on the following calculation:

$$\frac{(\text{Total acquisition for the financial year} + \text{total disposal for the financial year}) \div 2}{\text{Average NAV of the Fund for the financial year calculated on a daily basis}}$$

where:

total acquisition for the financial year = RM63,496,588 (2022: RM28,469,135)
total disposal for the financial year = RM66,709,214 (2022: RM27,891,837)

The framework outlines the responsibilities to assess and monitor liquidity risk of the Fund, and to ensure appropriate measures are taken to mitigate the risk. The liquidity risk management framework that we have put in place is as follows:</p> <ul style="list-style-type: none"> ▪ Regular review by the designated fund manager on the Fund’s investment portfolio to maintain its liquidity level. ▪ Periodic assessments are carried out on the Fund’s liquidity profile (under both normal and stress market conditions) and on the concentration of unitholders. These assessments allow the Fund to be proactively managed to mitigate liquidity concerns that may arise in the ordinary course of portfolio management as well as in relation to the Fund’s ability to meet unitholders’ withdrawal requests. ▪ Suspension of withdrawal requests due to exceptional circumstances. During the suspension period, withdrawal requests will not be accepted and in the event we have earlier accepted the withdrawal requests prior to the suspension is declared, the withdrawal requests will be dealt on the next Business Day once the suspension is lifted. The action to suspend withdrawal requests from Unit holders shall be exercised only as a last resort by the Manager. <p><i>Note: Please refer to Section 3.10 for more information.</i></p>

The global exposure of the Funds is calculated based on the following:

Commitment approach

The global exposure of the Funds to derivatives is calculated as the sum of the:

- absolute value of the exposure of each individual derivative not involved in netting or hedging arrangements;
- absolute value of the net exposure of each individual derivative after netting or hedging arrangement; and
- the values of cash collateral received pursuant to:
 - (i) the reduction of exposure to counterparties of OTC derivatives; and
 - (ii) efficient portfolio management techniques relating to securities lending and repurchase transactions (if applicable).

Netting arrangements

Netting arrangements may be taken into account to reduce the Fund's exposure to derivatives.

The Fund may net positions between:

- (a) derivatives on the same underlying constituents, even if the maturity dates are different; or
- (b) derivatives and the same corresponding underlying constituents, if those underlying constituents are transferable securities, money market instruments, or units or shares in collective investment schemes.

Hedging arrangements

Hedging arrangements may be taken into account to reduce the Fund's exposure to derivatives.

The marked-to-market value of transferable securities, money market instruments, or units or shares in collective investment schemes involved in hedging arrangements may be taken into account to reduce the exposure of the Fund to derivatives.

List of Amendment
Replacement Master Prospectus (Conventional Funds)

The hedging arrangement must:

- (a) not be aimed at generating a return;
- (b) result in an overall verifiable reduction of the risk of the Funds;
- (c) offset the general and specific risks linked to the underlying constituent being hedged;
- (d) relate to the same asset class being hedged; and
- (e) be able to meet its hedging objective in all market conditions.

Note: The above restrictions and limits do not apply to securities or instruments issued or guaranteed by the Malaysian government or BNM.

Note 1:

KLF is subject to the following investment restriction/limits:

The value of the Fund's investment in ordinary shares issued by any single issuer is allowed to invest according to the weightings of the component stocks in the FTSE Bursa Malaysia KLCI. In addition, up to 5% above the weightings is permitted for investments in securities related to the component stocks of the FTSE Bursa Malaysia KLCI. Please refer to "Approvals and Conditions" section on page Error! Bookmark not defined. for further information.

Note 2:

Not applicable for LI-BO and LI-EIB. Instead, the following apply:

- (17) the value of the Fund's investments in debt securities and money market instruments issued by any single issuer must not exceed 20% of the Fund's NAV ("single issuer limit"). In determining the single issuer limit, the value of the fund's investments in instruments in (1) by the same issuer must be included in the calculation.
- (18) The single issuer limit in (17) may be increased to 30% if the debt security is rated by any Malaysian or global rating agency to have the highest long-term credit rating.
- (19) Where the single issuer limit is increased to 30% pursuant to (18), the single issuer aggregate limit of 25% in (5) may be raised to 30% of the fund's NAV.
- (20) The value of the Fund's investments in debt securities and money market instruments issued by any group of companies must not exceed 30% of the Fund's NAV. In determining the group limit, the value of the fund's investments in instruments in (1) issued by the issuers within the same group of companies must be included in the calculation.
- (21) Where the debt security or money market instruments are issued, or the issue is guaranteed by, either a foreign government, foreign government agency, foreign central bank or supranational, that has a minimum long-term credit rating of investment grade (including gradation and subcategories) by an international rating agency, the fund manager may apply the limits in paragraphs (10) and (11).

