The 3-, 5-, 7-, 10-, 15-, 20- and 30-year benchmarks closed at 3.48% (+1bps), 3.66% (+1bps), 3.78% (+1bps), 3.88% (-1bps), 4.00% (-2bps), 4.09% (-1bps) and 4.20% (-1bps), respectively in March 2024. The MGS yield curve bull flattened as the short-term yields increased more than the long-term yields, mirroring a similar trend in US Treasuries, albeit at smaller magnitudes.

Bank Negara Malaysia ("BNM") kept the Overnight Policy Rate ("OPR") at 3.00% for the 5th straight Monetary Policy Committee ("MPC") meeting at its second meeting for the year on 6-7 March, amid improving economic growth, moderate inflation and stabilization in Ringgit against US-dollar. The policy rate has now remained unchanged for 10 months after it was last raised in May 2023. BNM maintained its overall neutral language in the MPC statement, unchanged since September 2023, but with a slight optimism on regional economic activities and global trade, supported by the expectation of monetary easing by global central banks in 2024.

Labour market conditions are expected to see a slight easing in the unemployment rate, dropping to 3.3% in 2024 from 3.4% in 2023. Wages are projected to increase, with average compensation for employees growing by 5.5-6.5% in 2024 compared to 5.3-5.7% in 2023, supporting consumer demand alongside the anticipated recovery in tourism activities.

Malaysia's inflation edged slightly up by 1.8% YoY in February after three straight months of a 1.5% YoY increase (January 2024: 1.5%) and higher than estimates (+1.4%). Core inflation remained flat in February at 1.8% YoY (January 2024: 1.8% YoY).

Industrial production index ("IPI") grew faster than expected by +4.3% YoY in January (December: -0.03% YoY, estimates: 2% YoY), marking it the fastest rate of expansion since May 2023, when factory output rose by 4.7%.

BNM stated that the current monetary policy stance remains supportive of the economy and is consistent with the current assessment of the inflation and growth prospects. The MPC remains vigilant to ongoing developments to inform the assessment on the outlook of domestic inflation and growth. The MPC will ensure that the monetary policy stance remains supportive of the economy and is consistent with the current assessment of the inflation and growth prospects.