In respect of the above investment restrictions and limits, the GUTF provides that any breach of the restrictions and limits due to appreciation or depreciation in value of the Fund's investments, repurchase of units or payment made out of the Fund, or change in capital of a corporation in which the Fund has invested in, or downgrade in or cessation of a credit rating need not be reported to the SC but we must rectify as soon as practicable within three (3) months from the date of breach unless stated otherwise in the GUTF. However, the three-month period may be extended if it is in the best interest of Unit holders and Trustee's consent is obtained. Such extension must be subject to at least a monthly review by the trustee.

1.1.19/35	<p>Principal Asia Pacific Renewables Fund</p> <p>As the Fund is a qualified sustainable and responsible investment fund, the investments of the Fund will be subject to the ESG integration approach which involves the analysis of material factors in investment analysis and investment decisions, including ESG factors as defined by the United Nations sponsored Principles for Responsible Investment (“UNPRI”) including the selection, retention, and realisation of the Fund’s investments. Companies are assessed against material ESG risks such as climate change, natural resources, human capital, social opportunities and corporate governance. We do not seek to exclude companies which are relatively low in an ESG assessment rather we see this as an opportunity to engage these companies and advocate adoption of best practices for further improvement. However, companies that do not improve or demonstrate a commitment to improve after engagement exercises may be excluded from further investment or we may dispose of the investment within an appropriate timeframe.</p> <p>We will review the fund periodically to ensure the investments of the Fund are in line with the sustainability criteria adopted and overall impact of the investment of the Fund are not inconsistent with any other sustainability criteria. If the Fund’s investment become inconsistent with the investment strategy or sustainability considerations of the Fund, we will dispose the investment within an appropriate timeframe.</p>	<p>Principal Asia Pacific Renewables Fund</p> <p>As the Fund is a qualified sustainable and responsible investment fund, the investments of the Fund will at least two thirds (2/3) of the Fund’s NAV (“Threshold”) will be investments that are subject to the ESG integration* approach which involves the analysis of material factors in our investment analysis and investment decisions, including ESG factors as defined by the United Nations sponsored Principles for Responsible Investment (“UNPRI”) fundamental and ESG factors including the selection, retention, and realisation of the Fund’s investments. Companies are assessed against relevant and material ESG risks such as climate change, natural resources, human capital, social opportunities which may include but are not limited to climate change and corporate governance. We do not seek to exclude companies which are ranked relatively low in an ESG assessment, rather we see this as an opportunity to engage these companies and advocate adoption of best practices for further improvement. However, companies that do not improve or demonstrate a commitment to improve after engagement exercises may be excluded from further investment or we may dispose of the investment within an appropriate timeframe. We may engage companies in any area of ESG concern, as our understanding of each company is constantly informed by ongoing developments in the company/industry. In our investment process of ESG integration, it is not necessary to dispose of the investment even if the company does not demonstrate a commitment to improve on a particular ESG issue if it is not deemed as material. Effecting change on a company as a minority shareholder would also take time. The appropriate timeframe referred to here would be subject to recommendation by the analyst covering the security, and the decision by the portfolio manager.</p> <p>As part of ESG integration, we overlay ESG analysis into the fundamental research process, where a wide range of ESG factors are considered, including a company’s relationships with each of its stakeholders, such as shareholders, customers, suppliers and their supply chains, their communities, and the environment. The applicable ESG characteristics will depend on the sector from which the stock originates and so will vary from stock to stock. The final outcome of the analysis is to assign either a low, medium or high sustainability risk and an improving, stable or deteriorating sustainability trend. The analyst will document the assessment and discussion in the research platform or via email.</p>

1.8.2/48	Nil	<div> <div> 1.8.2.16. Sustainability risk The Fund is managed based on the characteristics of sustainability. The Fund may exclude securities of certain companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings that do not align with the sustainability criteria. As such, the Fund may underperform funds that do not consider sustainability criteria in their investment strategy. This risk cannot be mitigated as it is inherent to the investment strategy of the Fund. The Fund may be exposed to companies which are ranked relatively low in an ESG assessment. We will take the opportunity to engage with these companies to advocate adoption of best practices for further improvement. However, the effectiveness of engagement may vary from company to company. </div> <div> <ul style="list-style-type: none"> Principal Asia Pacific Renewables Fund </div> </div>
